

Sajian Warisan Bhd

Registration No. 201501019874 (1142863-K)
(Incorporated in Malaysia)

SUKUK MURABAHAH (TAWARRUQ)

RM4,000,000 in nominal value

Unrated — no rating agency has assessed this issue

Shariah compliant — Murabahah via Tawarruq

ACE Market issuer — RM4.0 million issue

65% taken by a professional credit fund as Anchor Investor

Retail tranche RM1.4 million — fractional from RM100

Instrument	Sukuk Murabahah (Tawarruq)
Programme size	RM20,000,000 in nominal value
Nominal value of this issue	RM4,000,000
Anchor Investor allocation	RM2,600,000 (65.0%)
Retail tranche	RM1,400,000 (35.0%)
Minimum investment	RM100 (fractional)
Maximum single-issuer holding	RM10,000 per investor
Tenure	3 years from the issue date
Profit rate	7.40 per cent. per annum, fixed
Profit payment frequency	Semi-annually in arrears
Credit rating	None. This issue is unrated.
Issue date	15 September 2026
Maturity date	15 September 2029
Exit before maturity	Anchor Investor standing bid only — see Section 9.5

THIS OFFERING IS MADE TO RETAIL INVESTORS THROUGH THE TOKENKAN PLATFORM IN FRACTIONAL DENOMINATIONS FROM RM100. IT IS NOT A DEPOSIT. IT IS NOT PROTECTED BY PERBADANAN INSURANS DEPOSIT MALAYSIA. THE CAPITAL INVESTED IS AT RISK AND MAY NOT BE RETURNED IN FULL. RETURNS ARE NOT GUARANTEED AND DEPEND ON THE ISSUER CONTINUING TO MEET ITS OBLIGATIONS. THE ISSUER IS A SMALL COMPANY AND THIS IS A SMALL ISSUE; INVESTORS SHOULD EXPECT GREATER CREDIT RISK AND LESS LIQUIDITY THAN ON A LARGE INSTITUTIONAL ISSUANCE. EXIT BEFORE MATURITY IS AVAILABLE ONLY THROUGH THE ANCHOR INVESTOR STANDING BID DESCRIBED IN SECTION 9.5, WHICH IS SUBJECT TO LIMITS AND MAY BE SUSPENDED. THE TOKENKAN PLATFORM IS NOT AN EXCHANGE. NOTHING IN THIS DOCUMENT IS INVESTMENT ADVICE OR A RECOMMENDATION. PROSPECTIVE INVESTORS SHOULD READ THIS DOCUMENT IN FULL, AND IN PARTICULAR THE RISK FACTORS IN SECTION 7, AND SHOULD INVEST ONLY WHAT THEY CAN AFFORD TO LOSE. THIS ISSUE IS UNRATED. NO RATING AGENCY HAS ASSESSED THE CREDITWORTHINESS OF THE ISSUER OR OF THESE SUKUK. THE PROFIT RATE OF 7.40 PER CENT. IS THE HIGHEST OFFERED ON THE PLATFORM AND REFLECTS THE HIGHEST CREDIT RISK. THE ISSUER OPERATES RESTAURANTS, A BUSINESS WITH HIGH FAILURE RATES AND THIN MARGINS. INVESTORS SHOULD READ SECTION 7 IN FULL.

1. EXECUTIVE SUMMARY

1.1 Overview of the Issuer

Sajian Warisan Bhd operates and franchises a chain of halal casual dining restaurants in Malaysia. It operates 34 outlets directly and franchises a further 22 to sub-franchisees, and supplies both networks with sauces, marinades and prepared components from a central kitchen it owns at Selayang, Selangor.

The Issuer has been listed on the ACE Market of Bursa Malaysia since November 2021 and had a market capitalisation of RM68.4 million as at 30 June 2026. It employed 486 persons as at 31 December 2025.

For the financial year ended 31 December 2025 the Issuer recorded revenue of RM51.8 million, EBITDA of RM12.66 million and profit for the financial year of RM3.70 million. Total assets stood at RM78.7 million and shareholders' funds at RM23.0 million.

1.2 Purpose of the offering

The Issuer is offering RM4,000,000 in nominal value of Sukuk Murabahah, the inaugural issue under its RM20.0 million Sukuk Programme. Of that, RM2,600,000 is allocated to the Anchor Investor and RM1,400,000 to retail investors through the Tokenkan platform in fractional denominations from RM100, subject to a maximum holding of RM10,000 per investor.

Proceeds will fund the fit-out of six new outlets, central kitchen equipment, the refinancing of existing equipment financing and working capital. Section 5 has the detail.

1.3 Why this issuance exists at all

The economic case for this offering is worth stating plainly, because it explains both the opportunity and the risk.

A conventional RM4.0 million bond issuance is impossible in Malaysia. Rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees total RM1.4 million to RM1.9 million largely irrespective of deal size, which on RM4.0 million would consume 35 to 48 per cent. of the proceeds. Companies of this size therefore have two options: dilute their equity, or borrow from a bank against security on terms the bank sets.

The total cost of this issuance is RM180,000, being 4.5 per cent. of nominal value. That reduction is achieved by removing the underwriter, whose distribution function the retail base performs in aggregate, by declining to obtain a rating, and by standardising the documentation and the registry and paying agency functions.

Investors should understand what they are accepting in exchange. There is no rating. There is no underwriter who has put capital at risk behind the credit. The Issuer is a small company in a sector with high failure rates. The compensation is a profit rate of 7.40 per cent., the highest on the Platform, and security over the central kitchen premises.

1.4 What protects investors in the absence of a rating

Three things, none of which is equivalent to a rating:

- **Security.** A first-ranking charge over the central kitchen premises valued at RM11.4 million, a debenture over the assets of the Issuer, an assignment of RM8.2 million of annual franchise royalties, and a corporate guarantee from the controlling shareholder. Section 4.6 sets out the security and assesses candidly what it is likely to be worth.
- **Covenants.** Gearing, leverage, coverage, shareholders' funds and security cover tests, in Section 4.8, monitored semi-annually by an independent trustee.
- **Anchor Investor participation.** A professional credit fund conducted its own credit assessment and took 65 per cent. of the issue at the same price and on the same terms as retail investors, ranking equally with them.

1.5 Key risks

A summary only. Section 7 must be read in full.

- **Unrated.** No independent professional opinion on creditworthiness exists.
- **Single master franchise.** The business rests on one agreement with six years remaining and a renewal at the franchisor's discretion. One non-compliance notice was received during the review period.
- **Sector failure rate.** Food service has high failure rates, thin margins and fixed occupancy costs against variable sales.
- **Covenant fragility in a downturn.** A fifteen per cent. same-outlet sales decline would breach the leverage covenant and reach the coverage covenant minimum.
- **Security ranks second.** The charged property carries RM7.2 million of prior financing, leaving RM4.2 million of equity against RM4.0 million of Sukuk before any forced-sale discount.
- **Debenture assets have little realisable value.** Outlet fit-out is largely worthless once removed from the premises.
- **Refinancing expected.** Free cash flow of RM1.2 million in FY2025 means accumulated cash will not retire RM4.0 million at maturity.
- **Delivery platform dependence.** 28.4 per cent. of own-outlet revenue at commissions of 20 to 30 per cent., with no negotiating leverage.
- **Expansion risk.** One of eleven outlets opened during the review period was closed at a write-off of RM420,000.
- **Exit is limited.** Only the Anchor Investor standing bid, at a 1.50 per cent. discount to formula, capped at RM70,000 monthly and suspended while a default continues.
- **Key person.** The founder holds the franchisor relationship personally.

1.6 Summary financial information

RM'000	FY2023	FY2024	FY2025
Revenue	38,200	44,600	51,800
EBITDA	8,620	10,480	12,660
Profit for the financial year	1,920	2,730	3,700
Total assets	60,400	68,700	78,700
Total liabilities	45,000	50,200	55,700
Total equity	15,400	18,500	23,000
Total financing	26,800	29,400	32,000
Net cash from operating activities	7,200	8,600	10,400
Free cash flow after capital expenditure	400	700	1,200
Gross gearing (times)	1.74	1.59	1.39
EBITDA / finance costs (times)	3.0	3.2	3.5

1.7 Operating statistics

	FY2023	FY2024	FY2025
Own outlets at year end	26	30	34
Sub-franchised outlets at year end	14	18	22
Same-outlet sales growth (%)	6.1	4.2	3.8
Average transaction value (RM)	24.60	25.40	26.20
Delivery channel share of own-outlet revenue (%)	31.2	29.8	28.4
Occupancy and staff cost as % of own-outlet revenue	63.4	62.6	61.8
Outlets closed during the year	1	0	0

2. ISSUER BACKGROUND

2.1 History and development

The Issuer was incorporated in June 2015 by Rosli bin Hamid, who had spent the preceding fourteen years in multi-outlet restaurant operations, to acquire the Malaysian master franchise for the casual dining brand it now operates. The first outlet opened at Kepong in 2016.

The Issuer opened outlets steadily through 2017 to 2020, acquired the Selayang central kitchen premises in 2019, and began sub-franchising in 2019 as a means of extending the network without funding fit-out from its own balance sheet. It listed on the ACE Market in November 2021, raising RM14.2 million, of which RM9.8 million funded outlet expansion.

The East Malaysia operations were established in 2023 through a seventy per cent. owned subsidiary with a local partner holding the balance.

This is the inaugural debt issuance of the Issuer. It has not previously accessed the debt capital markets, and the reason is set out in Section 1.3.

2.2 Business model

The Issuer earns revenue in three ways. It operates 34 restaurants directly, taking the full margin and bearing the full cost. It franchises 22 territories to sub-franchisees, from whom it receives an initial franchise fee and a continuing royalty calculated on their sales. And it sells prepared components from its central kitchen to both networks at a margin.

The distinction matters to a creditor. Own-outlet revenue of RM38.6 million in FY2025 is larger but capital-intensive and operationally exposed: the Issuer funds the fit-out, signs the lease and employs the staff. Franchise and central kitchen income of RM12.4 million is smaller but requires little capital, carries no lease obligation, and survives the closure of an individual sub-franchised outlet because the sub-franchisee bears that loss. It is also the income stream assigned to the Trustee as security under Section 4.6.

The Issuer operates the brand under a master franchise agreement with six years remaining. That agreement, and not any physical asset, is the foundation of the business, and its loss is the risk investors should weigh most heavily.

2.3 Revenue segments

Segment (RM'000)	FY2023	FY2024	FY2025
Own-outlet restaurant operations	28,400	33,200	38,600
Franchise fees and royalties from sub-franchisees	5,800	6,900	8,200
Central kitchen sales to sub-franchisees	3,200	3,800	4,200
Catering and events	800	700	800
Total revenue	38,200	44,600	51,800

2.4 Network and locations

Region	Own outlets	Sub-franchised	FY2025 revenue
Klang Valley	18	6	24,600
Northern region (Penang, Kedah, Perak)	6	7	9,800
Southern region (Johor, Melaka)	4	5	7,400
East Coast (Pahang, Terengganu, Kelantan)	0	4	3,200
East Malaysia (Sabah, Sarawak)	6	0	6,800
Total	34	22	51,800

All operations are in Malaysia and all revenue is in ringgit. Royalty income is remitted in ringgit. The master franchise royalty payable by the Issuer to its franchisor is denominated in United States dollars, which creates a modest exposure discussed in Section 7.4.

Own outlets are held under leases with a weighted average remaining term of 3.4 years, of which nine expire within the tenure of these Sukuk.

2.5 Management and employees

The Issuer employed 486 persons as at 31 December 2025, of whom 398 were outlet service and kitchen staff, 44 were central kitchen production staff, and 44 were in management, finance, marketing and franchise administration. Approximately 31 per cent. of outlet and kitchen staff are foreign nationals, which creates the exposure to foreign worker policy described in Section 7.3.

The management team is small. Investors should note that the Issuer depends on a handful of individuals, and in particular on its founder, who holds the franchisor relationship personally.

2.6 Strategy

The strategy has three elements: to add own outlets selectively in the Klang Valley and East Malaysia where the brand is established; to

grow the sub-franchised network in the East Coast and Northern regions, where royalty income can be added without capital expenditure; and to raise central kitchen utilisation, currently at 64 per cent., since incremental production volume converts to margin at a high rate. The Issuer does not intend to acquire additional brands or to operate outside Malaysia.

3. CORPORATE STRUCTURE, SHAREHOLDING AND GOVERNANCE

3.1 Group structure

The Issuer holds the master franchise rights and operates the Peninsular Malaysia outlets directly. The central kitchen premises and the East Malaysia operations are held through subsidiaries.

Subsidiary / associate	Effective interest	Principal activity
Sajian Dapur Sdn Bhd	100%	Ownership of the central kitchen premises and production of sauces, marinades and prepared components
Sajian Timur Sdn Bhd	70%	Operation of the six Sabah and Sarawak outlets
Sajian Francais Sdn Bhd	100%	Administration of sub-franchise agreements, territory grants and royalty collection
Warisan Katering Sdn Bhd	100%	Corporate catering and event services

3.2 Shareholding of the Issuer

The issued share capital of the Issuer is RM8,000,000 comprising 160,000,000 ordinary shares of RM0.05 each. The shares are listed on the ACE Market of Bursa Malaysia under the stock code SAJIAN, with a market capitalisation of RM68.4 million as at 30 June 2026.

Shareholder	Ordinary shares held	%
Warisan Ventures Sdn Bhd	48,000,000	30.0
Rosli bin Hamid	27,200,000	17.0
Siti Aminah binti Rosli	9,600,000	6.0
Public shareholders (ACE Market)	68,800,000	43.0
Directors other than the above	6,400,000	4.0
Total	160,000,000	100.0

3.3 Board of Directors

The Board comprises six members, of whom three are independent non-executive directors, in accordance with the ACE Market Listing Requirements.

Name	Age	Designation	Appointed
Dato' Yusof bin Abdul Karim	62	Independent Non-Executive Chairman	February 2021
Rosli bin Hamid	54	Group Managing Director	June 2015
Siti Aminah binti Rosli	31	Executive Director, Brand and Marketing	March 2022
Tan Chee Hong	48	Executive Director and Chief Financial Officer	August 2021
Kavitha a/p Ramasamy	45	Independent Non-Executive Director	February 2021
Ng Wei Lun	51	Independent Non-Executive Director	January 2024

3.4 Key management

The senior management team is small, as is usual for an issuer of this size.

Name	Position	Relevant experience
Rosli bin Hamid	Group Managing Director	Founder; 26 years in food service; negotiated and holds the master franchise relationship personally.
Tan Chee Hong	Chief Financial Officer	Chartered accountant with 19 years' experience, including six in listed food and beverage.
Siti Aminah binti Rosli	Director, Brand and Marketing	8 years in brand management and digital channel operations.
Mohd Faizal bin Sulaiman	Head of Operations	17 years in multi-outlet restaurant operations and franchise compliance.
Chef Anand Suresh	Head of Product and Central Kitchen	22 years in commercial kitchen management and product development.

3.5 Corporate governance

The Board of Directors of the Issuer is responsible for the overall stewardship of the Group, including the approval of strategy and annual budgets, the oversight of risk management and internal control, the approval of material capital commitments and financing arrangements, and the integrity of financial reporting. The Board meets at least quarterly and on such other occasions as the business of the Group

requires.

The Board is supported by three standing committees. The Audit and Risk Committee, comprising a majority of independent directors and chaired by an independent director, reviews the financial statements before submission to the Board, oversees the internal audit function and the relationship with the external auditors, and monitors the principal risks of the Group and the adequacy of mitigating controls. The Nomination and Remuneration Committee reviews the composition and effectiveness of the Board and the remuneration framework for directors and senior management. The Board Investment Committee reviews material capital expenditure, acquisitions and financing proposals before they are submitted to the Board.

The Group maintains an internal audit function which reports functionally to the Audit and Risk Committee and administratively to the chief executive. The internal audit plan is approved annually by the Audit and Risk Committee and is prepared on a risk-based methodology covering the principal operating and financial processes of the Group. The Group also maintains a whistleblowing policy under which employees and third parties may report suspected improprieties directly to the chairman of the Audit and Risk Committee.

For so long as the Sukuk remain outstanding, the Issuer has undertaken to maintain a Board comprising not fewer than five directors, of whom at least two shall be independent, and to procure that the Audit and Risk Committee continues to be chaired by an independent director.

The founding family holds 53 per cent. of the voting shares and two of the six board seats. Investors should note that the Issuer is a controlled company and that minority shareholders, and by extension unsecured creditors, depend on the independent directors and on the ACE Market related party transaction rules for protection. The Issuer leases two outlet premises from a company connected to the Managing Director; both leases were the subject of independent valuation and shareholder approval, and the terms are disclosed in the annual report.

4. TERMS OF THE SUKUK

This section summarises the principal terms and conditions of the Sukuk. It is a summary only and is qualified in its entirety by the detailed provisions of the Trust Deed, the Programme Agreement and the Shariah pronouncement and the other Transaction Documents, copies of which are available for inspection at the registered office of the Issuer during normal business hours.

4.1 Summary of principal terms

Issuer	Sajian Warisan Bhd
Instrument	Sukuk Murabahah issued under the Sukuk Programme of the Issuer and distributed through the Tokenkan platform
Shariah principle	Murabahah, effected through a Tawarruq arrangement in Shariah-compliant commodities
Programme size	RM20,000,000 in nominal value
Principal amount of this issuance	RM4,000,000
Issue price	100.00 per cent. of nominal value
Denomination	RM1,000 nominal value per unit, tradable in minimum blocks of RM250,000 nominal value
Tenure	3 years from the issue date
Issue date	15 September 2026
Maturity date	15 September 2029
Profit rate	7.40 per cent. per annum, fixed for the full tenure
Profit payment frequency	Semi-annually in arrears
Profit payment dates	15 March and 15 September
Day count fraction	Actual/365 (Fixed)
Maturity structure	Bullet repayment of the full nominal value on the maturity date
Redemption at maturity	At 100 per cent. of the nominal value, together with accrued and unpaid profit up to but excluding the maturity date
Security	Secured by a first-ranking charge over the central kitchen premises and a debenture over the assets of the Issuer
Ranking	Senior secured; ranking ahead of unsecured creditors to the extent of the security, and pari passu among holders
Credit rating	Unrated by no rating agency has been appointed, with a not applicable outlook
Form	Scripless, prescribed under the Real Time Electronic Transfer of Funds and Securities System (RENTAS)
Listing status	Not listed on any stock exchange; reported on the Electronic Trading Platform
Governing law	Laws of Malaysia
Shariah adviser	Ibnu Hakim Shariah Advisory Sdn Bhd

4.2 Principal amount and denomination

The Issuer proposes to issue RM4,000,000 in nominal value of Sukuk under the Sukuk Murabahah Programme. The Sukuk will be issued in denominations of RM1,000 nominal value per unit. Trading in the secondary market shall be in minimum blocks of RM250,000 nominal value or such other amount as may be prescribed by the operator of RENTAS from time to time.

The Sukuk constitute direct obligations of the Issuer. They are offered through the Tokenkan platform in fractional interests, and are accordingly available to investors who have completed the suitability assessment operated by the platform, including individual investors. Prospective investors should note that eligibility to subscribe is determined by the platform operator in accordance with the requirements applicable to it, and that this document is a disclosure document rather than an invitation extended generally to the public.

4.3 Profit rate and payment

The Sukuk carry a profit rate of 7.40 per cent. per annum on the nominal value, fixed for the full tenure of three years. The semi-annual profit amount is RM148,000 on the full issue, equivalent to RM3.70 per RM100 of nominal value held. Under the Murabahah structure the aggregate profit is fixed and determined at the outset as part of the deferred sale price owed by the Issuer, and does not vary with the trading performance of the Issuer.

Profit payments shall be made in arrears on the profit payment dates specified above. Where a profit payment date falls on a day which is not a business day, payment shall be made on the immediately succeeding business day without any adjustment to the amount payable, in accordance with the Following Business Day Convention (unadjusted).

The following table sets out the indicative profit payment schedule for the issuance, assuming the full nominal amount remains outstanding throughout the tenure and no early redemption occurs.

Period	Profit payment date	Indicative payment (RM'000)
Period 1	15 March 2027	148
Period 2	15 September 2027	148
Period 3	15 March 2028	148
Period 4	15 September 2028	148
Period 5	15 March 2029	148
Period 6 (final)	15 September 2029	4,148 (including nominal value of 4,000)

The schedule above is indicative only. Actual amounts payable will be computed on an Actual/365 (Fixed) basis by reference to the number of days in each profit period.

4.4 Maturity structure

The Sukuk are structured as a single bullet maturity. The full nominal value of RM4,000,000 falls due on 15 September 2029 together with the final profit payment. The Issuer intends to meet this from accumulated operating cash flow and, if required, from refinancing secured on the central kitchen premises. Investors should note that free cash flow after capital expenditure was RM400,000, RM700,000 and RM1,200,000 in the three years under review, so accumulated cash alone would not retire the issue and refinancing is expected to be required.

4.5 Early redemption

The Sukuk incorporate the following early redemption provisions:

Optional early redemption (call)

The Issuer may, on any profit payment date falling on or after the second anniversary of the issue date, redeem all but not part only of the Sukuk on not less than thirty days' notice, at 101.00 per cent. of nominal value together with accrued and unpaid profit.

Mandatory redemption on loss of the master franchise

The Issuer operates under a master franchise agreement for the principal brand described in Section 2.2. If that agreement is terminated, or expires without renewal on substantially equivalent terms, the Issuer shall redeem the Sukuk at nominal value together with accrued profit within one hundred and twenty days. Investors should read this together with Section 7.2, since this is the single event most likely to end the business.

Redemption following a change of control

Upon a change of control, being an event whereby Encik Rosli bin Hamid and Warisan Ventures Sdn Bhd cease collectively to hold, directly or indirectly, more than forty per cent. of the voting shares of the Issuer, each Sukukholder may require redemption at nominal value together with accrued profit within sixty days.

Redemption for taxation or Shariah reasons

The Issuer may redeem all but not part only of the Sukuk at nominal value together with accrued profit if a change in Malaysian tax law obliges it to pay additional amounts, or if the Shariah Adviser determines the structure has ceased to be Shariah compliant and the deficiency is not remedied within ninety days.

No investor put

Save on a change of control, investors have no right to require redemption before maturity. Exit before maturity is available only through the Anchor Investor standing bid described in Section 9.5.

4.6 Security and collateral

Unusually for a small issue, and deliberately, these Sukuk are secured. The Platform required security as a condition of originating an unrated issue for retail distribution, and investors should understand both what the security is and what it is likely to be worth.

The security comprises:

- a first-ranking charge over the central kitchen premises at Kawasan Perindustrian Selayang, a freehold industrial property valued at RM11.4 million by the Independent Valuer in June 2026 on an existing use basis;
- a debenture creating fixed and floating charges over the present and future assets of the Issuer, including outlet fit-out, kitchen equipment and inventories;
- an assignment of the franchise fee and royalty receivables due from sub-franchisees, which generated RM8.2 million in FY2025, into a designated account under the control of the Trustee following an event of default; and
- a corporate guarantee from Warisan Ventures Sdn Bhd, the controlling shareholder.

What the security is realistically worth

The charge over the central kitchen is the substantive protection, at RM11.4 million against RM4.0 million of Sukuk. Investors should note, however, that the property is charged behind existing Islamic term financing of RM7.2 million drawn on the same premises. The Sukuk therefore rank second on that asset, and the equity available to Sukukholders on a forced sale is the excess of realisable value over RM7.2 million. On the June 2026 valuation that excess is RM4.2 million, which covers the issue, but a forced-sale discount of the order commonly seen on single-purpose industrial property would materially erode it.

The debenture over outlet assets is worth considerably less than its book value suggests. Fit-out in a leased restaurant unit has little realisable value once removed, and kitchen equipment sells at a substantial discount. Investors should not treat the RM54.8 million carrying value of property, plant and equipment as an indication of recoverable security.

4.7 Ranking of investors

The Sukuk constitute direct, unconditional and unsubordinated obligations of the Issuer, secured as described in Section 4.6 and ranking pari passu among themselves.

To the extent of the security, the Sukuk rank ahead of the unsecured creditors of the Issuer. On the central kitchen premises specifically, the Sukuk rank behind existing Islamic term financing of RM7.2 million charged on the same property.

In respect of any shortfall not recovered from the security, Sukukholders would rank as unsecured creditors, behind the costs of a winding-up and preferential claims including employee entitlements. The Issuer employed 486 persons as at 31 December 2025, so preferential employee claims would be significant relative to the size of this issue.

Landlords hold statutory and contractual rights in respect of leased outlet premises which rank ahead of the floating charge in respect of assets at those premises.

Fractional interests held through the Platform rank equally with whole units, and equally with the allocation of the Anchor Investor.

4.8 Covenants

The Trust Deed contains positive, negative and financial covenants customary for an issuance of this nature. The principal financial covenants, to be tested semi-annually by reference to the audited consolidated financial statements of the Issuer and, where applicable, its unaudited semi-annual management accounts, are as follows:

Financial covenant	Required level	Position as at 31 December 2025
Gross gearing ratio (total financing to total equity)	Not more than 2.25 times	1.39 times
Total financing to EBITDA	Not more than 4.00 times	2.5 times
EBITDA to finance costs	Not less than 2.00 times	3.50 times
Consolidated shareholders' funds	Not less than RM15.0 million	RM23.0 million
Security cover (charged property value to Sukuk outstanding)	Not less than 1.50 times	1.05 times net of prior charge

The principal negative covenants restrict the Issuer from, among other things: (a) creating or permitting to subsist any security interest over its assets other than permitted security; (b) disposing of a material part of its assets otherwise than on arm's length terms in the ordinary course of business; (c) undertaking any substantial change to the general nature of its business; (d) entering into any amalgamation, demerger, merger or corporate reconstruction which would have a material adverse effect; and (e) declaring or paying any dividend or making any distribution where an event of default is continuing or would result from such payment.

4.9 Events of default

The occurrence of any of the following shall constitute an event of default, subject to the grace periods specified in the Trust Deed: non-payment of any amount due under the Sukuk within seven business days of the due date; breach of any financial covenant; breach of any other obligation which is not remedied within thirty days of notice; cross-default in respect of any other financial indebtedness of the Issuer or any material subsidiary exceeding RM25.0 million in aggregate; the commencement of insolvency, winding-up or receivership proceedings; the cessation or material change of business; the invalidity or unenforceability of any Transaction Document; and the occurrence of any event having a material adverse effect on the ability of the Issuer to perform its payment obligations.

Upon the occurrence of an event of default which is continuing, the Trustee may, and shall if so directed by an extraordinary resolution of the Sukukholders, declare the Sukuk to be immediately due and payable at their nominal value together with accrued and unpaid profit.

4.10 Roles and parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Shariah Adviser	Ibnu Hakim Shariah Advisory Sdn Bhd
Auditor	Cheong Rahmat & Co. PLT
Solicitors	Zulkarnain Hew & Co.
Anchor Investor	Meridian Credit Opportunities Fund I, a professional credit fund managed by Meridian Capital Partners Sdn Bhd

5. USE OF PROCEEDS

5.1 Summary of application

The gross proceeds of RM4,000,000 are to be applied as set out below. The Issuer confirms that the proceeds will not be applied to any activity which is not Shariah compliant.

Application	Amount (RM'000)	Proportion	Expected timing
Fit-out of six new outlets	2,240	56.0%	Q1 2027 to Q2 2028
Central kitchen equipment upgrade	780	19.5%	Q4 2026 to Q3 2027
Refinancing of existing equipment financing	620	15.5%	Within 30 days of issue
Working capital	180	4.5%	As required
Expenses of the offering (see 5.2)	180	4.5%	On issue
Total gross proceeds	4,000	100.0%	

5.2 Expenses of the offering, including Platform fees

This offering is originated on the Tokenkan platform rather than arranged by an investment bank, and the fee structure differs from that of a conventional issuance. It is set out in full below, because the economic case for this offering rests on that difference and investors are entitled to test it.

The Platform charges the Issuer a tiered origination and listing fee, at 2.5 per cent. of nominal value for issues of RM1 million to RM5 million, 1.5 per cent. from RM5 million to RM10 million and 1.0 per cent. above RM10 million, subject in each case to a minimum of RM25,000. This issue falls in the 2.5 per cent. tier, giving a fee of RM100,000.

Payee	Amount (RM'000)	Basis
Tokenkan Capital Sdn Bhd - origination and listing fee	100	2.5% of nominal value (RM1m-RM5m tier)
Trustee - acceptance and annual fees (3 years)	30	Fixed
Solicitors	22	Fixed
Shariah Adviser	18	Fixed
Reporting accountants and Independent Valuer	10	Fixed
Total charged against proceeds	180	

The total cost of this issuance is RM180,000, being 4.50 per cent. of nominal value. Investors should compare this against the fixed cost of a conventional issuance, which the Issuer estimates at RM1.4 million to RM1.9 million irrespective of size once rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are aggregated. On an issue of RM4,000,000 a conventional cost base of that order would consume between 35 per cent. and 48 per cent. of the proceeds, which is the reason this issuance would not otherwise have taken place.

Fees charged to investors

Investors pay no fee on subscription. The Platform charges a transaction fee of 1.0 per cent. on every purchase and on every sale executed through it, including a sale into the standing bid described in Section 9.5. On a subscription of RM200 the fee is RM2.

Investors should note the effect of this on a short holding period. An investor who subscribes and later sells into the standing bid pays 1.0 per cent. on the way in and 1.0 per cent. on the way out, and bears the standing bid discount described in Section 9.5 in addition. Round-trip cost is therefore material relative to a single periodic distribution, and this instrument is not suited to short-term trading.

5.3 Description of each application

Six new outlets

RM2.24 million will fund the fit-out of six new own outlets, at an average of RM373,000 each, comprising kitchen equipment, furniture, signage, air conditioning and point-of-sale systems. Three sites in the Klang Valley have been identified and are in lease negotiation; the remaining three have not.

Investors should note two points. First, site selection is the largest single determinant of whether a restaurant succeeds, and half the sites are not yet chosen. Second, a new outlet carries full rent and staffing from the day it opens against sales that build over several months; the Issuer budgets four to seven months to monthly contribution breakeven, and its record over the review period was nine of eleven outlets meeting target within twelve months, one below target, and one closed at a write-off of RM420,000.

Central kitchen equipment

RM780,000 will fund a second sauce production line, upgraded blast chilling capacity and cold storage expansion at the Selayang premises. Central kitchen utilisation is currently 64 per cent., and management expects this investment to raise capacity sufficiently to supply approximately 30 additional outlets across both networks without further capital expenditure. Because central kitchen margin is earned on volume from sub-franchisees as well as own outlets, this is the element management expects to produce the highest return, and it does not depend on new outlet openings succeeding.

Refinancing

RM620,000 will prepay equipment financing carrying floating rates and maturing within eighteen months. This extends the weighted average maturity of financing from 3.1 years to 3.6 years and increases the fixed rate proportion from 58 to 68 per cent.

Working capital

RM180,000 will fund inventory and pre-opening costs at the new outlets.

5.4 Management of proceeds

Proceeds will be credited on the issue date to a Disbursement Account operated by the Issuer under the supervision of the Trustee. Withdrawals require a certificate of two authorised officers confirming the amount is required for an application in Section 5.1, supported by supplier invoices for equipment and fit-out, an executed lease for any outlet fit-out drawdown, and the redemption statement of the relevant financier for the refinancing.

Pending application, balances may be invested only in Shariah-compliant liquid instruments issued or guaranteed by the Government of Malaysia or licensed Malaysian financial institutions, of a tenure not exceeding three months.

The Issuer may reallocate up to ten per cent. of gross proceeds between the applications in Section 5.1 on notice to the Trustee. Any greater reallocation requires the approval of Sukukholders by extraordinary resolution.

The Issuer will report quarterly through the Platform on the application of proceeds, on outlet openings against plan, and on compliance with the covenants in Section 4.8.

5.5 If the offering is not fully subscribed

This offering is not underwritten. The Anchor Investor has committed to its allocation of RM2,600,000 but will not absorb any part of the retail tranche which is not taken up.

The minimum level of subscription for the retail tranche is RM700,000, being half of it. If retail subscriptions fall below that level at the close of the offer period, the offering is withdrawn in its entirety, including the Anchor Investor allocation, and all subscription monies are returned in full within five business days without profit. Subscription monies are held in a segregated client account with a licensed Malaysian bank throughout the offer period and form no part of the assets of the Issuer or of the Platform.

If retail subscriptions reach RM700,000 but fall short of RM1,400,000, the offering proceeds at the amount raised. The Issuer will then apply the reduced proceeds in the following order: the expenses of the offering; the refinancing; the central kitchen equipment; then outlet fit-out, with the number of new outlets reduced accordingly. The profit rate does not change, and the security in Section 4.6 is granted in full irrespective of the amount raised, which improves security cover for those who do subscribe.

5.6 Expected effect

- six additional own outlets, opening progressively through 2027 and 2028;
- central kitchen capacity sufficient to supply approximately 30 further outlets across both networks;
- extension of the weighted average maturity of financing from 3.1 to 3.6 years;
- an increase in the fixed rate proportion of financing from 58 to 68 per cent.;
- gross gearing rising from 1.39 to 1.55 times and financing to EBITDA from 2.5 to 2.8 times, as set out in Section 6.5.

6. FINANCIAL INFORMATION

The financial information set out in this section has been extracted from the audited consolidated financial statements of the Issuer for the three financial years ended 31 December 2023, 2024 and 2025, which were prepared in accordance with Malaysian Financial Reporting Standards and the requirements of the Companies Act. The auditors of the Issuer, Cheong Rahmat & Co. PLT (AF 1264), issued unqualified audit opinions in respect of each of the three financial years presented.

Investors should read the financial information below together with the accompanying commentary and the risk factors set out in Section 7. Historical results are not necessarily indicative of results that may be expected for any future period.

6.1 Consolidated statements of comprehensive income

All amounts are stated in RM'000 unless otherwise indicated. Figures in parentheses denote negative amounts.

	FY2023	FY2024	FY2025
Revenue	38,200	44,600	51,800
Cost of sales	15,800	18,200	20,900
Gross profit	22,400	26,400	30,900
Other operating income	420	480	560
Administrative and other operating expenses	14,200	16,400	18,800
EBITDA	8,620	10,480	12,660
Depreciation and amortisation	3,200	3,600	4,100
Operating profit (EBIT)	5,420	6,880	8,560
Finance costs	2,860	3,240	3,620
Profit before taxation	2,560	3,640	4,940
Taxation	640	910	1,240
Profit for the financial year	1,920	2,730	3,700
EBITDA margin (%)	22.6	23.5	24.4
Net profit margin (%)	5.0	6.1	7.1

Revenue increased from RM38.2 million in FY2023 to RM44.6 million in FY2024 and RM51.8 million in FY2025, growth of 16.8 per cent. and 16.1 per cent. Growth came from outlet openings, from the addition of six sub-franchised territories, and from same-outlet sales growth of 4.2 per cent. and 3.8 per cent.

Gross profit increased from RM22.4 million to RM30.9 million and the gross margin from 58.6 per cent. to 59.7 per cent. EBITDA increased from RM8.62 million to RM12.66 million and the EBITDA margin from 22.6 per cent. to 24.4 per cent.

Investors should read these margins in context. A 24.4 per cent. EBITDA margin in food service is respectable, but it is calculated before the rent recognised within lease liabilities and depreciation of right-of-use assets, which under current accounting standards moves occupancy cost out of operating expenses. Occupancy is the largest fixed cost of the business and the reason a sales decline compresses earnings quickly, as described in Section 7.2.

Finance costs increased from RM2.86 million to RM3.62 million, reflecting both outlet financing and the profit element of lease liabilities. Profit for the financial year increased from RM1.92 million to RM3.70 million and the net margin from 5.0 per cent. to 7.1 per cent.

6.2 Consolidated statements of financial position

	FY2023	FY2024	FY2025
<i>NON-CURRENT ASSETS</i>			
Outlet fit-out, kitchen equipment and right-of-use assets	42,600	48,200	54,800
Deposits with landlords, deferred tax assets and franchise rights	3,800	4,200	4,600
<i>Total non-current assets</i>	<i>46,400</i>	<i>52,400</i>	<i>59,400</i>
<i>CURRENT ASSETS</i>			
Trade receivables from sub-franchisees and delivery platforms	2,400	2,800	3,200
Food, beverage and packaging inventories	3,600	4,100	4,700
Prepayments, deposits and other current assets	1,800	2,000	2,300
Cash and bank balances	6,200	7,400	9,100
<i>Total current assets</i>	<i>14,000</i>	<i>16,300</i>	<i>19,300</i>
TOTAL ASSETS	60,400	68,700	78,700
<i>EQUITY</i>			
Share capital	8,000	8,000	8,000
Reserves and retained earnings	7,400	10,500	15,000
<i>Total equity</i>	<i>15,400</i>	<i>18,500</i>	<i>23,000</i>
<i>NON-CURRENT LIABILITIES</i>			
Islamic financing – non-current	22,000	24,000	26,000
Lease liabilities and employee benefit provisions	8,200	9,400	10,600
<i>Total non-current liabilities</i>	<i>30,200</i>	<i>33,400</i>	<i>36,600</i>
<i>CURRENT LIABILITIES</i>			
Islamic financing – current	4,800	5,400	6,000
Trade payables and accruals	6,800	7,800	9,000
Other payables, deferred franchise income and taxation	3,200	3,600	4,100
<i>Total current liabilities</i>	<i>14,800</i>	<i>16,800</i>	<i>19,100</i>
<i>Total liabilities</i>	<i>45,000</i>	<i>50,200</i>	<i>55,700</i>
TOTAL EQUITY AND LIABILITIES	60,400	68,700	78,700

Total assets increased from RM60.4 million to RM78.7 million over the review period. Outlet fit-out, kitchen equipment and right-of-use assets stood at RM54.8 million as at 31 December 2025, being 69.6 per cent. of total assets.

Investors should not read that figure as security value. A substantial part of it comprises right-of-use assets, which are an accounting recognition of leased premises rather than an owned asset capable of realisation, and outlet fit-out, which has minimal value once removed from the premises. The realisable asset of substance is the central kitchen premises, addressed in Section 4.6.

Total equity increased from RM15.4 million to RM23.0 million through retained earnings. Share capital was unchanged at RM8.0 million. Total financing increased from RM26.8 million to RM32.0 million.

Gross gearing improved from 1.74 times to 1.39 times and financing to EBITDA from 3.1 times to 2.5 times. Gearing of this order is high in absolute terms and reflects a business that funds leasehold fit-out with debt; investors should weigh it against the covenanted maximum of 2.25 times, which leaves less headroom than the current figure suggests once the pro forma effect in Section 6.5 is applied.

The current ratio was 0.95, 0.97 and 1.01 times. A restaurant group collects cash at the point of sale and pays suppliers on terms, so a current ratio around one is normal and is not in itself a liquidity concern.

6.3 Consolidated statements of cash flows (summary)

	FY2023	FY2024	FY2025
Net cash generated from operating activities	7,200	8,600	10,400
Net cash used in investing activities	(6,800)	(7,900)	(9,200)
Net cash from/(used in) financing activities	(100)	500	500
<i>Net increase/(decrease) in cash and cash equivalents</i>	<i>300</i>	<i>1,200</i>	<i>1,700</i>
Cash and cash equivalents at beginning of year	5,900	6,200	7,400
Cash and cash equivalents at end of year	6,200	7,400	9,100

Sajian Warisan Bhd | Sukuk Murabahah | RM4,000,000 | Unrated | Originated on Tokenkan Page 15 of 27

Net cash generated from operating activities increased from RM7.2 million in FY2023 to RM10.4 million in FY2025, with conversion

against EBITDA of 83.5, 82.1 and 82.1 per cent. Conversion is high because sales are settled immediately while suppliers are paid on terms.

Net cash used in investing activities of RM6.8 million, RM7.9 million and RM9.2 million comprises outlet fit-out for new openings, refurbishment of existing outlets on a rolling cycle, and central kitchen equipment.

Investors should attend to the resulting free cash flow, of RM400,000, RM700,000 and RM1.2 million. The Issuer consumes almost all of its operating cash flow in maintaining and expanding its outlet estate, which is characteristic of the sector and which is the reason this issue is expected to require refinancing at maturity rather than repayment from accumulated cash.

6.4 Selected financial ratios

Ratio	FY2023	FY2024	FY2025
EBITDA margin (times revenue, %)	22.6	23.5	24.4
Return on equity (%)	12.5	14.8	16.1
Total borrowings (RM'000)	26,800	29,400	32,000
Net debt (RM'000)	20,600	22,000	22,900
Gross gearing (times)	1.74	1.59	1.39
Net gearing (times)	1.34	1.19	1.00
Total borrowings / EBITDA (times)	3.1	2.8	2.5
EBITDA / finance costs (times)	3.0	3.2	3.5
Current ratio (times)	0.95	0.97	1.01

Gross gearing improved from 1.74 to 1.39 times against a covenanted maximum of 2.25 times, and would be 1.55 times on a pro forma basis following this issue.

Financing to EBITDA improved from 3.1 to 2.5 times against a covenanted maximum of 4.00 times, and would be 2.8 times pro forma. EBITDA cover of finance costs improved from 3.0 to 3.5 times against a covenanted minimum of 2.00 times.

Investors should test these against a downturn rather than against FY2025. A fifteen per cent. decline in same-outlet sales, with occupancy and staff costs unchanged, would reduce EBITDA to approximately RM7.9 million. On the pro forma financing of RM35.4 million that gives financing to EBITDA of approximately 4.5 times, above the covenanted maximum, and EBITDA cover of finance costs of approximately 2.0 times, at the covenanted minimum. A downturn of that magnitude would therefore put the Issuer in breach.

Return on equity improved from 12.5 to 16.1 per cent., which is high and reflects the small equity base rather than exceptional profitability.

6.5 Pro forma effect of the issuance

The table below illustrates the effect of the issuance on the consolidated statement of financial position of the Issuer as at 31 December 2025, on the assumption that the issuance had been completed on that date and that the proceeds were applied in the manner described in Section 5. The pro forma information is presented for illustrative purposes only and does not purport to represent the actual financial position of the Issuer following the issuance.

	Audited as at 31 December 2025	Pro forma after issuance
Cash and bank balances	9,100	12,300
Total assets	78,700	81,900
Total financing	32,000	35,380
Total liabilities	55,700	59,080
Total equity	23,000	22,820
Gross gearing (times)	1.39	1.55
Total financing / EBITDA (times)	2.5	2.8

The pro forma assumes gross proceeds of RM4.0 million, application of RM620,000 to prepayment of existing equipment financing within thirty days of issue, and RM180,000 of offering expenses charged against equity.

Gross gearing would rise from 1.39 to 1.55 times and financing to EBITDA from 2.5 to 2.8 times, both within covenant. Headroom against the gearing covenant reduces from 0.86 times to 0.70 times.

The pro forma reflects no contribution from the six new outlets, which are expected to open progressively through 2027 and 2028 and to reach contribution targets, if they do, within twelve months of opening. Distributions on this issue are payable from March 2027.

6.6 Existing borrowings

As at 31 December 2025, the total borrowings of the Group amounted to RM32.0 million, comprising the facilities summarised below. The Issuer confirms that it has not defaulted on any payment of principal or profit in respect of any of its borrowings during the three financial years under review.

Facility	Outstanding (RM'000)	Maturity profile
Islamic term financing – central kitchen premises (secured, at subsidiary level)	7,200	Semi-annual instalments to 2034
Islamic term financing – outlet fit-out and equipment (secured)	14,400	Monthly instalments to 2031
Revolving and working capital financing (unsecured)	4,400	Annual review
Current portion of financing and revolving credit	6,000	Within 12 months
Total financing	32,000	

7. RISK FACTORS

Before making an investment decision, prospective investors should carefully consider all the information contained in this document, including in particular the risk factors set out below. The risks described are those which the Issuer currently considers material. They are not exhaustive, and additional risks not presently known to the Issuer, or which the Issuer currently considers immaterial, may also impair its business, financial condition and ability to meet its obligations under the Sukuk.

If any of the following risks materialises, the business, financial condition, results of operations and prospects of the Issuer could be materially and adversely affected. In such circumstances, the Issuer may be unable to pay profit on, or repay the nominal value of, the Sukuk, and investors may lose part or all of their investment.

7.1 Risks relating to the Issuer and the Sukuk

Credit risk

The Sukuk represent unsecured or, where applicable, secured obligations of the Issuer alone. Payment of profit and the repayment of the nominal value depend entirely upon the ability of the Issuer to generate sufficient cash flow from its operations, or to obtain sufficient funds from other sources, at the relevant times. Neither the Trustee, the Platform through which this offering was originated and distributed, nor any other party has guaranteed or assumed any obligation in respect of the payment obligations of the Issuer. In particular, investors should note that this offering was not underwritten and that no arranger stands behind it.

A deterioration in the operating performance of the Issuer, an adverse change in its capital structure, the loss of one or more significant customers or contracts, or an unexpected increase in its cost base could impair its ability to service the Sukuk. As at 31 December 2025, the Group had total borrowings of RM32.0 million against total equity of RM23.0 million, representing a gross gearing ratio of 1.39 times and total borrowings to EBITDA of 2.5 times.

Refinancing risk

The Sukuk are repayable in a single bullet payment at maturity, and the Issuer does not expect to accumulate a sinking fund sufficient to retire the full nominal amount from operating cash flow alone. The Issuer therefore expects to refinance all or a substantial part of the Sukuk at or before maturity. The ability of the Issuer to refinance will depend on conditions in the Malaysian debt capital and bank loan markets at the relevant time, on its credit standing and rating at that time, and on investor appetite for the sector in which it operates. There is no assurance that refinancing will be available on acceptable terms, or at all.

Profit rate risk

The Sukuk carry a fixed profit rate. The market value of fixed-rate debt securities generally moves inversely with prevailing market yields: if benchmark yields, including the yields on Malaysian Government Securities and Government Investment Issues, rise after the issue date, the market value of the Sukuk is likely to fall. Investors who sell the Sukuk before maturity may therefore realise less than the nominal value, and in adverse conditions materially less. Investors who hold the Sukuk to maturity are not exposed to this price risk, but bear the opportunity cost of being locked into a fixed profit rate for the tenure of the instrument.

The Issuer is separately exposed to profit rate risk on its floating-rate bank borrowings, which are typically priced against the relevant cost of funds of the lending institutions. An increase in the Overnight Policy Rate set by the central bank would increase the finance costs of the Group and reduce the headroom available under its profit cover covenant.

Liquidity risk of the Sukuk

The Sukuk will not be listed or quoted on any stock exchange, and the Platform does not operate an order book. Operating a venue that matches buyers and sellers of capital market products would require registration as a Recognized Market Operator, which the Platform has not yet obtained. Exit before maturity is therefore available only through the standing bid maintained by the Anchor Investor at the published formula price described in Section 9.5. That bid is a contractual undertaking of a single counterparty, not a market. It is capped at RM70,000 of nominal value in aggregate in any calendar month, may be suspended in the circumstances set out in Section 9.5, and terminates if the Anchor Investor ceases to hold at least half of its original allocation. Peer-to-peer transfer between investors is intended to follow in phase two once Recognized Market Operator registration is obtained, but no date is committed and investors should not subscribe in reliance on it. An investor who may need the money before 15 September 2029 should treat this offering as unsuitable.

Liquidity and working capital risk of the Issuer

The Issuer requires liquidity to fund its operations, service its debt and meet its capital commitments. As at 31 December 2025, the Group held cash and bank balances of RM9.1 million and recorded a current ratio of 1.01 times. An unexpected lengthening of the collection cycle, the withdrawal of uncommitted banking lines, or a requirement to post additional performance security could strain the liquidity position of the Group.

Rating risk

No rating agency has been appointed and these Sukuk are unrated. Investors therefore have no independent professional opinion on the creditworthiness of the Issuer, no continuous surveillance of that opinion, and no downgrade signal to warn them of deterioration. On a rated issue, a rating agency reviews the credit at least annually and will place it on watch or downgrade it if conditions worsen, and that signal is public. Here there is no such mechanism. Investors depend instead on the semi-annual covenant compliance certificates delivered to the Trustee under Section 4.8, on the quarterly reporting the Issuer has undertaken to publish through the Platform, and on the continuing disclosure obligations to which the Issuer is subject as an ACE Market listed company. Those are materially less than a rating provides.

Subordination and structural risk

The Issuer operates its own outlets directly and holds the master franchise rights directly, so there is limited structural subordination of

the conventional kind. Two subsidiaries carry their own financing: Sajian Dapur Sdn Bhd, which owns the central kitchen premises and is the borrower under the RM7.2 million term financing charged on it, and Sajian Timur Sdn Bhd, which operates the East Malaysia outlets. In an insolvency of Sajian Dapur Sdn Bhd, the holder of that RM7.2 million charge would be satisfied out of the premises before Sukukholders, notwithstanding that the Sukuk are also secured on the same asset. The Issuer has guaranteed RM2.4 million of subsidiary financing, which would rank alongside any unsecured shortfall on the Sukuk if called.

Enforcement risk

In the event of a default, the ability of the Trustee to enforce on behalf of Sukukholders may be constrained by the time and cost of legal proceedings in Malaysia, by the availability and realisable value of any security, by the rights of preferential and secured creditors ranking ahead of the Sukuk, and by the terms of any court-sanctioned scheme of arrangement or judicial management order to which the Issuer may become subject. Recoveries following enforcement may be substantially less than the nominal value of the Sukuk and may be received only after considerable delay.

Modification and sukukholders decisions

The Trust Deed provides for meetings of Sukukholders to consider matters affecting their interests generally. Resolutions passed by the requisite majority at a duly convened meeting bind all Sukukholders, including those who did not attend or vote and those who voted against the resolution. The Trustee is also empowered, without the consent of Sukukholders, to agree to modifications of a formal, minor or technical nature or which are made to correct a manifest error.

7.2 Risks relating to the industry and operations of the Issuer

Dependence on a single master franchise agreement

The Issuer operates its principal brand under a master franchise agreement for Malaysia granted by an overseas franchisor, with a remaining term of six years and one renewal option exercisable at the discretion of the franchisor. That agreement is the foundation of the business: it confers the brand, the recipes, the operating system and the right to sub-franchise.

Termination would end the greater part of the business. The agreement is terminable by the franchisor for breach of operating standards, failure to meet minimum outlet targets, or insolvency of the Issuer, and the Issuer has received one formal notice of non-compliance during the review period, relating to store standards at two outlets, which was remedied within the cure period.

The Sukuk carry a mandatory redemption on loss of the master franchise, described in Section 4.5, but investors should understand that a mandatory redemption obligation is only as good as the ability of the Issuer to pay it, which in that scenario would be doubtful.

Fixed occupancy and staff cost against variable sales

Restaurant economics are unforgiving in a downturn. Rent under outlet leases is fixed for the lease term, staff must be rostered to cover opening hours regardless of footfall, and depreciation on fit-out continues whether an outlet is busy or empty. Sales, by contrast, move with consumer spending, weather, competing openings and the fortunes of the mall or street the outlet sits in.

The Issuer operates 34 own outlets under leases with a weighted average remaining term of 3.4 years. Occupancy and staff costs together represented 61.8 per cent. of own-outlet revenue in FY2025. A decline of fifteen per cent. in same-outlet sales, which is well within the range observed in Malaysian food service during periods of weak consumer sentiment, would eliminate the greater part of own-outlet contribution.

Input cost inflation

Food input costs are volatile and largely outside the control of the Issuer. Chicken, cooking oil, flour, dairy and packaging have all seen double-digit swings in Malaysia over the past five years, some of them driven by import dependence and exchange rates rather than domestic conditions.

Menu prices cannot be raised freely in response. Price increases in the mid-market segment in which the Issuer operates provoke immediate volume loss, and franchise agreements constrain pricing latitude. The gross margin of the Issuer improved from 58.6 per cent. to 59.7 per cent. over the review period, but that improvement reflects scale in central kitchen purchasing rather than pricing power and would reverse under input cost pressure.

Delivery platform dependence and commission

Delivery channels contributed 28.4 per cent. of own-outlet revenue in FY2025. Delivery aggregators charge commissions in the range of twenty to thirty per cent. of order value, which is materially higher than the contribution margin on a dine-in order, so delivery revenue is considerably less profitable than its headline suggests.

The Issuer has no negotiating leverage over commission rates and no control over the algorithms determining its visibility on those platforms. A commission increase, or a reduction in placement, would affect revenue directly. Concentration on a small number of aggregators compounds this.

Sub-franchisee failure and royalty default

Franchise fees, royalties and central kitchen sales to 22 sub-franchisees contributed RM12.4 million in FY2025 and are the income stream assigned to the Trustee as security. That income depends on sub-franchisees remaining solvent and trading.

Sub-franchisees are typically individuals or small partnerships with limited capital, and three ceased operating during the review period. Recovery of amounts owed by a failed sub-franchisee is generally poor, and the Issuer bears the cost of either finding a replacement operator or writing off the territory.

Expansion execution on the six new outlets

The proceeds of this issue fund six new outlets. New outlets carry site selection risk, which is the largest single determinant of whether a

restaurant succeeds and cannot be assessed reliably in advance, together with fit-out cost overrun, licensing delay and a ramp period during which the outlet carries full rent and staffing against partial sales.

The Issuer opened eleven outlets over the review period, of which nine met their contribution targets within twelve months, one is trading below target, and one at Kota Bharu was closed within eighteen months at a write-off of RM420,000. Investors should assume a comparable failure rate on the six outlets funded here.

Small company and key person risk

The Issuer has a market capitalisation of RM68.4 million and shareholders' funds of RM23.0 million. A company of this size has limited capacity to absorb an adverse event, no meaningful access to institutional debt markets, and depends heavily on a small number of individuals.

Encik Rosli bin Hamid founded the business, negotiated the master franchise, and retains the franchisor relationship personally. His departure would create both an operational gap and a question over the franchise relationship itself.

7.3 Regulatory and compliance risks

Changes in law, regulation and government policy

The Issuer requires food premises licences and hygiene certification from local authorities for every outlet and for the central kitchen. Suspension of a licence closes the affected premises immediately, and a serious hygiene finding at the central kitchen would interrupt supply to all outlets and to sub-franchisees simultaneously.

Halal certification from JAKIM is fundamental to the business, since the customer base and the Shariah compliance of these Sukuk both depend on it. Certification is subject to periodic audit covering sourcing, storage, preparation and staff training. Loss or suspension of certification at the central kitchen would be materially damaging and would additionally raise a Shariah compliance question in respect of these Sukuk.

As an ACE Market listed issuer the Issuer is subject to the Bursa Malaysia ACE Market Listing Requirements, including continuing disclosure obligations, the requirement to retain a Sponsor for the prescribed period, and financial condition provisions under which a company falling into prescribed criteria may be classified as a distressed listed issuer.

Employment law obligations, including minimum wage, overtime, foreign worker levies and the requirement to comply with the Employees Minimum Standards of Housing and Amenities Act in respect of accommodated workers, apply extensively to a business employing 486 people, a significant proportion of whom are foreign nationals in kitchen and service roles.

Food labelling, nutritional disclosure and price display requirements apply to menu presentation, and changes to sugar or sodium taxation have affected beverage pricing in Malaysia and may do so again.

Foreign worker policy directly constrains the Issuer. Restrictions on recruitment quotas or source countries, or increases in levies, affect both the cost and the feasibility of staffing outlets, and the Issuer has previously delayed an outlet opening for want of approved staff.

Taxation

Statements in this document concerning taxation are based on the laws and practice in force at the date of this document. Changes in tax legislation, in the interpretation or administration of tax legislation by the Inland Revenue Board, or in the availability of incentives currently enjoyed by the Group could increase the effective tax rate of the Group and reduce the cash flow available for debt service. Prospective investors should consult their own tax advisers as to the tax consequences of acquiring, holding and disposing of the Sukuk.

Anti-money laundering and sanctions

The Group is subject to anti-money laundering, counter-terrorism financing and sanctions regimes applicable in Malaysia and in the jurisdictions in which it operates or into which it sells. A failure by the Group or its counterparties to comply with these regimes could result in fines, restrictions on banking relationships and reputational damage.

7.4 Operational risks

Dependence on key personnel

The performance of the Group depends to a significant extent on the continued service of its senior management team and of technical and operational personnel with specialised experience. Competition for such personnel in Malaysia is intense. The loss of one or more members of senior management, or an inability to attract and retain suitably qualified staff, could disrupt operations and impair the ability of the Group to execute its strategy.

Information technology and cyber security

The Group relies on information technology systems for its operational, financial and customer-facing processes. A material failure of these systems, a successful cyber intrusion, a ransomware incident or a breach of personal data protected under applicable data protection legislation could interrupt operations, expose the Group to regulatory penalties and civil claims, and damage its reputation.

Insurance

The Group maintains insurance cover which it considers appropriate for its operations, including property damage, business interruption, public liability and, where relevant, contractors' all risks cover. However, such cover is subject to policy limits, deductibles and exclusions, and certain risks are not commercially insurable. A loss which is uninsured, underinsured or excluded could have a material adverse effect on the financial condition of the Group.

Litigation and disputes

The Group is, from time to time, party to claims and disputes arising in the ordinary course of business. As at the date of this document, the

Directors are not aware of any pending or threatened litigation which, if determined adversely, would have a material adverse effect on the financial condition of the Group. There is no assurance that material claims will not arise in future.

Related party transactions

The Group enters into transactions with related parties in the ordinary course of business. Although the Directors are of the view that such transactions are conducted on arm's length terms and on a basis not more favourable to the related party than to an unrelated third party, there is a risk that the terms of such transactions may differ from those which could be obtained from independent parties.

7.5 Forward-looking statements

This document contains forward-looking statements, including statements regarding the intentions, beliefs and current expectations of the Issuer concerning its results of operations, financial condition, liquidity, prospects, growth and strategy. Words such as anticipates, believes, estimates, expects, intends, may, plans, projects and targets, and similar expressions, are intended to identify such statements. Forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and assumptions. Actual results may differ materially from those expressed or implied. The Issuer does not undertake any obligation to update or revise any forward-looking statement, save as required by law or by the terms of the Transaction Documents.

8. INVESTOR FREQUENTLY ASKED QUESTIONS

The questions and answers below are provided for the convenience of prospective investors and are intended as a plain-language guide only. They do not form part of the terms and conditions of the Sukuk and are qualified in their entirety by the detailed provisions of this document and of the Transaction Documents. In the event of any inconsistency, the Transaction Documents shall prevail.

What is the profit rate, and how is it determined?

The profit rate is 7.40 per cent. per annum on nominal value, fixed for three years. That is RM3.70 per RM100 held every six months, or RM7.40 a year. It is the highest rate on the Platform, and investors should be clear that this is compensation for risk rather than a sign of a superior investment. The issue is unrated, the Issuer is a small ACE Market company operating restaurants, and the security ranks behind existing financing on the charged property. A higher rate exists because a professional credit fund would not have taken 65 per cent. of the issue at a lower one.

How often are payments made, and when will I receive them?

Profit is paid semi-annually in arrears in arrears on 15 March and 15 September of each year, with the first payment falling due on 15 March 2027 and the final payment falling due on the maturity date, 15 September 2029. Payments are made to the persons shown in the records of the depository at the close of business on the relevant record date, which falls two business days before the payment date. Payments are credited directly through RENTAS; no physical certificates are issued and no coupons need to be presented.

When will I get my principal back?

The full RM100 per RM100 of nominal value is repaid on 15 September 2029 together with the final profit payment. There is no amortisation. The Issuer may call the whole issue from the second anniversary at 101.00 per cent. Investors should note the Issuer expects to need refinancing to repay, since accumulated free cash flow over the tenure would not cover RM4.0 million.

What happens if the Issuer defaults?

A default arises if the Issuer fails to pay any amount due within the applicable grace period, breaches a financial covenant, breaches another material obligation and fails to remedy it within the cure period, becomes subject to insolvency proceedings, or triggers one of the other events of default described in Section 4.9. Upon a continuing event of default, the Trustee may, and must if directed by an extraordinary resolution of Sukukholders, accelerate the Sukuk so that the full nominal value and accrued profit become immediately due and payable.

These Sukuk are secured, which distinguishes them from most of the offerings on the Platform, but investors should assess the security realistically. The charge over the central kitchen premises, valued at RM11.4 million, ranks behind RM7.2 million of existing financing on the same property, leaving RM4.2 million of equity against RM4.0 million of Sukuk on a June 2026 valuation. A forced sale of single-purpose industrial property typically realises well below valuation, so that margin is thin. The debenture over outlet fit-out and equipment is worth much less than book value, since restaurant fit-out has little value once removed from the premises. The franchise royalty assignment may be the more useful protection, as it captures a RM8.2 million income stream that survives the closure of individual outlets. Investors should also note that 486 employees give rise to preferential claims ranking ahead of any unsecured shortfall.

Individual investors do not enforce directly. The Trustee acts on behalf of all Sukukholders collectively, which prevents a disorderly race to enforce and ensures that any recoveries are distributed rateably in accordance with the priority of payments set out in the Trust Deed.

Is this issuance Shariah compliant?

Yes. The structure is Murabahah effected through a Tawarruq arrangement: Sukukholders, through the Trustee, purchase Shariah-compliant commodities and sell them to the Issuer at a deferred price comprising nominal value plus an agreed profit. The underlying business is halal food service, and the Issuer holds JAKIM halal certification for its central kitchen and all outlets. The structure has been reviewed and approved by Ibnu Hakim Shariah Advisory Sdn Bhd. Investors should consult their own Shariah advisers.

What are the main risks I should focus on?

The Issuer would direct attention to five risks in particular. First, credit risk: repayment depends entirely on the Issuer, and the Sukuk benefit from no third-party guarantee. Second, refinancing risk: the Sukuk repay in a single bullet payment at maturity and the Issuer expects to refinance rather than fully amortise from operating cash flow. Third, profit rate risk: the rate is fixed, so the market value of the Sukuk will fall if benchmark yields rise. Fourth, liquidity risk: the Sukuk are unlisted, secondary market trading may be thin, and investors should be prepared to hold to maturity. Fifth, the sector-specific risks described in Section 7.2, which for the Issuer principally concern dependence on a single master franchise agreement, high fixed occupancy and staff costs against variable sales, exposure to food input cost inflation, dependence on delivery platform channels and their commission rates, sub-franchisee failure and royalty default, halal certification maintenance, and the high base rate of failure in food service generally. Section 7 should be read in full.

How will the proceeds be used?

The gross proceeds of RM4.0 million will be applied as set out in Section 5: RM2.24 million to the fit-out of six new outlets, RM780,000 to central kitchen equipment, RM620,000 to refinancing existing equipment financing, RM180,000 to working capital, and RM180,000 to the expenses of the offering including the Platform origination fee.

What is the credit rating, and what does it mean?

There is no rating. No rating agency has been appointed to assess these Sukuk or the Issuer, and investors should not treat the participation of the Anchor Investor, the presence of security, or the fact that the Issuer is listed on the ACE Market as a substitute for one. A rating from RAM or MARC would have cost RM150,000 to RM200,000, being four to five per cent. of this issue, which would have made the issuance uneconomic. That is the reason for the absence, but it does not reduce its consequence: investors are assessing this credit themselves, using this document.

Who can invest, and in what amounts?

The Sukuk are issued in denominations of RM1,000 nominal value. Fractional interests in the Sukuk are made available through the Tokenkan platform, under which an investor may subscribe for an interest of not less than RM100 and in increments of RM1 thereafter. The platform operator holds the underlying Sukuk and records the fractional entitlement of each investor. An investor holding a fractional interest is entitled to the corresponding share of each profit payment and of the redemption proceeds, but is not the registered holder of the Sukuk and exercises rights under the Trust Deed through the platform operator.

Are the Sukuk secured?

Yes, and this is the main protection available given the absence of a rating. The security is a first-ranking charge over the central kitchen premises, a debenture over the assets of the Issuer, an assignment of franchise royalties, and a corporate guarantee from the controlling shareholder. Section 4.6 sets out the security in full, including the fact that the property charge ranks behind RM7.2 million of existing financing and that the debenture assets have limited realisable value.

Where do I rank against other creditors?

Sukukholders rank as senior secured creditors to the extent of the security, and as unsecured creditors for any shortfall. On the charged property they rank behind RM7.2 million of existing Islamic term financing. Any unsecured shortfall ranks behind winding-up costs and preferential employee claims. A fractional holding ranks exactly as a whole unit does, and equally with the Anchor Investor allocation.

Can the Issuer redeem early, and what would I receive?

The Issuer may call the whole issue from the second anniversary at 101.00 per cent. Investors have a put right on a change of control and a mandatory redemption applies if the master franchise agreement is lost. Otherwise there is no right to early redemption, and the only exit is a sale into the Anchor Investor standing bid described in Section 9.5, which is discounted, capped at RM70,000 a month and may be suspended.

How is my investment taxed?

The tax treatment of profit depends on the residence, legal form and tax status of the investor. Withholding tax may apply to payments made to certain non-resident investors, subject to any relief available under an applicable double taxation agreement. Certain classes of Malaysian institutional investors enjoy exemptions in respect of profit income from ringgit-denominated sukuk. The Issuer does not provide tax advice, and prospective investors should consult their own advisers.

How will I be kept informed after issuance?

The Issuer is required under the Trust Deed to deliver to the Trustee its audited consolidated financial statements within 120 days of each financial year end and its unaudited semi-annual accounts within 90 days of each half year end, together with a compliance certificate confirming observance of the financial covenants. The Issuer must also notify the Trustee promptly of any event of default or potential event of default, and of any development which would have a material adverse effect. The rating agency conducts a formal review of the rating at least annually.

Can I sell before maturity?

Fractional interests may be offered for sale through the matching facility operated by the Tokenkan platform, and the platform may also quote an indicative price at which it is prepared to take the position. Investors should understand clearly that this is not a listed market and that no party is obliged to buy. Whether a sale can be effected, and at what price, depends on the presence of a willing counterparty, on prevailing market yields and on the credit standing of the Issuer at the time; the price may be above or below the nominal value. An investor who is unable to sell should expect to hold to maturity, at which point the full nominal value becomes payable.

Why is this issue unrated, and how should I think about that?

A rating from RAM or MARC costs in the region of RM150,000 to RM200,000 for an initial assessment and annual surveillance. On a RM4.0 million issue that is four to five per cent. of the proceeds, which would have made this issuance uneconomic on its own. The absence of a rating is therefore a consequence of the size of the issue rather than a judgement about the Issuer.

That said, investors should not treat it as a formality. A rating provides an independent professional opinion on default probability, monitored continuously and subject to downgrade, and nothing in this document substitutes for it. What investors have instead are three partial substitutes: the security described in Section 4.6, the covenants in Section 4.8 tested semi-annually by the Trustee, and the fact that a professional credit fund conducted its own assessment and took 65 per cent. of the issue. Those are weaker than a rating. An investor uncomfortable with that should choose a rated offering on the Platform and accept the lower yield.

Restaurants fail often. Why is this a reasonable investment?

The failure rate in food service is real and the risk should not be minimised. What differentiates this Issuer from a single restaurant is that a substantial part of its earnings comes from franchise fees, royalties and central kitchen sales to 22 sub-franchisees, which totalled RM12.4 million in FY2025 against RM38.6 million from its own 34 outlets. Royalty income is less capital-intensive and survives the closure of individual sub-franchised outlets, since the sub-franchisee bears the outlet cost. It is also the income stream assigned to the Trustee as security.

The counterweight is that the whole business depends on one master franchise agreement, described in Section 7.2, and on 34 leased outlet premises whose rents are fixed while their sales are not. Three years is a short enough tenure to limit exposure, but investors should size their holding on the assumption that a small restaurant group can deteriorate quickly.

Where can I obtain further information?

Copies of the Trust Deed, the other Transaction Documents, the audited financial statements of the Issuer for the three financial years covered by this document, the rating letter and the Shariah pronouncement and the constitution of the Issuer are available for inspection

at the registered office of the Issuer during normal business hours for the period during which the Sukuk remain outstanding. Enquiries may be directed to the Registrar and Paying Agent, Tokenkan Capital Sdn Bhd.

9. ORIGATION, ALLOCATION AND THE PLATFORM

9.1 How this offering was originated

This offering was originated directly by the Issuer through Tokenkan Capital Sdn Bhd, which operates the Tokenkan platform. No investment bank has acted as lead arranger, lead manager or underwriter.

The Issuer is a company listed on the ACE Market of Bursa Malaysia with a market capitalisation of RM68.4 million. An issue of this size could not have carried the fixed cost of a conventional bond issuance, in which rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are incurred at broadly the same magnitude whether a company raises RM5 million or RM50 million. The Platform exists to compress that cost base, and this document should be read as the product of that compression.

What the Platform does

The Platform structured this offering, prepared this document with the Issuer, conducted the credit review summarised in Section 6, set the indicative pricing range in consultation with the Anchor Investor, and distributes the sukuk to retail investors. It maintains the register of holders and pays the periodic distributions.

What the Platform does not do

The Platform does not issue or hold the sukuk. Token issuance and custody are performed by Sentinel Digital Custody Sdn Bhd, a Digital Asset Custodian registered with the Securities Commission Malaysia. The Platform has no ability to move, encumber or apply an investor's holding, and an investor's entitlement does not form part of the assets of the Platform.

The Platform does not underwrite this offering. It has given no commitment to subscribe for any portion not taken up, and holds none of the sukuk on its own account. Section 5.5 sets out what happens if the offering does not reach its minimum.

The Platform does not operate an exchange or an order book, and does not match buyers with sellers. Section 9.5 describes the only exit mechanism available at launch.

The Platform is not an adviser to investors. It is remunerated by the Issuer as set out in Section 5.2, and it charges investors a transaction fee on purchases and sales. Its remuneration therefore rises with both the size of the offering and the volume of investor activity. Investors should weigh this when reading any material prepared by the Platform, including the automated explanatory tools available on it, which are provided for convenience, are grounded in this document, and do not constitute advice or a recommendation.

The Platform does not guarantee the obligations of the Issuer. On a default, the recourse of investors is to the Issuer through the Trustee, as set out in Section 4.9, and not to the Platform.

9.2 Parties independent of the Issuer and the Platform

The following functions are performed by parties independent of both the Issuer and the Platform, and their independence is the substance of the protection they provide:

- the Digital Asset Custodian, which issues and safekeeps the holdings and maintains records independently of the Platform;
- the Trustee, which holds the benefit of the covenants for investors, monitors compliance, convenes meetings of holders and enforces on their instruction. It is remunerated by the Issuer but owes its duties to holders;
- the Auditor, which audited the financial statements from which Section 6 is drawn;
- the Solicitors, who advised on the Transaction Documents; and
- where applicable, the Rating Agency, the Shariah Adviser and the Independent Valuer.

Neither the Issuer nor the Platform may remove or replace the Trustee or the Digital Asset Custodian without the consent of holders by extraordinary resolution.

9.3 Fractional holding

Investors hold fractional interests recorded by the Digital Asset Custodian and reflected in the register maintained by the Platform. A fractional interest carries the same economic entitlement, proportionate to its size, as a whole unit of nominal value, and the same right to vote at meetings of holders. It is not a separate class and is not subordinated.

9.4 The Anchor Investor and allocation of this issue

This issue is not distributed wholly to retail investors. It is allocated as follows:

Allocation	Nominal value	Proportion
Anchor Investor	RM2,600,000	65.0%
Retail investors through the Platform	RM1,400,000	35.0%
Total	RM4,000,000	100.0%

The Anchor Investor for this issue is Meridian Credit Opportunities Fund I, a professional credit fund. Investors should understand why this structure exists and what it does and does not do for them.

What the Anchor Investor provides

It provides credit validation that an approved platform cannot supply about itself. The Anchor Investor conducted its own credit assessment of the Issuer, independently of the Platform, and committed to its allocation on the basis of that assessment. A professional

credit investor taking 65.0% of the issue at the same price and on the same terms as retail investors is a meaningful signal, and it is the principal comfort available to a retail subscriber to a small unlisted issue of this kind.

It also provides the standing bid described in Section 9.5, which is the only route by which a retail investor can exit before maturity.

What it does not provide

The Anchor Investor does not guarantee the obligations of the Issuer and has no liability to retail investors if the Issuer defaults. It ranks equally with retail holders, not behind them, so it bears loss alongside them rather than ahead of them.

It is not an underwriter. It has committed to its own allocation only, and will not absorb any part of the retail tranche which is not taken up.

Investors should also note that the Anchor Investor participated in setting the pricing of this issue. Its interest in obtaining a higher return is not aligned with the interest of a retail subscriber, although both pay the same price for the same instrument.

9.5 The standing bid, and its limits

The Anchor Investor has undertaken to the Trustee to maintain a standing bid for sukuk held by retail investors, at a price determined by the formula published on the Platform and set out in the Standing Bid Agreement, which is available for inspection under Section 10.3.

The formula prices the sukuk by discounting the remaining scheduled payments at a reference yield, being the yield on Malaysian Government Securities of comparable remaining tenure plus the credit spread at which this issue was priced, and then applying a discount of 1.50 per cent. to reflect the cost of the Anchor Investor providing the facility. The formula is mechanical and is not a negotiation.

Investors should be clear about four limitations:

- **The price is not the nominal value.** Because the formula responds to prevailing yields, an investor selling into the standing bid when yields have risen will receive less than RM100 per RM100 of nominal value, and in adverse conditions materially less. The discount of 1.50 per cent. applies in every case, including when yields have not moved.
- **The bid is capped.** The Anchor Investor is obliged to purchase not more than RM70,000 of nominal value in aggregate in any calendar month. If retail investors seek to sell more than that in a month, requests are met in the order received and the balance carries to the following month.
- **The bid may be suspended.** The undertaking is suspended while an event of default is continuing, during the fifteen business days before and after a periodic payment date, and where the Anchor Investor is prevented from dealing by applicable law. Investors should note that the first of these means the standing bid is least likely to be available at precisely the moment they most want to sell.
- **The bid terminates.** The undertaking ends if the Anchor Investor ceases to hold at least half of its original allocation, on its insolvency, or at the maturity date. If it terminates before maturity, investors have no exit mechanism at all until Recognized Market Operator registration is obtained, and there is no assurance as to when that will occur.

The Trustee monitors compliance with the Standing Bid Agreement and reports on it in the periodic reporting published through the Platform.

9.6 Position limits

The Platform applies limits on the exposure a retail investor may take to any single issuer, in order to prevent a concentrated loss on a single small credit. An investor may not hold more than RM10,000 in nominal value of the sukuk of any one issuer, nor more than twenty-five per cent. of the aggregate value of their holdings across the Platform in any one issuer.

Investors should treat these limits as a floor on prudence rather than a substitute for it. The limits are set by the Platform and may be varied. They do not imply that an investment at the limit is suitable.

9.7 What happens if the Platform ceases to operate

The entitlements of investors do not depend on the continued operation of the Platform. Holdings are issued and safekept by the Digital Asset Custodian, which is registered with the Securities Commission Malaysia and subject to its own regulatory obligations, and the register is replicated daily to the Trustee.

If the Platform ceases to operate, the Trustee is empowered under the Trust Deed to appoint a replacement registrar and paying agent, and the obligations of the Issuer to holders are unaffected. Investors should nonetheless expect the practical consequences to include the suspension of the standing bid facility, since it is administered through the Platform, and a period during which distributions may be delayed while arrangements are transferred.

10. CORPORATE DIRECTORY AND STATUTORY INFORMATION

10.1 The Issuer

Registered name	Sajian Warisan Bhd
Registration number	Registration No. 201501019874 (1142863-K)
Registered office	Lot 12-3, Wisma Sajian, Jalan Kepong, 52100 Kuala Lumpur, Malaysia
Business address	Dapur Pusat Sajian, Kawasan Perindustrian Selayang, 68100 Batu Caves, Selangor, Malaysia
Date and place of incorporation	Incorporated in Malaysia on 4 June 2015 as a private limited company, converted to a public company on 22 February 2021 and listed on the ACE Market of Bursa Malaysia on 9 November 2021
Financial year end	31 December
Company secretary	Lee Mei Fong (MAICSA 7061284)

10.2 Advisers and transaction parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Shariah Adviser	Ibnu Hakim Shariah Advisory Sdn Bhd
Auditor	Cheong Rahmat & Co. PLT
Solicitors	Zulkarnain Hew & Co.
Anchor Investor	Meridian Credit Opportunities Fund I, a professional credit fund managed by Meridian Capital Partners Sdn Bhd
Auditors	Cheong Rahmat & Co. PLT (AF 1264)
Solicitors	Zulkarnain Hew & Co.
Rating agency	no rating agency has been appointed

10.3 Documents available for inspection

For so long as any Sukuk remain outstanding, copies of the following documents may be inspected at the registered office of the Issuer during normal business hours on any business day:

- the constitution of the Issuer;
- the audited consolidated financial statements of the Issuer for the three financial years covered by Section 6, together with the reports of the auditors thereon;
- the Trust Deed and the other Transaction Documents;
- the rating letter issued by no rating agency has been appointed in respect of the Sukuk;
- the pronouncement of the Shariah Adviser in respect of the structure of the Sukuk; and
- the material contracts referred to in this document.

10.4 Responsibility statement

The Directors of the Issuer have seen and approved this document. They collectively and individually accept full responsibility for the accuracy of the information contained in it, and confirm that, having made all reasonable enquiries, and to the best of their knowledge and belief, there are no other facts the omission of which would make any statement in this document misleading.

10.5 Consents

The Trustee, Amanah Wilayah Trustee Berhad, the auditors, Cheong Rahmat & Co. PLT (AF 1264), and the solicitors, Zulkarnain Hew & Co., Ibnu Hakim Shariah Advisory Sdn Bhd, as Shariah Adviser, have each given and have not withdrawn their written consent to the inclusion in this document of their names and, where applicable, of their reports and opinions in the form and context in which they appear. Tokenkan Capital Sdn Bhd has given and has not withdrawn its written consent to the inclusion of its name as Originating Platform, Registrar and Paying Agent, and Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia has given and has not withdrawn its written consent to the inclusion of its name as Digital Asset Custodian.
