

Lembah Impian Development Bhd

Registration No. 200401022518 (654187-P)
(Incorporated in Malaysia)

SUKUK MURABAHAH (TAWARRUQ)

RM12,000,000 in nominal value

Rated A3 (stable) by RAM Rating Services Berhad

Shariah compliant — Murabahah via Tawarruq

Main Market issuer — RM12.0 million issue

70% taken by a professional credit fund as Anchor Investor

Retail tranche RM3.6 million — fractional from RM100

Instrument	Sukuk Murabahah (Tawarruq)
Programme size	RM60,000,000 in nominal value
Nominal value of this issue	RM12,000,000
Anchor Investor allocation	RM8,400,000 (70.0%)
Retail tranche	RM3,600,000 (30.0%)
Minimum investment	RM100 (fractional)
Maximum single-issuer holding	RM25,000 per investor
Tenure	4 years from the issue date
Profit rate	6.20 per cent. per annum, fixed
Profit payment frequency	Semi-annually in arrears
Credit rating	A3 / stable outlook
Issue date	20 October 2026
Maturity date	20 October 2030
Exit before maturity	Anchor Investor standing bid only — see Section 9.5

THIS OFFERING IS MADE TO RETAIL INVESTORS THROUGH THE TOKENKAN PLATFORM IN FRACTIONAL DENOMINATIONS FROM RM100. IT IS NOT A DEPOSIT. IT IS NOT PROTECTED BY PERBADANAN INSURANS DEPOSIT MALAYSIA. THE CAPITAL INVESTED IS AT RISK AND MAY NOT BE RETURNED IN FULL. RETURNS ARE NOT GUARANTEED AND DEPEND ON THE ISSUER CONTINUING TO MEET ITS OBLIGATIONS. THE ISSUER IS A SMALL COMPANY AND THIS IS A SMALL ISSUE; INVESTORS SHOULD EXPECT GREATER CREDIT RISK AND LESS LIQUIDITY THAN ON A LARGE INSTITUTIONAL ISSUANCE. EXIT BEFORE MATURITY IS AVAILABLE ONLY THROUGH THE ANCHOR INVESTOR STANDING BID DESCRIBED IN SECTION 9.5, WHICH IS SUBJECT TO LIMITS AND MAY BE SUSPENDED. THE TOKENKAN PLATFORM IS NOT AN EXCHANGE. NOTHING IN THIS DOCUMENT IS INVESTMENT ADVICE OR A RECOMMENDATION. PROSPECTIVE INVESTORS SHOULD READ THIS DOCUMENT IN FULL, AND IN PARTICULAR THE RISK FACTORS IN SECTION 7, AND SHOULD INVEST ONLY WHAT THEY CAN AFFORD TO LOSE. THE ISSUER IS A PROPERTY DEVELOPER. ITS EARNINGS ARE CYCLICAL AND FELL SHARPLY IN THE MIDDLE OF THE THREE YEARS PRESENTED IN THIS DOCUMENT, WHEN COVERAGE OF FINANCE COSTS FELL TO 2.1 TIMES AGAINST A COVENANT MINIMUM OF 2.00 TIMES. INVESTORS SHOULD READ SECTION 6.4 BEFORE INVESTING.

1. EXECUTIVE SUMMARY

1.1 Overview of the Issuer

Lembah Impian Development Bhd is a Malaysian residential property developer operating in Negeri Sembilan and southern Selangor, principally at Nilai and Seremban. It develops landed residential and shophot products aimed at owner-occupier and first-time purchasers, and retains a small portfolio of shophot investment properties at Sepang.

The Issuer has delivered 2,140 units since 2004 and holds a land bank of 218 acres. It has been listed on the Main Market of Bursa Malaysia since October 2012 and had a market capitalisation of RM142.6 million as at 30 June 2026. It employed 142 persons as at 31 December 2025.

For the financial year ended 31 December 2025 the Issuer recorded revenue of RM126.8 million, EBITDA of RM24.8 million and profit for the financial year of RM10.3 million. Total assets stood at RM331.4 million and shareholders' funds at RM108.5 million.

1.2 Purpose of the offering

The Issuer is offering RM12,000,000 in nominal value of Sukuk Murabahah, the inaugural issue under its RM60.0 million Sukuk Programme. Of that, RM8,400,000 is allocated to the Anchor Investor and RM3,600,000 to retail investors through the Tokenkan platform in fractional denominations from RM100, subject to a maximum holding of RM25,000 per investor.

Proceeds will fund infrastructure and earthworks for Lembah Impian phase 3, construction working capital, the refinancing of a bridging facility and working capital. Section 5 has the detail.

1.3 The one thing investors should read before anything else

The three financial years in this document do not show a growth trend, and it would be a mistake to read them as one. Revenue fell from RM118.4 million in FY2023 to RM104.2 million in FY2024 before recovering to RM126.8 million in FY2025. Profit fell from RM9.4 million to RM3.0 million before recovering to RM10.3 million.

This is ordinary for a developer of this size. Earnings are recognised as construction progresses, so a trough appears whenever one development completes before the next reaches the stages producing material revenue. Investors should assume a comparable trough within the four-year tenure of this issue.

What matters is what a trough does to the covenants. In FY2024, EBITDA cover of finance costs was 2.1 times against the 2.00 times minimum these Sukuk require, and financing to EBITDA was 9.2 times against the 8.00 times maximum. **Had this issue been outstanding in FY2024, the Issuer would have breached its leverage covenant.** On the enlarged post-issue debt, a repeat of that year would breach both tests. Section 6.4 sets this out in full.

That is not a reason to avoid the offering, but it is the reason the rate is 6.20 per cent. rather than lower, and investors should size their holding accordingly.

1.4 Why this issuance exists

A conventional RM12.0 million bond issuance is not economic in Malaysia. Fixed costs of RM1.4 million to RM1.9 million, largely irrespective of size, would consume 12 to 16 per cent. of the proceeds. The total cost of this issuance is RM260,000, being 2.17 per cent. of nominal value, achieved by removing the underwriter and standardising the documentation and registry functions.

1.5 Key investment highlights

Rated, and secured against a real land bank

A3 stable from RAM, and 218 acres of land bank in an established corridor providing a pipeline exceeding eight years at current absorption.

Moderate balance sheet gearing

Gross gearing of 1.39 times against a covenanted maximum of 2.00 times, and an unencumbered asset covenant at 130 per cent. of unsecured debt, currently 168 per cent.

Owner-occupier product in an affordable price band

The Issuer builds for first-time and owner-occupier purchasers rather than investors, a segment less exposed to speculative demand reversal.

Fixed profit under the Murabahah structure

Total profit is fixed at the outset and cannot vary with the performance of the Issuer.

1.6 Key risks

A summary only. Section 7 must be read in full.

- **Covenant fragility.** A repeat of FY2024 on the post-issue debt would breach both the leverage and coverage covenants.
- **Cyclical, lumpy earnings.** Profit fell by 68 per cent. in FY2024 on ordinary project timing.
- **Unsecured, behind RM116.6 million.** 77.1 per cent. of financing is secured on the land and work in progress and ranks ahead.
- **Structural subordination.** Developments sit in project subsidiaries; the Issuer receives only surplus after project financiers are paid.
- **Ring-fenced purchaser monies.** RM8.6 million of the cash balance belongs to purchasers by statute.

- **Purchaser mortgage dependence.** Booking-to-conversion averaged 64 per cent. and moves with central bank lending guidelines.
- **Single sub-market.** All active developments are at Nilai and Seremban.
- **Contractor failure.** A main contractor was replaced in 2024, delaying one block by five months.
- **Inventory and land holding cost.** RM194.2 million sits in development inventory generating no revenue until sold.
- **Exit is limited.** Only the Anchor Investor standing bid, at a 1.25 per cent. discount to formula, capped at RM180,000 monthly and suspended while a default continues.

1.7 Summary financial information

RM'000	FY2023	FY2024	FY2025
Revenue	118,400	104,200	126,800
EBITDA	22,200	15,400	24,800
Profit for the financial year	9,400	3,000	10,300
Total assets	289,200	302,600	331,400
Total liabilities	194,000	204,400	222,900
Total equity	95,200	98,200	108,500
Total financing	134,600	142,000	151,200
Net cash from operating activities	14,200	8,600	22,400
Gross gearing (times)	1.41	1.45	1.39
EBITDA / finance costs (times)	3.3	2.1	3.3
Total financing / EBITDA (times)	6.1	9.2	6.1

1.8 Operating statistics

	FY2023	FY2024	FY2025
Units launched during the year	212	86	264
Units sold during the year	186	142	238
Units delivered during the year	168	246	124
Unsold completed inventory at year end (units)	38	24	62
Booking to conversion rate (%)	68	58	66
Land bank at year end (acres)	232	226	218
Unbilled sales at year end (RM million)	142	98	186

2. ISSUER BACKGROUND

2.1 History and development

The Issuer was incorporated in July 2004 by Cheah Boon Hock, a civil engineer, and began with a 96-unit terraced scheme at Nilai. It built steadily through the 2000s in the Nilai corridor, which it selected for its proximity to the North-South Expressway and to the industrial employment base of the area, and which remains its principal asset.

The greater part of the present land bank was acquired between 2009 and 2017, largely from plantation owners and at prices well below current levels. Management regards this historic land cost as the reason it can compete on price against developers holding more recently assembled sites.

The Issuer listed on the Main Market of Bursa Malaysia in October 2012, raising RM38.4 million. The Sepang shoplot investment properties were acquired in 2018 to introduce a recurring income stream. The Seremban scheme launched in 2021.

This is the inaugural debt issuance of the Issuer, which has funded itself to date through equity, project financing and bank borrowing.

2.2 Business model

The Issuer acquires land, obtains planning and development approvals, appoints third-party main contractors under fixed-price contracts, sells units off-plan under statutory sale and purchase agreements, and recognises revenue as construction progresses.

Three variables drive the economics. Land cost, which for the Issuer is largely historic and low. Sales rate, which determines how quickly capital is recovered and which depends on purchaser access to mortgage financing. And construction cost, transferred to contractors under fixed-price contracts for as long as those contractors remain solvent.

The cash profile follows from this. Land and infrastructure are paid for at the outset, construction is funded progressively against purchaser progress payments and project financing, and surplus is released only as a development completes. A developer consumes cash when launching and generates it when completing, which is why the operating cash flow of the Issuer moved from RM14.2 million to RM8.6 million and then to RM22.4 million over three years.

2.3 Revenue segments

Segment (RM'000)	FY2023	FY2024	FY2025
Landed residential development	84,600	72,400	89,200
Shoplot and commercial development	24,800	23,600	29,400
Investment property rental	6,400	6,800	7,100
Project management services	2,600	1,400	1,100
Total revenue	118,400	104,200	126,800

Investment property rental of RM7.1 million is small but is the only genuinely recurring revenue the Issuer has, and it is the income least affected by the development cycle.

2.4 Developments and land bank

Development	Location	Status	Remaining GDV (RM million)
Lembah Impian phase 2	Nilai, Negeri Sembilan	Under construction	168
Lembah Impian phase 3	Nilai, Negeri Sembilan	Planning — funded by this issue	224
Impian Seremban	Seremban, Negeri Sembilan	Under construction	96
Sepang shoplots	Sepang, Selangor	Retained as investment property	n/a
Undeveloped land bank (218 acres)	Negeri Sembilan	Not launched	864 (estimated)

All operations are in Malaysia and all revenue is in ringgit.

2.5 Management and employees

The Issuer employed 142 persons as at 31 December 2025, of whom 48 were in project delivery and site supervision, 42 in sales and marketing, 28 in property and land management and 24 in corporate functions. Construction labour is employed by contractors rather than by the Issuer.

Investors should note the dependence of the Issuer on its founder, who has led it for 22 years and retains the principal landowner and financier relationships.

2.6 Strategy

The strategy has three elements: to develop the existing land bank in phases sized to the absorption rate of the corridor rather than to the capacity of the Issuer; to grow recurring investment property income as a partial offset to development cyclicity; and to keep gearing below 1.50 times so the Issuer retains capacity to acquire land in a downturn, which is when the best land becomes available. The Issuer does not intend to develop outside Negeri Sembilan and southern Selangor.

3. CORPORATE STRUCTURE, SHAREHOLDING AND GOVERNANCE

3.1 Group structure

The Issuer undertakes each development through a separate project subsidiary which holds the land and borrows under the project financing for that development. Investors should read this together with Section 7.1 on structural subordination.

Subsidiary / associate	Effective interest	Principal activity
Impian Nilai Sdn Bhd	100%	Development of the Lembah Impian phases 1 and 2 at Nilai
Impian Lembah Tiga Sdn Bhd	100%	Holding of land and development of Lembah Impian phase 3
Impian Seremban Sdn Bhd	100%	Development of the Seremban terraced housing scheme
Impian Commercial Sdn Bhd	100%	Ownership of the Sepang shophot investment properties
Impian Land Sdn Bhd	100%	Holding of undeveloped land bank in Negeri Sembilan

3.2 Shareholding of the Issuer

The issued share capital of the Issuer is RM60,000,000 comprising 240,000,000 ordinary shares of RM0.25 each. The shares are listed on the Main Market of Bursa Malaysia, with a market capitalisation of RM142.6 million as at 30 June 2026.

Shareholder	Ordinary shares held	%
Impian Holdings Sdn Bhd	62,400,000	26.0
Cheah Boon Hock	26,400,000	11.0
Selangor Development Capital Berhad	28,800,000	12.0
Meridian Life Assurance Berhad	19,200,000	8.0
Public shareholders	93,600,000	39.0
Directors other than the above	9,600,000	4.0
Total	240,000,000	100.0

3.3 Board of Directors

The Board comprises seven members, of whom three are independent non-executive directors.

Name	Age	Designation	Appointed
Datuk Lim Cheng Poh	65	Independent Non-Executive Chairman	May 2012
Cheah Boon Hock	57	Group Managing Director	July 2004
Cheah Su Lin	34	Executive Director, Sales and Marketing	June 2021
Nurul Ain binti Zainal	46	Executive Director and Chief Financial Officer	March 2020
Ir. Krishnan Balakrishnan	59	Independent Non-Executive Director	May 2012
Wong Li Mei	48	Independent Non-Executive Director	September 2022
Ahmad Faiz bin Othman	52	Non-Independent Non-Executive Director	January 2019

3.4 Key management

The senior management team combines development, construction and sales experience in the Nilai and Seremban corridor.

Name	Position	Relevant experience
Cheah Boon Hock	Group Managing Director	Founder; 29 years in property development, previously a civil engineer.
Nurul Ain binti Zainal	Chief Financial Officer	Chartered accountant with 20 years' experience, including seven in property development finance.
Cheah Su Lin	Director, Sales and Marketing	9 years in residential sales and channel management.
Tan Boon Keat	Head of Projects	23 years in construction and project management on residential schemes.
Rajesh Kumar	Head of Land and Planning	18 years in land acquisition, conversion and planning approvals.

3.5 Corporate governance

The Board of Directors of the Issuer is responsible for the overall stewardship of the Group, including the approval of strategy and annual budgets, the oversight of risk management and internal control, the approval of material capital commitments and financing arrangements, and the integrity of financial reporting. The Board meets at least quarterly and on such other occasions as the business of the Group requires.

The Board is supported by three standing committees. The Audit and Risk Committee, comprising a majority of independent directors and chaired by an independent director, reviews the financial statements before submission to the Board, oversees the internal audit function and the relationship with the external auditors, and monitors the principal risks of the Group and the adequacy of mitigating controls. The Nomination and Remuneration Committee reviews the composition and effectiveness of the Board and the remuneration framework for directors and senior management. The Board Investment Committee reviews material capital expenditure, acquisitions and financing proposals before they are submitted to the Board.

The Group maintains an internal audit function which reports functionally to the Audit and Risk Committee and administratively to the chief executive. The internal audit plan is approved annually by the Audit and Risk Committee and is prepared on a risk-based methodology covering the principal operating and financial processes of the Group. The Group also maintains a whistleblowing policy under which employees and third parties may report suspected improprieties directly to the chairman of the Audit and Risk Committee.

For so long as the Sukuk remain outstanding, the Issuer has undertaken to maintain a Board comprising not fewer than five directors, of whom at least two shall be independent, and to procure that the Audit and Risk Committee continues to be chaired by an independent director.

The founding family holds 37 per cent. of the voting shares and two of the seven board seats. The Issuer has undertaken to the Trustee that land will not be acquired from or disposed of to a connected party without an independent valuation, in addition to the related party transaction requirements of the Main Market Listing Requirements.

4. TERMS OF THE SUKUK

This section summarises the principal terms and conditions of the Sukuk. It is a summary only and is qualified in its entirety by the detailed provisions of the Trust Deed, the Programme Agreement and the Shariah pronouncement and the other Transaction Documents, copies of which are available for inspection at the registered office of the Issuer during normal business hours.

4.1 Summary of principal terms

Issuer	Lembah Impian Development Bhd
Instrument	Sukuk Murabahah issued under the Sukuk Programme of the Issuer and distributed through the Tokenkan platform
Shariah principle	Murabahah, effected through a Tawarruq arrangement in Shariah-compliant commodities
Programme size	RM60,000,000 in nominal value
Principal amount of this issuance	RM12,000,000
Issue price	100.00 per cent. of nominal value
Denomination	RM1,000 nominal value per unit, tradable in minimum blocks of RM250,000 nominal value
Tenure	4 years from the issue date
Issue date	20 October 2026
Maturity date	20 October 2030
Profit rate	6.20 per cent. per annum, fixed for the full tenure
Profit payment frequency	Semi-annually in arrears
Profit payment dates	20 April and 20 October
Day count fraction	Actual/365 (Fixed)
Maturity structure	Bullet repayment of the full nominal value on the maturity date
Redemption at maturity	At 100 per cent. of the nominal value, together with accrued and unpaid profit up to but excluding the maturity date
Security	Unsecured, supported by a negative pledge, an unencumbered asset covenant and a project account undertaking
Ranking	Senior unsecured; ranking pari passu with all other present and future unsecured and unsubordinated obligations of the Issuer
Credit rating	A3 by RAM Rating Services Berhad, with a stable outlook
Form	Scripless, prescribed under the Real Time Electronic Transfer of Funds and Securities System (RENTAS)
Listing status	Not listed on any stock exchange; reported on the Electronic Trading Platform
Governing law	Laws of Malaysia
Shariah adviser	Ibnu Hakim Shariah Advisory Sdn Bhd

4.2 Principal amount and denomination

The Issuer proposes to issue RM12,000,000 in nominal value of Sukuk under the Sukuk Murabahah Programme. The Sukuk will be issued in denominations of RM1,000 nominal value per unit. Trading in the secondary market shall be in minimum blocks of RM250,000 nominal value or such other amount as may be prescribed by the operator of RENTAS from time to time.

The Sukuk constitute direct obligations of the Issuer. They are offered through the Tokenkan platform in fractional interests, and are accordingly available to investors who have completed the suitability assessment operated by the platform, including individual investors. Prospective investors should note that eligibility to subscribe is determined by the platform operator in accordance with the requirements applicable to it, and that this document is a disclosure document rather than an invitation extended generally to the public.

4.3 Profit rate and payment

The Sukuk carry a profit rate of 6.20 per cent. per annum on the nominal value, fixed for the full tenure of four years. The semi-annual profit amount is RM372,000 on the full issue, equivalent to RM3.10 per RM100 of nominal value held. Under the Murabahah structure the aggregate profit is fixed at the outset as part of the deferred sale price and does not vary with the performance of the Issuer or of its developments.

Profit payments shall be made in arrears on the profit payment dates specified above. Where a profit payment date falls on a day which is not a business day, payment shall be made on the immediately succeeding business day without any adjustment to the amount payable, in accordance with the Following Business Day Convention (unadjusted).

The following table sets out the indicative profit payment schedule for the issuance, assuming the full nominal amount remains outstanding throughout the tenure and no early redemption occurs.

Period	Profit payment date	Indicative payment (RM'000)
Period 1	20 April 2027	372
Period 2	20 October 2027	372
Period 3	20 April 2028	372
Period 4	20 October 2028	372
Period 5	20 April 2029	372
Period 6	20 October 2029	372
Period 7	20 April 2030	372
Period 8 (final)	20 October 2030	12,372 (including nominal value of 12,000)

The schedule above is indicative only. Actual amounts payable will be computed on an Actual/365 (Fixed) basis by reference to the number of days in each profit period.

4.4 Maturity structure

The Sukuk are structured as a single bullet maturity. The full nominal value of RM12,000,000 falls due on 20 October 2030 together with the final profit payment. The Issuer intends to meet this from the proceeds of the Lembah Impian phase 3 development which this issue part-funds, and from refinancing. Investors should note that development cash flow arrives in lumps tied to completion, and that the timing of phase 3 completion is not within the control of the Issuer.

4.5 Early redemption

The Sukuk incorporate the following early redemption provisions:

Optional early redemption (call)

The Issuer may, on any profit payment date falling on or after the second anniversary of the issue date, redeem all but not part only of the Sukuk on not less than thirty days' notice, at 101.00 per cent. of nominal value before the third anniversary and 100.50 per cent. thereafter, together with accrued and unpaid profit.

Mandatory redemption on a substantial land disposal

If the Issuer disposes of land held for development representing in aggregate more than twenty per cent. of consolidated total assets in any twelve-month period, otherwise than by way of sale of completed units in the ordinary course, the net proceeds in excess of that threshold shall be applied within sixty days to redemption at nominal value together with accrued profit, unless the Trustee is satisfied that the proceeds will be reinvested in development land within twelve months.

Redemption following a change of control

Upon a change of control, being an event whereby Impian Holdings Sdn Bhd and the Cheah family cease collectively to hold, directly or indirectly, more than thirty-five per cent. of the voting shares of the Issuer, each Sukukholder may require redemption at nominal value together with accrued profit within sixty days.

Redemption for taxation or Shariah reasons

The Issuer may redeem all but not part only of the Sukuk at nominal value together with accrued profit if a change in Malaysian tax law obliges it to pay additional amounts, or if the Shariah Adviser determines the structure has ceased to be Shariah compliant and the deficiency is not remedied within ninety days.

No investor put

Save on a change of control, investors have no right to require redemption before maturity. Exit before maturity is available only through the Anchor Investor standing bid described in Section 9.5.

4.6 Security and collateral

The Sukuk are unsecured obligations of the Issuer. Investors should understand why no security was granted and what stands in its place.

A property developer finances each development by charging the land and work in progress of that development to a project financier. By the time an issue of this kind is contemplated, the assets capable of bearing security are already charged. As at 31 December 2025 secured Islamic financing amounted to RM116.6 million out of total financing of RM151.2 million, or 77.1 per cent. Granting security for these Sukuk would have required either a second-ranking charge of little value or the release of a project financier, neither of which was available.

The protections are therefore contractual:

- a negative pledge preventing security over the present and future assets of the Issuer, save for permitted security. Investors should note that permitted security expressly includes project financing security over new development sites, so this covenant does not freeze the position and the Issuer will continue to charge new land ahead of Sukukholders;
- an unencumbered asset covenant requiring consolidated assets not subject to security to represent at all times not less than one hundred and thirty per cent. of aggregate unsecured financial indebtedness, tested semi-annually against the most recent valuation of the Independent Valuer;
- a project account undertaking under which surplus proceeds of each development, after discharge of project financing and Housing

- Development Account obligations, are paid into a designated account of the Issuer which may not be charged;
- a restriction preventing the Issuer from acquiring land from, or disposing of land to, a connected party without an independent valuation; and
 - a distribution restriction preventing dividends where an event of default is continuing, where a covenant would be breached following payment, or where dividends in any financial year would exceed forty per cent. of consolidated profit.

4.7 Ranking of investors

The Sukuk constitute direct, unconditional, unsecured and unsubordinated obligations of the Issuer, ranking pari passu among themselves and with its other unsecured and unsubordinated obligations, save for obligations mandatorily preferred by law.

The Sukuk rank behind secured Islamic financing of RM116.6 million to the extent of the assets securing it, being the development land and work in progress of the phase 1 and 2 developments, the shoplot investment properties, and the land securing the bridging facility.

The Sukuk are structurally subordinated to the creditors of the project subsidiaries through which developments are undertaken. The Issuer depends on surplus distributions from those subsidiaries after their financiers have been discharged.

Investors should note the effect of Malaysian housing development legislation. Purchaser deposits and progress payments are held in Housing Development Accounts applicable only to the development concerned, and purchasers hold statutory protections in respect of them. As at 31 December 2025, RM8.6 million of the RM22.8 million cash balance was so held and is not available to Sukukholders.

Fractional interests rank equally with whole units and with the Anchor Investor allocation.

4.8 Covenants

The Trust Deed contains positive, negative and financial covenants customary for an issuance of this nature. The principal financial covenants, to be tested semi-annually by reference to the audited consolidated financial statements of the Issuer and, where applicable, its unaudited semi-annual management accounts, are as follows:

Financial covenant	Required level	Position as at 31 December 2025
Gross gearing ratio (total financing to total equity)	Not more than 2.00 times	1.39 times
Total financing to EBITDA	Not more than 8.00 times	6.1 times
EBITDA to finance costs	Not less than 2.00 times	3.26 times
Unencumbered assets to unsecured financial indebtedness	Not less than 130 per cent.	168 per cent.
Consolidated shareholders' funds	Not less than RM90.0 million	RM108.5 million

The principal negative covenants restrict the Issuer from, among other things: (a) creating or permitting to subsist any security interest over its assets other than permitted security; (b) disposing of a material part of its assets otherwise than on arm's length terms in the ordinary course of business; (c) undertaking any substantial change to the general nature of its business; (d) entering into any amalgamation, demerger, merger or corporate reconstruction which would have a material adverse effect; and (e) declaring or paying any dividend or making any distribution where an event of default is continuing or would result from such payment.

4.9 Events of default

The occurrence of any of the following shall constitute an event of default, subject to the grace periods specified in the Trust Deed: non-payment of any amount due under the Sukuk within seven business days of the due date; breach of any financial covenant; breach of any other obligation which is not remedied within thirty days of notice; cross-default in respect of any other financial indebtedness of the Issuer or any material subsidiary exceeding RM25.0 million in aggregate; the commencement of insolvency, winding-up or receivership proceedings; the cessation or material change of business; the invalidity or unenforceability of any Transaction Document; and the occurrence of any event having a material adverse effect on the ability of the Issuer to perform its payment obligations.

Upon the occurrence of an event of default which is continuing, the Trustee may, and shall if so directed by an extraordinary resolution of the Sukukholders, declare the Sukuk to be immediately due and payable at their nominal value together with accrued and unpaid profit.

4.10 Roles and parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Shariah Adviser	Ibnu Hakim Shariah Advisory Sdn Bhd
Rating Agency	RAM Rating Services Berhad
Auditor	Sim Abdullah & Associates PLT
Solicitors	Krishnan Yeoh & Partners
Independent Valuer	Chandra Nakamura Valuers Sdn Bhd
Anchor Investor	Meridian Credit Opportunities Fund I, a professional credit fund managed by Meridian Capital Partners Sdn Bhd

5. USE OF PROCEEDS

5.1 Summary of application

The gross proceeds of RM12,000,000 are to be applied as set out below. The Issuer confirms that the proceeds will not be applied to any activity which is not Shariah compliant.

Application	Amount (RM'000)	Proportion	Expected timing
Infrastructure and earthworks – Lembah Impian phase 3	5,800	48.3%	Q1 2027 to Q3 2028
Construction working capital	3,200	26.7%	Q2 2027 to Q4 2029
Refinancing of the phase 3 bridging facility	2,400	20.0%	Within 30 days of issue
General working capital	340	2.8%	As required
Expenses of the offering (see 5.2)	260	2.2%	On issue
Total gross proceeds	12,000	100.0%	

5.2 Expenses of the offering, including Platform fees

This offering is originated on the Tokenkan platform rather than arranged by an investment bank, and the fee structure differs from that of a conventional issuance. It is set out in full below, because the economic case for this offering rests on that difference and investors are entitled to test it.

The Platform charges the Issuer a tiered origination and listing fee, at 2.5 per cent. of nominal value for issues of RM1 million to RM5 million, 1.5 per cent. from RM5 million to RM10 million and 1.0 per cent. above RM10 million, subject in each case to a minimum of RM25,000. This issue falls in the 1.0 per cent. tier, giving a fee of RM120,000.

Payee	Amount (RM'000)	Basis
Tokenkan Capital Sdn Bhd – origination and listing fee	120	1.0% of nominal value (above RM10m tier)
RAM Rating Services Berhad – rating and surveillance	58	Fixed
Trustee – acceptance and annual fees (4 years)	42	Fixed
Solicitors	18	Fixed
Shariah Adviser	16	Fixed
Independent Valuer and reporting accountants	6	Fixed
Total charged against proceeds	260	

The total cost of this issuance is RM260,000, being 2.17 per cent. of nominal value. Investors should compare this against the fixed cost of a conventional issuance, which the Issuer estimates at RM1.4 million to RM1.9 million irrespective of size once rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are aggregated. On an issue of RM12,000,000 a conventional cost base of that order would consume between 12 per cent. and 16 per cent. of the proceeds, which is the reason this issuance would not otherwise have taken place.

Fees charged to investors

Investors pay no fee on subscription. The Platform charges a transaction fee of 1.0 per cent. on every purchase and on every sale executed through it, including a sale into the standing bid described in Section 9.5. On a subscription of RM200 the fee is RM2.

Investors should note the effect of this on a short holding period. An investor who subscribes and later sells into the standing bid pays 1.0 per cent. on the way in and 1.0 per cent. on the way out, and bears the standing bid discount described in Section 9.5 in addition. Round-trip cost is therefore material relative to a single periodic distribution, and this instrument is not suited to short-term trading.

5.3 Description of each application

Lembah Impian phase 3

RM5.8 million will fund the land premium payable on conversion of use, earthworks, drainage, retaining structures and the internal road network for phase 3 at Nilai. The land, 84 acres, is already owned by Impian Lembah Tiga Sdn Bhd and forms part of the land bank acquired in 2014.

Phase 3 comprises 386 units of double-storey terraced and cluster housing with an estimated gross development value of RM224 million, targeted at purchasers in the RM480,000 to RM620,000 price band. Launch is planned for the fourth quarter of 2027 with completion in 2030.

Investors should note that revenue recognition will not begin until construction commences following launch, so no contribution to earnings is expected before FY2029, while profit payments on this issue begin in April 2027. Investors are funding a development whose earnings arrive in the final year of the tenure at the earliest.

Construction working capital

RM3.2 million will fund the working capital requirement of the developments under construction, principally the timing difference between progress payments to contractors and progress billings collected from purchasers, together with retention sums held against contractors.

Refinancing of the bridging facility

RM2.4 million will repay a bridging facility drawn against the phase 3 land in 2025. The facility is short-dated, floating rate and secured on the land. Its repayment releases that security, which increases the pool of unencumbered assets supporting the covenant in Section 4.6, and extends the weighted average maturity of financing from 2.6 years to 3.2 years.

General working capital

RM340,000 will fund general corporate working capital.

5.4 Management of proceeds

Proceeds will be credited on the issue date to a Disbursement Account operated by the Issuer under the supervision of the Trustee. Withdrawals require a certificate of two authorised officers confirming the amount is required for an application in Section 5.1, supported by the certificate of the project quantity surveyor for infrastructure works and by the redemption statement of the financier for the refinancing.

Pending application, balances may be invested only in Shariah-compliant liquid instruments issued or guaranteed by the Government of Malaysia or licensed Malaysian financial institutions, of a tenure not exceeding three months.

The Issuer may reallocate up to ten per cent. of gross proceeds between applications on notice to the Trustee. Any greater reallocation requires approval by extraordinary resolution.

The Issuer will report quarterly through the Platform on the application of proceeds, on sales and launch progress at phase 3, and on compliance with the covenants in Section 4.8.

5.5 If the offering is not fully subscribed

This offering is not underwritten. The Anchor Investor has committed to its allocation of RM8,400,000 but will not absorb any part of the retail tranche which is not taken up.

The minimum level of subscription for the retail tranche is RM1,800,000, being half of it. If retail subscriptions fall below that level at the close of the offer period, the offering is withdrawn in its entirety, including the Anchor Investor allocation, and all subscription monies are returned in full within five business days without profit. Subscription monies are held in a segregated client account with a licensed Malaysian bank throughout the offer period and form no part of the assets of the Issuer or of the Platform.

If retail subscriptions reach RM1,800,000 but fall short of RM3,600,000, the offering proceeds at the amount raised, applied in the order: expenses; refinancing of the bridging facility; construction working capital; then phase 3 infrastructure, which would be phased over a longer period. The profit rate does not change.

5.6 Expected effect

- commencement of infrastructure works on a 386-unit development with estimated gross development value of RM224 million;
- release of security over the phase 3 land on repayment of the bridging facility, improving the unencumbered asset covenant position;
- extension of the weighted average maturity of financing from 2.6 to 3.2 years;
- an increase in the fixed rate proportion of financing from 38 to 51 per cent.;
- gross gearing rising from 1.39 to 1.49 times and financing to EBITDA from 6.1 to 6.5 times, as set out in Section 6.5.

6. FINANCIAL INFORMATION

The financial information set out in this section has been extracted from the audited consolidated financial statements of the Issuer for the three financial years ended 31 December 2023, 2024 and 2025, which were prepared in accordance with Malaysian Financial Reporting Standards and the requirements of the Companies Act. The auditors of the Issuer, Sim Abdullah & Associates PLT (AF 1382), issued unqualified audit opinions in respect of each of the three financial years presented.

Investors should read the financial information below together with the accompanying commentary and the risk factors set out in Section 7. Historical results are not necessarily indicative of results that may be expected for any future period.

6.1 Consolidated statements of comprehensive income

All amounts are stated in RM'000 unless otherwise indicated. Figures in parentheses denote negative amounts.

	FY2023	FY2024	FY2025
Revenue	118,400	104,200	126,800
Cost of sales	84,600	76,800	89,400
Gross profit	33,800	27,400	37,400
Other operating income	1,200	1,400	1,600
Administrative and other operating expenses	12,800	13,400	14,200
EBITDA	22,200	15,400	24,800
Depreciation and amortisation	3,600	3,800	4,100
Operating profit (EBIT)	18,600	11,600	20,700
Finance costs	6,800	7,400	7,600
Profit before taxation	11,800	4,200	13,100
Taxation	2,400	1,200	2,800
Profit for the financial year	9,400	3,000	10,300
EBITDA margin (%)	18.8	14.8	19.6
Net profit margin (%)	7.9	2.9	8.1

Revenue was RM118.4 million in FY2023, RM104.2 million in FY2024 and RM126.8 million in FY2025. The decline in the middle year arose from the completion of the Nilai phase 1 development in the first half of FY2024 and the timing of phase 2, which reached material revenue recognition only in FY2025.

EBITDA followed the same shape at RM22.2 million, RM15.4 million and RM24.8 million, with the margin moving from 18.8 per cent. to 14.8 per cent. and back to 19.6 per cent. Profit for the financial year was RM9.4 million, RM3.0 million and RM10.3 million.

The FY2024 outturn is the more informative of the three years for a prospective Sukukholder. In that year EBITDA cover of finance costs fell to 2.1 times, marginally above the covenanted minimum of 2.00 times, and return on equity fell to 3.1 per cent.

Finance costs were RM6.8 million, RM7.4 million and RM7.6 million. A substantial part of financing cost on development projects is capitalised into development costs rather than expensed, so this line understates the total cost of borrowing.

6.2 Consolidated statements of financial position

	FY2023	FY2024	FY2025
<i>NON-CURRENT ASSETS</i>			
Investment properties, land held for development and equipment	68,400	71,200	74,600
Deferred tax assets and other non-current assets	4,200	4,600	5,100
<i>Total non-current assets</i>	<i>72,600</i>	<i>75,800</i>	<i>79,700</i>
<i>CURRENT ASSETS</i>			
Trade receivables, accrued billings and other receivables	24,600	22,400	28,600
Property development costs and completed inventories	168,400	182,600	194,200
Prepayments, deposits and other current assets	5,200	5,600	6,100
Cash, bank balances and Housing Development Account balances	18,400	16,200	22,800
<i>Total current assets</i>	<i>216,600</i>	<i>226,800</i>	<i>251,700</i>
TOTAL ASSETS	289,200	302,600	331,400
<i>EQUITY</i>			
Share capital	60,000	60,000	60,000
Reserves and retained earnings	35,200	38,200	48,500
<i>Total equity</i>	<i>95,200</i>	<i>98,200</i>	<i>108,500</i>
<i>NON-CURRENT LIABILITIES</i>			
Islamic financing – non-current	92,000	96,000	104,000
Deferred tax, lease liabilities and long-term provisions	12,400	12,000	14,100
<i>Total non-current liabilities</i>	<i>104,400</i>	<i>108,000</i>	<i>118,100</i>
<i>CURRENT LIABILITIES</i>			
Islamic financing – current, including bridging facilities	42,600	46,000	47,200
Trade payables, retention sums and accruals	32,800	34,000	39,600
Progress billings in advance, other payables and taxation	14,200	16,400	18,000
<i>Total current liabilities</i>	<i>89,600</i>	<i>96,400</i>	<i>104,800</i>
<i>Total liabilities</i>	<i>194,000</i>	<i>204,400</i>	<i>222,900</i>
TOTAL EQUITY AND LIABILITIES	289,200	302,600	331,400

Total assets increased from RM289.2 million to RM331.4 million over the review period. Property development costs and completed inventories stood at RM194.2 million and investment properties, land held for development and equipment at RM74.6 million, together 81.1 per cent. of total assets.

A developer holds most of its value in inventory and land rather than in productive fixed assets, and that land is carried at historic cost less impairment, which may differ materially from realisable value in either direction.

Total equity increased from RM95.2 million to RM108.5 million. Share capital was unchanged at RM60.0 million. Total financing was RM134.6 million, RM142.0 million and RM151.2 million, of which RM116.6 million was secured as at 31 December 2025.

Gross gearing was 1.41, 1.45 and 1.39 times. The current ratio of 2.40 times is high but reflects the classification of development inventory as a current asset and should not be read as liquidity, since development inventory cannot be converted to cash quickly.

Cash of RM22.8 million includes RM8.6 million held in Housing Development Accounts, applicable only to the developments concerned and unavailable to meet obligations under these Sukuk.

6.3 Consolidated statements of cash flows (summary)

	FY2023	FY2024	FY2025
Net cash generated from operating activities	14,200	8,600	22,400
Net cash used in investing activities	(9,800)	(8,200)	(11,600)
Net cash from/(used in) financing activities	(2,800)	(2,600)	(4,200)
<i>Net increase/(decrease) in cash and cash equivalents</i>	<i>1,600</i>	<i>(2,200)</i>	<i>6,600</i>
Cash and cash equivalents at beginning of year	16,800	18,400	16,200
Cash and cash equivalents at end of year	18,400	16,200	22,800

Net cash generated from operating activities was RM14.2 million, RM8.6 million and RM22.4 million. For a developer, operating cash flow reflects the balance between collections on sold units and expenditure on land and construction, and is therefore volatile; the FY2025

figure benefited from collections on the completing phase while land expenditure was modest.

Investors should not annualise FY2025. The commencement of phase 3, which this issue part-funds, will absorb cash for infrastructure and earthworks well before it generates any collections.

Investing and financing flows comprised land expenditure, project financing drawdowns and repayments, and dividends. Cash moved from RM18.4 million to RM16.2 million and then to RM22.8 million.

6.4 Selected financial ratios

Ratio	FY2023	FY2024	FY2025
EBITDA margin (times revenue, %)	18.8	14.8	19.6
Return on equity (%)	9.9	3.1	9.5
Total borrowings (RM'000)	134,600	142,000	151,200
Net debt (RM'000)	116,200	125,800	128,400
Gross gearing (times)	1.41	1.45	1.39
Net gearing (times)	1.22	1.28	1.18
Total borrowings / EBITDA (times)	6.1	9.2	6.1
EBITDA / finance costs (times)	3.3	2.1	3.3
Current ratio (times)	2.42	2.35	2.40

Gross gearing was 1.41, 1.45 and 1.39 times against a covenanted maximum of 2.00 times, and would be 1.49 times on a pro forma basis.

Financing to EBITDA was 6.1, 9.2 and 6.1 times. The FY2024 figure of 9.2 times exceeded the 8.00 times covenant applicable to these Sukuk, and investors should register that plainly: had this issue existed in FY2024, the Issuer would have been in breach of its leverage covenant. On the pro forma financing of RM160.8 million, a repeat of the FY2024 EBITDA of RM15.4 million would give 10.4 times.

EBITDA cover of finance costs was 3.3, 2.1 and 3.3 times against a covenanted minimum of 2.00 times. On the pro forma debt, a repeat of FY2024 would give approximately 1.9 times, also a breach.

The conclusion investors should draw is not that the covenants are inadequate but that they are live. A single weak year of the kind this Issuer has already experienced within the last three would trigger them, and the consequences of a breach are set out in Section 4.9.

Return on equity was 9.9, 3.1 and 9.3 per cent.

6.5 Pro forma effect of the issuance

The table below illustrates the effect of the issuance on the consolidated statement of financial position of the Issuer as at 31 December 2025, on the assumption that the issuance had been completed on that date and that the proceeds were applied in the manner described in Section 5. The pro forma information is presented for illustrative purposes only and does not purport to represent the actual financial position of the Issuer following the issuance.

	Audited as at 31 December 2025	Pro forma after issuance
Cash, bank balances and deposits	22,800	32,140
Total assets	331,400	340,740
Total financing	151,200	160,800
Total liabilities	222,900	232,500
Total equity	108,500	108,240
Gross gearing (times)	1.39	1.49
Total financing / EBITDA (times)	6.1	6.5

The pro forma assumes gross proceeds of RM12.0 million, application of RM2.4 million to prepayment of the bridging facility within thirty days of issue, and RM260,000 of offering expenses charged against equity.

Gross gearing would rise from 1.39 to 1.49 times and financing to EBITDA from 6.1 to 6.5 times, both within covenant on FY2025 earnings.

Investors should test the position against FY2024 rather than FY2025, as set out in Section 6.4. On the enlarged debt, a repeat of the FY2024 trough would breach both the leverage and the coverage covenants. That is the central credit consideration in this offering.

The pro forma reflects no contribution from phase 3, which is not expected to contribute to revenue recognition before FY2029.

6.6 Existing borrowings

As at 31 December 2025, the total borrowings of the Group amounted to RM151.2 million, comprising the facilities summarised below. The Issuer confirms that it has not defaulted on any payment of principal or profit in respect of any of its borrowings during the three financial years under review.

Facility	Outstanding (RM'000)	Maturity profile
Project financing – Nilai phases 1 and 2 (secured, at subsidiary level)	68,000	Repaid from sales proceeds, to 2029
Term financing – Sepang shophot investment properties (secured)	24,000	Semi-annual instalments to 2033
Revolving and working capital financing (unsecured)	12,000	Annual review
Bridging facility – phase 3 land (secured) and current portion of financing	47,200	Within 12 months
Total financing	151,200	

7. RISK FACTORS

Before making an investment decision, prospective investors should carefully consider all the information contained in this document, including in particular the risk factors set out below. The risks described are those which the Issuer currently considers material. They are not exhaustive, and additional risks not presently known to the Issuer, or which the Issuer currently considers immaterial, may also impair its business, financial condition and ability to meet its obligations under the Sukuk.

If any of the following risks materialises, the business, financial condition, results of operations and prospects of the Issuer could be materially and adversely affected. In such circumstances, the Issuer may be unable to pay profit on, or repay the nominal value of, the Sukuk, and investors may lose part or all of their investment.

7.1 Risks relating to the Issuer and the Sukuk

Credit risk

The Sukuk represent unsecured or, where applicable, secured obligations of the Issuer alone. Payment of profit and the repayment of the nominal value depend entirely upon the ability of the Issuer to generate sufficient cash flow from its operations, or to obtain sufficient funds from other sources, at the relevant times. Neither the Trustee, the Platform through which this offering was originated and distributed, nor any other party has guaranteed or assumed any obligation in respect of the payment obligations of the Issuer. In particular, investors should note that this offering was not underwritten and that no arranger stands behind it.

A deterioration in the operating performance of the Issuer, an adverse change in its capital structure, the loss of one or more significant customers or contracts, or an unexpected increase in its cost base could impair its ability to service the Sukuk. As at 31 December 2025, the Group had total borrowings of RM151.2 million against total equity of RM108.5 million, representing a gross gearing ratio of 1.39 times and total borrowings to EBITDA of 6.1 times.

Refinancing risk

The Sukuk are repayable in a single bullet payment at maturity, and the Issuer does not expect to accumulate a sinking fund sufficient to retire the full nominal amount from operating cash flow alone. The Issuer therefore expects to refinance all or a substantial part of the Sukuk at or before maturity. The ability of the Issuer to refinance will depend on conditions in the Malaysian debt capital and bank loan markets at the relevant time, on its credit standing and rating at that time, and on investor appetite for the sector in which it operates. There is no assurance that refinancing will be available on acceptable terms, or at all.

Profit rate risk

The Sukuk carry a fixed profit rate. The market value of fixed-rate debt securities generally moves inversely with prevailing market yields: if benchmark yields, including the yields on Malaysian Government Securities and Government Investment Issues, rise after the issue date, the market value of the Sukuk is likely to fall. Investors who sell the Sukuk before maturity may therefore realise less than the nominal value, and in adverse conditions materially less. Investors who hold the Sukuk to maturity are not exposed to this price risk, but bear the opportunity cost of being locked into a fixed profit rate for the tenure of the instrument.

The Issuer is separately exposed to profit rate risk on its floating-rate bank borrowings, which are typically priced against the relevant cost of funds of the lending institutions. An increase in the Overnight Policy Rate set by the central bank would increase the finance costs of the Group and reduce the headroom available under its profit cover covenant.

Liquidity risk of the Sukuk

The Sukuk will not be listed or quoted on any stock exchange, and the Platform does not operate an order book. Operating a venue that matches buyers and sellers of capital market products would require registration as a Recognized Market Operator, which the Platform has not yet obtained. Exit before maturity is therefore available only through the standing bid maintained by the Anchor Investor at the published formula price described in Section 9.5. That bid is a contractual undertaking of a single counterparty, not a market. It is capped at RM180,000 of nominal value in aggregate in any calendar month, may be suspended in the circumstances set out in Section 9.5, and terminates if the Anchor Investor ceases to hold at least half of its original allocation. Peer-to-peer transfer between investors is intended to follow in phase two once Recognized Market Operator registration is obtained, but no date is committed and investors should not subscribe in reliance on it. An investor who may need the money before 20 October 2030 should treat this offering as unsuitable.

Liquidity and working capital risk of the Issuer

The Issuer requires liquidity to fund its operations, service its debt and meet its capital commitments. As at 31 December 2025, the Group held cash and bank balances of RM22.8 million and recorded a current ratio of 2.40 times. An unexpected lengthening of the collection cycle, the withdrawal of uncommitted banking lines, or a requirement to post additional performance security could strain the liquidity position of the Group.

Rating risk

The Sukuk have been assigned a rating of A3 with a stable outlook by RAM Rating Services Berhad. A credit rating is an opinion on relative creditworthiness at a point in time and is not a recommendation to buy, sell or hold any security. The rating may be reviewed, placed on negative watch, downgraded or withdrawn at any time. A downgrade would be likely to reduce the price obtainable on a sale before maturity.

Subordination and structural risk

The Issuer undertakes each development through a separate project subsidiary which holds the land, borrows under the project financing secured on it, and operates the Housing Development Account for that project. The Issuer is substantially a holding company dependent on surplus distributions from those subsidiaries once their financiers and purchaser obligations are satisfied. In an insolvency of a project subsidiary, its financiers would be satisfied out of the project assets before any surplus reached the Issuer, and purchasers would hold

statutory claims in respect of monies paid. The Issuer has guaranteed RM38.4 million of project financing as at 31 December 2025, which would rank as an unsecured claim alongside the Sukuk if called.

Enforcement risk

In the event of a default, the ability of the Trustee to enforce on behalf of Sukukholders may be constrained by the time and cost of legal proceedings in Malaysia, by the availability and realisable value of any security, by the rights of preferential and secured creditors ranking ahead of the Sukuk, and by the terms of any court-sanctioned scheme of arrangement or judicial management order to which the Issuer may become subject. Recoveries following enforcement may be substantially less than the nominal value of the Sukuk and may be received only after considerable delay.

Modification and sukukholders decisions

The Trust Deed provides for meetings of Sukukholders to consider matters affecting their interests generally. Resolutions passed by the requisite majority at a duly convened meeting bind all Sukukholders, including those who did not attend or vote and those who voted against the resolution. The Trustee is also empowered, without the consent of Sukukholders, to agree to modifications of a formal, minor or technical nature or which are made to correct a manifest error.

7.2 Risks relating to the industry and operations of the Issuer

Cyclicality and lumpy earnings

Development revenue is recognised as construction progresses and therefore depends on both sales rate and construction stage. An issuer with a small number of concurrent projects cannot smooth those effects.

The three years presented demonstrate this directly: revenue of RM118.4 million, RM104.2 million and RM126.8 million, and profit of RM9.4 million, RM3.0 million and RM10.3 million. Investors should read FY2024 as the informative year, not FY2025, and should assume a comparable trough within the tenure of this issue.

In FY2024, EBITDA cover of finance costs fell to 2.1 times against the 2.00 times covenant applicable to these Sukuk, and financing to EBITDA reached 9.2 times against the 8.00 times covenant. A repeat on the enlarged post-issue debt would breach both.

Sales rate and purchaser mortgage approval

The Issuer sells to owner-occupier and first-time purchasers in Negeri Sembilan and southern Selangor, most of whom require mortgage financing. Sales conversion therefore depends on bank lending appetite, prevailing financing rates and household confidence rather than on the efforts of the Issuer.

Booking-to-conversion averaged 64 per cent. over the review period, and the Issuer regards this as the most sensitive operating variable in its business. A tightening of lending guidelines translates into cancelled bookings within weeks.

Unsold inventory and land holding cost

Property development costs and completed inventories stood at RM194.2 million as at 31 December 2025, being 58.6 per cent. of total assets. Completed unsold units and undeveloped land generate no revenue while incurring financing cost, quit rent, assessment and maintenance.

The Issuer holds a land bank of 218 acres in Negeri Sembilan with an estimated development period exceeding eight years at current absorption rates. A prolonged downturn would extend that period and could require the write-down of land carried at cost.

Construction cost and contractor failure

The Issuer engages third-party main contractors under fixed-price contracts, which transfer cost inflation risk only while the contractor remains solvent. Contractor failure mid-project causes delay, re-tendering at prevailing prices, and exposure to liquidated damages payable to purchasers.

Cement, steel, aggregate and labour costs have risen materially in recent years and construction labour availability has been constrained by foreign worker policy. The Issuer replaced a main contractor on the phase 2 development in 2024, delaying delivery of one block by five months.

Geographic and project concentration

All active developments are located in Nilai and Seremban in Negeri Sembilan, together with one shophot development in Sepang, Selangor. The Issuer has no geographic diversification and is fully exposed to a single sub-market, to the transport infrastructure decisions affecting it, and to competing supply in the same corridor.

Phase 3, which this issue part-funds, will represent the majority of the development pipeline of the Issuer once launched.

Project financing dependence

Each development is funded by project financing secured on the land and work in progress, at 77.1 per cent. of total financing. The Issuer depends on continued bank appetite for property development lending, which has contracted periodically in Malaysia. A withdrawal of appetite would prevent the commencement of new phases regardless of demand for the units.

Defect liability and reputation

The Issuer bears defect liability for twenty-four months from delivery of vacant possession under statutory sale and purchase agreements. Significant defects generate rectification cost and claims, and damage sales at subsequent phases of the same development, where purchasers can inspect the earlier phase directly.

7.3 Regulatory and compliance risks

Changes in law, regulation and government policy

The Issuer requires a developer licence and advertising and sale permits for each development under Malaysian housing development legislation, subject to conditions on project delivery, operation of Housing Development Accounts, sale documentation and defect liability. Suspension of a licence or refusal of a permit would prevent the sale of units in the affected development.

Planning approvals, development orders, building plan approvals, land use conversion and certificates of completion and compliance are granted by state and local authorities on timelines outside the control of the Issuer. Approval periods in Negeri Sembilan have lengthened over the past three years, and delay extends the period over which land is held without generating revenue.

Bumiputera quota requirements and affordable housing obligations differ by state and materially affect achievable pricing and sales velocity. Changes to quota levels, required discounts, or release conditions for unsold quota units would affect returns.

Liquidated ascertained damages are payable to purchasers for late delivery under statutory sale and purchase agreements. This is a quantifiable exposure on any delayed project and is not within the control of the Issuer where delay arises from approvals or contractor failure.

Government policy on housing affordability, stamp duty, real property gains tax and lending guidelines has changed frequently in Malaysia and affects demand directly. Tightening of central bank lending guidelines has historically reduced sales conversion within a single quarter.

As a Main Market listed issuer the Issuer is subject to the Main Market Listing Requirements, including continuing disclosure, related party transaction approval and the financial condition provisions applicable to listed issuers.

Taxation

Statements in this document concerning taxation are based on the laws and practice in force at the date of this document. Changes in tax legislation, in the interpretation or administration of tax legislation by the Inland Revenue Board, or in the availability of incentives currently enjoyed by the Group could increase the effective tax rate of the Group and reduce the cash flow available for debt service. Prospective investors should consult their own tax advisers as to the tax consequences of acquiring, holding and disposing of the Sukuk.

Anti-money laundering and sanctions

The Group is subject to anti-money laundering, counter-terrorism financing and sanctions regimes applicable in Malaysia and in the jurisdictions in which it operates or into which it sells. A failure by the Group or its counterparties to comply with these regimes could result in fines, restrictions on banking relationships and reputational damage.

7.4 Operational risks

Dependence on key personnel

The performance of the Group depends to a significant extent on the continued service of its senior management team and of technical and operational personnel with specialised experience. Competition for such personnel in Malaysia is intense. The loss of one or more members of senior management, or an inability to attract and retain suitably qualified staff, could disrupt operations and impair the ability of the Group to execute its strategy.

Information technology and cyber security

The Group relies on information technology systems for its operational, financial and customer-facing processes. A material failure of these systems, a successful cyber intrusion, a ransomware incident or a breach of personal data protected under applicable data protection legislation could interrupt operations, expose the Group to regulatory penalties and civil claims, and damage its reputation.

Insurance

The Group maintains insurance cover which it considers appropriate for its operations, including property damage, business interruption, public liability and, where relevant, contractors' all risks cover. However, such cover is subject to policy limits, deductibles and exclusions, and certain risks are not commercially insurable. A loss which is uninsured, underinsured or excluded could have a material adverse effect on the financial condition of the Group.

Litigation and disputes

The Group is, from time to time, party to claims and disputes arising in the ordinary course of business. As at the date of this document, the Directors are not aware of any pending or threatened litigation which, if determined adversely, would have a material adverse effect on the financial condition of the Group. There is no assurance that material claims will not arise in future.

Related party transactions

The Group enters into transactions with related parties in the ordinary course of business. Although the Directors are of the view that such transactions are conducted on arm's length terms and on a basis not more favourable to the related party than to an unrelated third party, there is a risk that the terms of such transactions may differ from those which could be obtained from independent parties.

7.5 Forward-looking statements

This document contains forward-looking statements, including statements regarding the intentions, beliefs and current expectations of the Issuer concerning its results of operations, financial condition, liquidity, prospects, growth and strategy. Words such as anticipates, believes, estimates, expects, intends, may, plans, projects and targets, and similar expressions, are intended to identify such statements. Forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and assumptions. Actual results may differ materially from those expressed or implied. The Issuer does not undertake any obligation to update or revise any forward-looking statement, save as required by law or by the terms of the Transaction Documents.

8. INVESTOR FREQUENTLY ASKED QUESTIONS

The questions and answers below are provided for the convenience of prospective investors and are intended as a plain-language guide only. They do not form part of the terms and conditions of the Sukuk and are qualified in their entirety by the detailed provisions of this document and of the Transaction Documents. In the event of any inconsistency, the Transaction Documents shall prevail.

What is the profit rate, and how is it determined?

The profit rate is 6.20 per cent. per annum on nominal value, fixed for four years. That is RM3.10 per RM100 held every six months, or RM6.20 a year. Under the Murabahah structure the total profit is fixed at the outset and cannot vary with the performance of the Issuer. The rate reflects the A3 rating, which sits toward the lower end of the investment grade range, and the cyclicity of property development described in Section 7.2.

How often are payments made, and when will I receive them?

Profit is paid semi-annually in arrears in arrears on 20 April and 20 October of each year, with the first payment falling due on 20 April 2027 and the final payment falling due on the maturity date, 20 October 2030. Payments are made to the persons shown in the records of the depository at the close of business on the relevant record date, which falls two business days before the payment date. Payments are credited directly through RENTAS; no physical certificates are issued and no coupons need to be presented.

When will I get my principal back?

The full RM100 per RM100 of nominal value is repaid on 20 October 2030 together with the final profit payment. There is no amortisation. The Issuer may call the whole issue from the second anniversary at a small premium.

What happens if the Issuer defaults?

A default arises if the Issuer fails to pay any amount due within the applicable grace period, breaches a financial covenant, breaches another material obligation and fails to remedy it within the cure period, becomes subject to insolvency proceedings, or triggers one of the other events of default described in Section 4.9. Upon a continuing event of default, the Trustee may, and must if directed by an extraordinary resolution of Sukukholders, accelerate the Sukuk so that the full nominal value and accrued profit become immediately due and payable.

The Sukuk are unsecured, so the Trustee would prove in a winding-up rather than enforce security, and investors should weigh three features of a developer's balance sheet. First, 77.1 per cent. of the financing of the Issuer is secured on its land and work in progress and ranks ahead. Second, purchaser monies in Housing Development Accounts, RM8.6 million as at 31 December 2025, are ring-fenced by statute and unavailable to any creditor. Third, a partially built development is worth far less than a finished one, so recovery depends on whether projects can be completed rather than liquidated. The unencumbered asset covenant at 130 per cent. of unsecured debt is the principal protection, and the project account undertaking is intended to capture development surpluses as they are released.

Individual investors do not enforce directly. The Trustee acts on behalf of all Sukukholders collectively, which prevents a disorderly race to enforce and ensures that any recoveries are distributed rateably in accordance with the priority of payments set out in the Trust Deed.

Is this issuance Shariah compliant?

Yes. The structure is Murabahah effected through a Tawarruq arrangement: Sukukholders, through the Trustee, purchase Shariah-compliant commodities and sell them to the Issuer at a deferred price comprising nominal value plus an agreed profit. The deferred sale price is the obligation owed to investors. The structure has been reviewed and approved by Ibnu Hakim Shariah Advisory Sdn Bhd. Investors should consult their own Shariah advisers.

What are the main risks I should focus on?

The Issuer would direct attention to five risks in particular. First, credit risk: repayment depends entirely on the Issuer, and the Sukuk benefit from no third-party guarantee. Second, refinancing risk: the Sukuk repay in a single bullet payment at maturity and the Issuer expects to refinance rather than fully amortise from operating cash flow. Third, profit rate risk: the rate is fixed, so the market value of the Sukuk will fall if benchmark yields rise. Fourth, liquidity risk: the Sukuk are unlisted, secondary market trading may be thin, and investors should be prepared to hold to maturity. Fifth, the sector-specific risks described in Section 7.2, which for the Issuer principally concern the cyclicity and lumpiness of development earnings, sensitivity of sales rates to interest rates and mortgage approval, construction cost inflation and contractor failure, holding costs on unsold inventory and undeveloped land, dependence on planning and development approvals, and liquidated damages exposure on late delivery. Section 7 should be read in full.

How will the proceeds be used?

The gross proceeds of RM12.0 million will be applied as set out in Section 5: RM5.8 million to infrastructure and earthworks for Lembah Impian phase 3, RM3.2 million to construction working capital, RM2.4 million to refinancing a bridging facility, RM340,000 to general working capital, and RM260,000 to the expenses of the offering including the Platform origination fee.

What is the credit rating, and what does it mean?

RAM Rating Services Berhad has assigned a rating of A3 with a stable outlook to the Sukuk. On the rating scale of the agency, an A rating denotes adequate capacity to meet financial obligations, with greater susceptibility to adverse changes in circumstances and economic conditions than obligations rated in the AA and AAA categories. The numerical modifier 3 indicates the lower end of that band, immediately above the BBB category and therefore toward the lower end of investment grade. A rating is an opinion on relative creditworthiness at a given point in time. It is not a recommendation to buy, sell or hold, it does not comment on the market price or suitability of the instrument for any particular investor, and it may be reviewed, downgraded or withdrawn at any time.

Who can invest, and in what amounts?

The Sukuk are issued in denominations of RM1,000 nominal value. Fractional interests in the Sukuk are made available through the Tokenkan platform, under which an investor may subscribe for an interest of not less than RM100 and in increments of RM1 thereafter. The platform operator holds the underlying Sukuk and records the fractional entitlement of each investor. An investor holding a fractional interest is entitled to the corresponding share of each profit payment and of the redemption proceeds, but is not the registered holder of the Sukuk and exercises rights under the Trust Deed through the platform operator.

Are the Sukuk secured?

No. This is unsecured, and Section 4.6 explains why: the assets capable of bearing security are already charged to project financiers, at RM116.6 million out of RM151.2 million of total financing. The negative pledge also permits the Issuer to keep charging new development land ahead of Sukukholders, so it should not be read as freezing the position. The substantive protections are the unencumbered asset covenant at 130 per cent., the project account undertaking, the connected party valuation requirement and the dividend restriction.

Where do I rank against other creditors?

Sukukholders rank as senior unsecured creditors, equally with each other and with the Anchor Investor. They rank behind RM116.6 million of secured project financing to the extent of its security, behind preferential claims, and are structurally subordinated to the creditors of the project subsidiaries. Housing Development Account monies belong to purchasers and sit outside the reach of all creditors.

Can the Issuer redeem early, and what would I receive?

The Issuer may call the whole issue from the second anniversary at 101.00 per cent. of nominal value, falling to 100.50 per cent. from the third. Investors have a put right on a change of control, and a mandatory redemption applies to the proceeds of large land disposals not reinvested. Otherwise the only exit is a sale into the Anchor Investor standing bid described in Section 9.5, which is discounted, capped at RM180,000 a month and may be suspended.

How is my investment taxed?

The tax treatment of profit depends on the residence, legal form and tax status of the investor. Withholding tax may apply to payments made to certain non-resident investors, subject to any relief available under an applicable double taxation agreement. Certain classes of Malaysian institutional investors enjoy exemptions in respect of profit income from ringgit-denominated sukuk. The Issuer does not provide tax advice, and prospective investors should consult their own advisers.

How will I be kept informed after issuance?

The Issuer is required under the Trust Deed to deliver to the Trustee its audited consolidated financial statements within 120 days of each financial year end and its unaudited semi-annual accounts within 90 days of each half year end, together with a compliance certificate confirming observance of the financial covenants. The Issuer must also notify the Trustee promptly of any event of default or potential event of default, and of any development which would have a material adverse effect. The rating agency conducts a formal review of the rating at least annually.

Can I sell before maturity?

Fractional interests may be offered for sale through the matching facility operated by the Tokenkan platform, and the platform may also quote an indicative price at which it is prepared to take the position. Investors should understand clearly that this is not a listed market and that no party is obliged to buy. Whether a sale can be effected, and at what price, depends on the presence of a willing counterparty, on prevailing market yields and on the credit standing of the Issuer at the time; the price may be above or below the nominal value. An investor who is unable to sell should expect to hold to maturity, at which point the full nominal value becomes payable.

What happened in FY2024?

Revenue fell from RM118.4 million to RM104.2 million and profit from RM9.4 million to RM3.0 million. The cause was timing rather than distress: the phase 1 development at Nilai completed in the first half of the year while phase 2 had not yet reached the construction stages that generate material revenue recognition, so the Issuer had a gap.

This is normal for a developer with a small number of concurrent projects and investors should expect it to recur within the four-year tenure. The number that matters in a trough is coverage. EBITDA cover of finance costs fell to 2.1 times in FY2024 against a covenanted minimum of 2.00 times, and financing to EBITDA rose to 9.2 times against a maximum of 8.00 times, which would have been a breach had this issue and its covenants been in place. Section 6.4 sets out what a repeat would look like on the enlarged debt, and it is the single most important passage in this document.

Where can I obtain further information?

Copies of the Trust Deed, the other Transaction Documents, the audited financial statements of the Issuer for the three financial years covered by this document, the rating letter and the Shariah pronouncement and the constitution of the Issuer are available for inspection at the registered office of the Issuer during normal business hours for the period during which the Sukuk remain outstanding. Enquiries may be directed to the Registrar and Paying Agent, Tokenkan Capital Sdn Bhd.

9. ORIGATION, ALLOCATION AND THE PLATFORM

9.1 How this offering was originated

This offering was originated directly by the Issuer through Tokenkan Capital Sdn Bhd, which operates the Tokenkan platform. No investment bank has acted as lead arranger, lead manager or underwriter.

The Issuer is a company listed on the Main Market of Bursa Malaysia with a market capitalisation of RM142.6 million. An issue of this size could not have carried the fixed cost of a conventional bond issuance, in which rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are incurred at broadly the same magnitude whether a company raises RM5 million or RM50 million. The Platform exists to compress that cost base, and this document should be read as the product of that compression.

What the Platform does

The Platform structured this offering, prepared this document with the Issuer, conducted the credit review summarised in Section 6, set the indicative pricing range in consultation with the Anchor Investor, and distributes the sukuk to retail investors. It maintains the register of holders and pays the periodic distributions.

What the Platform does not do

The Platform does not issue or hold the sukuk. Token issuance and custody are performed by Sentinel Digital Custody Sdn Bhd, a Digital Asset Custodian registered with the Securities Commission Malaysia. The Platform has no ability to move, encumber or apply an investor's holding, and an investor's entitlement does not form part of the assets of the Platform.

The Platform does not underwrite this offering. It has given no commitment to subscribe for any portion not taken up, and holds none of the sukuk on its own account. Section 5.5 sets out what happens if the offering does not reach its minimum.

The Platform does not operate an exchange or an order book, and does not match buyers with sellers. Section 9.5 describes the only exit mechanism available at launch.

The Platform is not an adviser to investors. It is remunerated by the Issuer as set out in Section 5.2, and it charges investors a transaction fee on purchases and sales. Its remuneration therefore rises with both the size of the offering and the volume of investor activity. Investors should weigh this when reading any material prepared by the Platform, including the automated explanatory tools available on it, which are provided for convenience, are grounded in this document, and do not constitute advice or a recommendation.

The Platform does not guarantee the obligations of the Issuer. On a default, the recourse of investors is to the Issuer through the Trustee, as set out in Section 4.9, and not to the Platform.

9.2 Parties independent of the Issuer and the Platform

The following functions are performed by parties independent of both the Issuer and the Platform, and their independence is the substance of the protection they provide:

- the Digital Asset Custodian, which issues and safekeeps the holdings and maintains records independently of the Platform;
- the Trustee, which holds the benefit of the covenants for investors, monitors compliance, convenes meetings of holders and enforces on their instruction. It is remunerated by the Issuer but owes its duties to holders;
- the Auditor, which audited the financial statements from which Section 6 is drawn;
- the Solicitors, who advised on the Transaction Documents; and
- where applicable, the Rating Agency, the Shariah Adviser and the Independent Valuer.

Neither the Issuer nor the Platform may remove or replace the Trustee or the Digital Asset Custodian without the consent of holders by extraordinary resolution.

9.3 Fractional holding

Investors hold fractional interests recorded by the Digital Asset Custodian and reflected in the register maintained by the Platform. A fractional interest carries the same economic entitlement, proportionate to its size, as a whole unit of nominal value, and the same right to vote at meetings of holders. It is not a separate class and is not subordinated.

9.4 The Anchor Investor and allocation of this issue

This issue is not distributed wholly to retail investors. It is allocated as follows:

Allocation	Nominal value	Proportion
Anchor Investor	RM8,400,000	70.0%
Retail investors through the Platform	RM3,600,000	30.0%
Total	RM12,000,000	100.0%

The Anchor Investor for this issue is Meridian Credit Opportunities Fund I, a professional credit fund. Investors should understand why this structure exists and what it does and does not do for them.

What the Anchor Investor provides

It provides credit validation that an unproven platform cannot supply about itself. The Anchor Investor conducted its own credit assessment of the Issuer, independently of the Platform, and committed to its allocation on the basis of that assessment. A professional

credit investor taking 70.0% of the issue at the same price and on the same terms as retail investors is a meaningful signal, and it is the principal comfort available to a retail subscriber to a small unlisted issue of this kind.

It also provides the standing bid described in Section 9.5, which is the only route by which a retail investor can exit before maturity.

What it does not provide

The Anchor Investor does not guarantee the obligations of the Issuer and has no liability to retail investors if the Issuer defaults. It ranks equally with retail holders, not behind them, so it bears loss alongside them rather than ahead of them.

It is not an underwriter. It has committed to its own allocation only, and will not absorb any part of the retail tranche which is not taken up.

Investors should also note that the Anchor Investor participated in setting the pricing of this issue. Its interest in obtaining a higher return is not aligned with the interest of a retail subscriber, although both pay the same price for the same instrument.

9.5 The standing bid, and its limits

The Anchor Investor has undertaken to the Trustee to maintain a standing bid for sukuk held by retail investors, at a price determined by the formula published on the Platform and set out in the Standing Bid Agreement, which is available for inspection under Section 10.3.

The formula prices the sukuk by discounting the remaining scheduled payments at a reference yield, being the yield on Malaysian Government Securities of comparable remaining tenure plus the credit spread at which this issue was priced, and then applying a discount of 1.25 per cent. to reflect the cost of the Anchor Investor providing the facility. The formula is mechanical and is not a negotiation.

Investors should be clear about four limitations:

- **The price is not the nominal value.** Because the formula responds to prevailing yields, an investor selling into the standing bid when yields have risen will receive less than RM100 per RM100 of nominal value, and in adverse conditions materially less. The discount of 1.25 per cent. applies in every case, including when yields have not moved.
- **The bid is capped.** The Anchor Investor is obliged to purchase not more than RM180,000 of nominal value in aggregate in any calendar month. If retail investors seek to sell more than that in a month, requests are met in the order received and the balance carries to the following month.
- **The bid may be suspended.** The undertaking is suspended while an event of default is continuing, during the fifteen business days before and after a periodic payment date, and where the Anchor Investor is prevented from dealing by applicable law. Investors should note that the first of these means the standing bid is least likely to be available at precisely the moment they most want to sell.
- **The bid terminates.** The undertaking ends if the Anchor Investor ceases to hold at least half of its original allocation, on its insolvency, or at the maturity date. If it terminates before maturity, investors have no exit mechanism at all until Recognized Market Operator registration is obtained, and there is no assurance as to when that will occur.

The Trustee monitors compliance with the Standing Bid Agreement and reports on it in the periodic reporting published through the Platform.

9.6 Position limits

The Platform applies limits on the exposure a retail investor may take to any single issuer, in order to prevent a concentrated loss on a single small credit. An investor may not hold more than RM25,000 in nominal value of the sukuk of any one issuer, nor more than twenty-five per cent. of the aggregate value of their holdings across the Platform in any one issuer.

Investors should treat these limits as a floor on prudence rather than a substitute for it. The limits are set by the Platform and may be varied. They do not imply that an investment at the limit is suitable.

9.7 What happens if the Platform ceases to operate

The entitlements of investors do not depend on the continued operation of the Platform. Holdings are issued and safekept by the Digital Asset Custodian, which is registered with the Securities Commission Malaysia and subject to its own regulatory obligations, and the register is replicated daily to the Trustee.

If the Platform ceases to operate, the Trustee is empowered under the Trust Deed to appoint a replacement registrar and paying agent, and the obligations of the Issuer to holders are unaffected. Investors should nonetheless expect the practical consequences to include the suspension of the standing bid facility, since it is administered through the Platform, and a period during which distributions may be delayed while arrangements are transferred.

10. CORPORATE DIRECTORY AND STATUTORY INFORMATION

10.1 The Issuer

Registered name	Lembah Impian Development Bhd
Registration number	Registration No. 200401022518 (654187-P)
Registered office	Suite 9-2, Menara Impian, Jalan Tun Razak, 50400 Kuala Lumpur, Malaysia
Business address	Galeri Jualan Lembah Impian, Jalan Lembah Utama, 71800 Nilai, Negeri Sembilan, Malaysia
Date and place of incorporation	Incorporated in Malaysia on 14 July 2004 as a private limited company, converted to a public company on 3 May 2012 and listed on the Main Market of Bursa Malaysia on 18 October 2012
Financial year end	31 December
Company secretary	Ooi Bee Hoon (MAICSA 7043918)

10.2 Advisers and transaction parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Shariah Adviser	Ibnu Hakim Shariah Advisory Sdn Bhd
Rating Agency	RAM Rating Services Berhad
Auditor	Sim Abdullah & Associates PLT
Solicitors	Krishnan Yeoh & Partners
Independent Valuer	Chandra Nakamura Valuers Sdn Bhd
Anchor Investor	Meridian Credit Opportunities Fund I, a professional credit fund managed by Meridian Capital Partners Sdn Bhd
Auditors	Sim Abdullah & Associates PLT (AF 1382)
Solicitors	Krishnan Yeoh & Partners
Rating agency	RAM Rating Services Berhad

10.3 Documents available for inspection

For so long as any Sukuk remain outstanding, copies of the following documents may be inspected at the registered office of the Issuer during normal business hours on any business day:

- the constitution of the Issuer;
- the audited consolidated financial statements of the Issuer for the three financial years covered by Section 6, together with the reports of the auditors thereon;
- the Trust Deed and the other Transaction Documents;
- the rating letter issued by RAM Rating Services Berhad in respect of the Sukuk;
- the pronouncement of the Shariah Adviser in respect of the structure of the Sukuk; and
- the material contracts referred to in this document.

10.4 Responsibility statement

The Directors of the Issuer have seen and approved this document. They collectively and individually accept full responsibility for the accuracy of the information contained in it, and confirm that, having made all reasonable enquiries, and to the best of their knowledge and belief, there are no other facts the omission of which would make any statement in this document misleading.

10.5 Consents

The Trustee, Amanah Wilayah Trustee Berhad, the auditors, Sim Abdullah & Associates PLT (AF 1382), and the solicitors, Krishnan Yeoh & Partners, the rating agency, RAM Rating Services Berhad, Ibnu Hakim Shariah Advisory Sdn Bhd, as Shariah Adviser, have each given and have not withdrawn their written consent to the inclusion in this document of their names and, where applicable, of their reports and opinions in the form and context in which they appear. Tokenkan Capital Sdn Bhd has given and has not withdrawn its written consent to the inclusion of its name as Originating Platform, Registrar and Paying Agent, and Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia has given and has not withdrawn its written consent to the inclusion of its name as Digital Asset Custodian.
