

Suria Teknik Bhd

Registration No. 201701034692 (1249873-M)
(Incorporated in Malaysia)

GREEN SRI SUKUK MURABAHAH

RM8,000,000 in nominal value

Rated BBB+ (stable) by Malaysian Rating Corporation Berhad

Shariah compliant — Murabahah via Tawarruq

Green SRI sukuk — commercial and industrial rooftop solar

65% taken by a professional credit fund as Anchor Investor

Retail tranche RM2.8 million — fractional from RM100

Instrument	Green SRI Sukuk Murabahah
Programme size	RM40,000,000 in nominal value
Nominal value of this issue	RM8,000,000
Anchor Investor allocation	RM5,200,000 (65.0%)
Retail tranche	RM2,800,000 (35.0%)
Minimum investment	RM100 (fractional)
Maximum single-issuer holding	RM15,000 per investor
Tenure	5 years from the issue date
Profit rate	6.80 per cent. per annum, fixed
Profit payment frequency	Semi-annually in arrears
Credit rating	BBB+ / stable outlook — the lowest investment grade band
Issue date	12 August 2026
Maturity date	12 August 2031
Exit before maturity	Anchor Investor standing bid only — see Section 9.5

THIS OFFERING IS MADE TO RETAIL INVESTORS THROUGH THE TOKENKAN PLATFORM IN FRACTIONAL DENOMINATIONS FROM RM100. IT IS NOT A DEPOSIT. IT IS NOT PROTECTED BY PERBADANAN INSURANS DEPOSIT MALAYSIA. THE CAPITAL INVESTED IS AT RISK AND MAY NOT BE RETURNED IN FULL. RETURNS ARE NOT GUARANTEED AND DEPEND ON THE ISSUER CONTINUING TO MEET ITS OBLIGATIONS. THE ISSUER IS A SMALL COMPANY AND THIS IS A SMALL ISSUE; INVESTORS SHOULD EXPECT GREATER CREDIT RISK AND LESS LIQUIDITY THAN ON A LARGE INSTITUTIONAL ISSUANCE. EXIT BEFORE MATURITY IS AVAILABLE ONLY THROUGH THE ANCHOR INVESTOR STANDING BID DESCRIBED IN SECTION 9.5, WHICH IS SUBJECT TO LIMITS AND MAY BE SUSPENDED. THE TOKENKAN PLATFORM IS NOT AN EXCHANGE. NOTHING IN THIS DOCUMENT IS INVESTMENT ADVICE OR A RECOMMENDATION. PROSPECTIVE INVESTORS SHOULD READ THIS DOCUMENT IN FULL, AND IN PARTICULAR THE RISK FACTORS IN SECTION 7, AND SHOULD INVEST ONLY WHAT THEY CAN AFFORD TO LOSE. THIS ISSUE IS RATED BBB+, THE LOWEST INVESTMENT GRADE BAND. A DOWNGRADE OF ONE NOTCH WOULD PLACE IT BELOW INVESTMENT GRADE. THE ISSUER DERIVES TWO THIRDS OF ITS REVENUE FROM ENGINEERING CONTRACTING, WHICH IS ORDER-BOOK DEPENDENT AND NOT CONTRACTED RECURRING INCOME. INVESTORS SHOULD READ SECTION 7.2.

1. EXECUTIVE SUMMARY

1.1 Overview of the Issuer

Suria Teknik Bhd designs and installs solar photovoltaic systems for commercial and industrial customers in Malaysia, and owns and operates a portfolio of 46 rooftop installations totalling 28 MWac from which it sells energy under corporate power purchase agreements.

The Issuer has been listed on the ACE Market of Bursa Malaysia since March 2023 and had a market capitalisation of RM94.8 million as at 30 June 2026. It employed 168 persons as at 31 December 2025.

For the financial year ended 31 December 2025 the Issuer recorded revenue of RM94.2 million, EBITDA of RM15.38 million and profit for the financial year of RM6.20 million. Total assets stood at RM109.1 million and shareholders' funds at RM36.8 million.

1.2 Purpose of the offering

The Issuer is offering RM8,000,000 in nominal value of Green SRI Sukuk Murabahah, the inaugural issue under its RM40.0 million Green Sukuk Programme. Of that, RM5,200,000 is allocated to the Anchor Investor and RM2,800,000 to retail investors through the Tokenkan platform in fractional denominations from RM100, subject to a maximum holding of RM15,000 per investor.

Proceeds will fund the construction of a 12 MWac owned rooftop portfolio, working capital for the engineering order book, refinancing and general working capital. Section 5 has the detail.

1.3 What this Issuer actually is

The name and the green label both suggest an energy company. Two thirds of the revenue says otherwise, and investors should be clear about the distinction before subscribing.

In FY2025 the Issuer earned RM62.8 million, being 66.7 per cent. of revenue, from installing solar systems for third parties as an engineering contractor. It earned RM24.6 million, being 26.1 per cent., from selling energy generated by systems it owns.

Those businesses carry opposite risks. Contracting is cash-generative and low-capital but lives on an order book that must be continually replenished; the order book stood at RM48.4 million at year end, roughly nine months of contracting revenue. Owned energy assets are capital-hungry but produce contracted revenue for eight to eighteen years.

This issue funds a deliberate shift toward the second: RM4.6 million builds a 12 MWac owned portfolio. Investors are financing that transition and bearing the contracting risk while it takes place. The portfolio will not be fully commissioned before 2029; profit payments begin in February 2027.

1.4 Why this issuance exists

A conventional RM8.0 million bond issuance is not economic. Fixed costs of RM1.4 million to RM1.9 million, largely irrespective of size, would consume 18 to 24 per cent. of the proceeds. The total cost of this issuance is RM240,000, being 3.0 per cent. of nominal value.

1.5 Key investment highlights

Strong revenue growth from a real market

Revenue grew 26.0 per cent. and 19.8 per cent. over the last two years on genuine commercial and industrial demand for rooftop solar, driven by corporate emissions commitments and electricity tariff levels.

Margin improving as owned assets grow

The EBITDA margin rose from 12.9 to 16.3 per cent. as higher-margin owned energy sales displaced contracting in the mix.

Contracted energy revenue of long duration

The existing 28 MWac portfolio sells under agreements of eight to eighteen years remaining, across 38 separate offtakers, limiting the effect of any single loss.

Moderate leverage with covenant headroom

Gross gearing of 1.21 times against a 1.75 times covenant, and financing to EBITDA of 2.9 times against 4.50 times.

Green framework with independent assessment

Application of proceeds is assessed against the SRI framework of the Issuer by an independent green assessor, with annual reporting through the Platform.

1.6 Key risks

A summary only. Section 7 must be read in full.

- **BBB+ is the lowest investment grade band.** One notch down is sub-investment grade.
- **Nine months of order book.** Two thirds of revenue depends on contracts not yet won.
- **Contracting margin compressing.** Gross margin on contracting fell from 19.4 to 17.8 per cent. under competition.
- **Weak cash conversion.** Operating cash flow converted at only 59.8 per cent. of EBITDA, because growth absorbs cash into receivables and inventory.
- **RM28.2 million of contract receivables,** roughly 109 days, with retention sums released only after defects liability expires.
- **Unsecured, behind RM34.4 million** of secured financing over the installations and factory.

- **Offtaker credit risk.** Energy is sold to private companies, not a utility.
- **Warranty and performance guarantees** on installed systems, with a RM1.8 million provision carried.
- **Module price volatility** of more than thirty per cent. in a year on multiple past occasions, borne by the Issuer on fixed-price contracts and on RM9.6 million of inventory.
- **Funded portfolio arrives late.** Not fully commissioned before 2029 against payments from February 2027.
- **Exit is limited.** Only the Anchor Investor standing bid, at a 1.50 per cent. discount to formula, capped at RM140,000 monthly and suspended while a default continues.

1.7 Summary financial information

RM'000	FY2023	FY2024	FY2025
Revenue	62,400	78,600	94,200
EBITDA	8,080	11,640	15,380
Profit for the financial year	2,280	4,180	6,200
Total assets	73,000	89,600	109,100
Total liabilities	46,600	59,020	72,320
Total equity	26,400	30,580	36,780
Total financing	28,800	36,600	44,400
Net cash from operating activities	5,400	6,800	9,200
Gross gearing (times)	1.09	1.20	1.21
EBITDA / finance costs (times)	3.0	3.6	4.0

1.8 Operating statistics

	FY2023	FY2024	FY2025
Owned rooftop capacity at year end (MWac)	16	22	28
Owned installations at year end	26	36	46
Corporate offtakers	22	30	38
Contracting order book at year end (RM million)	31.2	42.6	48.4
Contracting gross margin (%)	19.4	18.6	17.8
Owned energy revenue as % of total	22.8	24.7	26.1
Generation against P50 forecast (%)	99.2	100.4	97.8

2. ISSUER BACKGROUND

2.1 History and development

The Issuer was incorporated in October 2017 by Lau Wei Sheng, who had spent the preceding decade in electrical contracting and renewable project development, to install rooftop solar for commercial and industrial customers as Malaysian net energy metering programmes opened.

The Issuer grew initially as a pure contractor. It began retaining ownership of installations in 2021, funding them with project financing and selling the energy to the building occupier under a corporate power purchase agreement, an arrangement that suits customers unwilling to fund a solar system themselves. It listed on the ACE Market in March 2023, raising RM18.6 million, of which RM12.4 million funded owned installations.

The owned portfolio has grown from 16 MWac at the end of FY2023 to 28 MWac at the end of FY2025. This is the inaugural debt issuance of the Issuer.

2.2 Business model

The Issuer operates two businesses that share an engineering capability.

In the first, it designs, procures and installs a solar system for a customer who pays for it, earning a contracting margin on delivery. This requires little capital, generates cash on completion, and depends entirely on winning the next contract.

In the second, it builds a system at its own cost on a customer's roof and sells the energy produced to that customer under an agreement of typically fifteen to twenty years at a tariff below the prevailing grid rate. This requires substantial capital, produces contracted revenue for many years, and is funded with project financing secured on the installation.

The strategic logic of the second model is that it converts a one-off contracting margin into a long-dated income stream, which is what a credit investor values. The strategic difficulty is that it consumes capital the Issuer does not generate internally, which is the purpose of this issue.

2.3 Revenue segments

Segment (RM'000)	FY2023	FY2024	FY2025
Engineering, procurement and construction contracting	42,600	53,200	62,800
Owned rooftop energy sales under corporate PPAs	14,200	19,400	24,600
Operation and maintenance services	4,800	5,200	5,800
Other	800	800	1,000
Total revenue	62,400	78,600	94,200

2.4 The owned portfolio

Tranche	Installations	Capacity	PPA remaining term
Suria Atap Satu (charged to project financiers)	28	17 MWac	8 to 15 years
Suria Atap Dua (charged to project financiers)	18	11 MWac	12 to 18 years
Portfolio funded by this issue (to be constructed)	approx. 20	12 MWac	18 to 20 years on commissioning
Total on completion	approx. 66	40 MWac	

Installations are located on manufacturing, warehousing and retail premises across Selangor, Penang, Johor and Negeri Sembilan. All operations are in Malaysia and all revenue is in ringgit; module and inverter purchases are denominated principally in United States dollars and renminbi, creating the exposure described in Section 7.4.

Investors should note that both existing tranches are charged to their project financiers, which is why these Sukuk are unsecured, and that the assignment of receivables described in Section 4.6 relates to the unencumbered part of the portfolio only.

2.5 Management and employees

The Issuer employed 168 persons as at 31 December 2025, of whom 96 were installation and site personnel, 28 in engineering and design, 22 in operation and maintenance, and 22 in corporate functions. Installation labour is supplemented by subcontractors during peak periods.

2.6 Strategy

The strategy is to shift the revenue mix toward owned energy assets while maintaining the contracting business that generates the customer relationships those assets depend on. Management targets owned energy sales at forty per cent. of revenue by 2029, from 26.1 per cent. in FY2025, and regards this issue as the first external funding of that shift. The Issuer does not intend to enter utility-scale generation, where it would compete against much larger balance sheets, or to operate outside Malaysia.

3. CORPORATE STRUCTURE, SHAREHOLDING AND GOVERNANCE

3.1 Group structure

The Issuer conducts the engineering contracting business directly and holds the owned rooftop portfolio through two project companies which are the borrowers under the project financing secured on those installations.

Subsidiary / associate	Effective interest	Principal activity
Suria Atap Satu Sdn Bhd	100%	Ownership and operation of the first tranche of owned rooftop installations (28 sites)
Suria Atap Dua Sdn Bhd	100%	Ownership and operation of the second tranche of owned rooftop installations (18 sites)
Teknik Elektrik Sdn Bhd	100%	Electrical contracting, switchgear installation and registered competent person services
Suria O&M Sdn Bhd	100%	Operation and maintenance services to the owned portfolio and to third-party systems

3.2 Shareholding of the Issuer

The issued share capital of the Issuer is RM24,000,000 comprising 240,000,000 ordinary shares of RM0.10 each. The shares are listed on the ACE Market of Bursa Malaysia, with a market capitalisation of RM94.8 million as at 30 June 2026.

Shareholder	Ordinary shares held	%
Teknik Ventures Sdn Bhd	50,400,000	21.0
Lau Wei Sheng	36,000,000	15.0
Nusantara Green Ventures Sdn Bhd	28,800,000	12.0
Koperasi Pelaburan Bersatu Berhad	16,800,000	7.0
Public shareholders (ACE Market)	98,400,000	41.0
Directors other than the above	9,600,000	4.0
Total	240,000,000	100.0

3.3 Board of Directors

The Board comprises six members, of whom three are independent non-executive directors.

Name	Age	Designation	Appointed
Ir. Hisham bin Mokhtar	61	Independent Non-Executive Chairman	June 2022
Lau Wei Sheng	46	Group Managing Director	October 2017
Ir. Priya Devi Nair	42	Executive Director and Chief Technical Officer	January 2021
Goh Ann Ling	44	Executive Director and Chief Financial Officer	March 2022
Dr. Rosnah binti Idris	53	Independent Non-Executive Director	June 2022
Michael Teoh Kok Wai	49	Independent Non-Executive Director	February 2024

3.4 Key management

The senior management team combines solar engineering, project delivery and asset management experience.

Name	Position	Relevant experience
Lau Wei Sheng	Group Managing Director	Founder; 18 years in renewable project development and electrical contracting.
Ir. Priya Devi Nair	Chief Technical Officer	Chartered engineer with 16 years in solar system design and grid interface.
Goh Ann Ling	Chief Financial Officer	Chartered accountant with 17 years' experience, including five in project finance.
Mohd Rizal bin Kamis	Head of Project Delivery	14 years in solar installation, site management and safety compliance.
Sharon Chin Mei Yee	Head of Asset Management	11 years in performance monitoring, warranty administration and offtaker relations.

3.5 Corporate governance

The Board of Directors of the Issuer is responsible for the overall stewardship of the Group, including the approval of strategy and annual budgets, the oversight of risk management and internal control, the approval of material capital commitments and financing arrangements, and the integrity of financial reporting. The Board meets at least quarterly and on such other occasions as the business of the Group requires.

The Board is supported by three standing committees. The Audit and Risk Committee, comprising a majority of independent directors and chaired by an independent director, reviews the financial statements before submission to the Board, oversees the internal audit function and the relationship with the external auditors, and monitors the principal risks of the Group and the adequacy of mitigating controls. The Nomination and Remuneration Committee reviews the composition and effectiveness of the Board and the remuneration framework for directors and senior management. The Board Investment Committee reviews material capital expenditure, acquisitions and financing

proposals before they are submitted to the Board.

The Group maintains an internal audit function which reports functionally to the Audit and Risk Committee and administratively to the chief executive. The internal audit plan is approved annually by the Audit and Risk Committee and is prepared on a risk-based methodology covering the principal operating and financial processes of the Group. The Group also maintains a whistleblowing policy under which employees and third parties may report suspected improprieties directly to the chairman of the Audit and Risk Committee.

For so long as the Sukuk remain outstanding, the Issuer has undertaken to maintain a Board comprising not fewer than five directors, of whom at least two shall be independent, and to procure that the Audit and Risk Committee continues to be chaired by an independent director.

The founder and his holding vehicle hold 36 per cent. of the voting shares and one of the six board seats. The Issuer has undertaken to the Trustee that no rooftop installation will be acquired from or disposed of to a connected party without independent valuation, in addition to the related party transaction requirements of the ACE Market Listing Requirements.

4. TERMS OF THE SUKUK

This section summarises the principal terms and conditions of the Sukuk. It is a summary only and is qualified in its entirety by the detailed provisions of the Trust Deed, the Programme Agreement and the Shariah pronouncement and the other Transaction Documents, copies of which are available for inspection at the registered office of the Issuer during normal business hours.

4.1 Summary of principal terms

Issuer	Suria Teknik Bhd
Instrument	Green SRI Sukuk Murabahah issued under the Green Sukuk Programme of the Issuer and distributed through the Tokenkan platform
Shariah principle	Murabahah, effected through a Tawarruq arrangement in Shariah-compliant commodities
Programme size	RM40,000,000 in nominal value
Principal amount of this issuance	RM8,000,000
Issue price	100.00 per cent. of nominal value
Denomination	RM1,000 nominal value per unit, tradable in minimum blocks of RM250,000 nominal value
Tenure	5 years from the issue date
Issue date	12 August 2026
Maturity date	12 August 2031
Profit rate	6.80 per cent. per annum, fixed for the full tenure
Profit payment frequency	Semi-annually in arrears
Profit payment dates	12 February and 12 August
Day count fraction	Actual/365 (Fixed)
Maturity structure	Bullet repayment of the full nominal value on the maturity date
Redemption at maturity	At 100 per cent. of the nominal value, together with accrued and unpaid profit up to but excluding the maturity date
Security	Unsecured at the level of the Issuer; supported by a negative pledge, a debt service reserve and an assignment of corporate power purchase agreement receivables
Ranking	Senior unsecured; ranking pari passu with all other present and future unsecured and unsubordinated obligations of the Issuer
Credit rating	BBB+ by Malaysian Rating Corporation Berhad, with a stable outlook
Form	Scripless, prescribed under the Real Time Electronic Transfer of Funds and Securities System (RENTAS)
Listing status	Not listed on any stock exchange; reported on the Electronic Trading Platform
Governing law	Laws of Malaysia
Shariah adviser	Ibnu Hakim Shariah Advisory Sdn Bhd

4.2 Principal amount and denomination

The Issuer proposes to issue RM8,000,000 in nominal value of Green Sukuk under the Green Sukuk Programme. The Sukuk will be issued in denominations of RM1,000 nominal value per unit. Trading in the secondary market shall be in minimum blocks of RM250,000 nominal value or such other amount as may be prescribed by the operator of RENTAS from time to time.

The Sukuk constitute direct obligations of the Issuer. They are offered through the Tokenkan platform in fractional interests, and are accordingly available to investors who have completed the suitability assessment operated by the platform, including individual investors. Prospective investors should note that eligibility to subscribe is determined by the platform operator in accordance with the requirements applicable to it, and that this document is a disclosure document rather than an invitation extended generally to the public.

4.3 Profit rate and payment

The Sukuk carry a profit rate of 6.80 per cent. per annum on the nominal value, fixed for the full tenure of five years. The semi-annual profit amount is RM272,000 on the full issue, equivalent to RM3.40 per RM100 of nominal value held. Under the Murabahah structure the aggregate profit is fixed at the outset as part of the deferred sale price. The rate reflects the BBB+ rating, which is the lowest investment grade band, and the fact that two thirds of the revenue of the Issuer comes from engineering contracting rather than from contracted energy sales.

Profit payments shall be made in arrears on the profit payment dates specified above. Where a profit payment date falls on a day which is not a business day, payment shall be made on the immediately succeeding business day without any adjustment to the amount payable, in accordance with the Following Business Day Convention (unadjusted).

The following table sets out the indicative profit payment schedule for the issuance, assuming the full nominal amount remains outstanding throughout the tenure and no early redemption occurs.

Period	Profit payment date	Indicative payment (RM'000)
Period 1	12 February 2027	272
Period 2	12 August 2027	272
Period 3	12 February 2028	272
Period 4	12 August 2028	272
Period 5	12 February 2029	272
Period 6	12 August 2029	272
Period 7	12 February 2030	272
Period 8	12 August 2030	272
Period 9	12 February 2031	272
Period 10 (final)	12 August 2031	8,272 (including nominal value of 8,000)

The schedule above is indicative only. Actual amounts payable will be computed on an Actual/365 (Fixed) basis by reference to the number of days in each profit period.

4.4 Maturity structure

The Sukuk are structured as a single bullet maturity. The full nominal value of RM8,000,000 falls due on 12 August 2031 together with the final profit payment. The Issuer intends to meet this from the accumulated cash flow of the rooftop portfolio, which by 2031 will have been generating for several years, and from refinancing secured on those assets. Investors should note that the rooftop portfolio funded by this issue will not be fully commissioned before 2029.

4.5 Early redemption

The Sukuk incorporate the following early redemption provisions:

Optional early redemption (call)

The Issuer may, on any profit payment date falling on or after the third anniversary of the issue date, redeem all but not part only of the Sukuk on not less than thirty days' notice, at 101.00 per cent. of nominal value before the fourth anniversary and 100.50 per cent. thereafter, together with accrued and unpaid profit.

Mandatory redemption on loss of green status

If the Independent Green Assessor determines that the funded assets no longer satisfy the eligible green project criteria of the SRI framework of the Issuer, and the deficiency is not remedied within one hundred and eighty days, Sukukholders may by extraordinary resolution require redemption at nominal value together with accrued profit.

Redemption following a change of control

Upon a change of control, being an event whereby Teknik Ventures Sdn Bhd and Lau Wei Sheng cease collectively to hold, directly or indirectly, more than thirty per cent. of the voting shares of the Issuer, each Sukukholder may require redemption at nominal value together with accrued profit within sixty days.

Redemption for taxation or Shariah reasons

The Issuer may redeem all but not part only of the Sukuk at nominal value together with accrued profit if a change in Malaysian tax law obliges it to pay additional amounts, or if the Shariah Adviser determines the structure has ceased to be Shariah compliant and the deficiency is not remedied within ninety days.

No investor put

Save on a change of control, investors have no right to require redemption before maturity. Exit before maturity is available only through the Anchor Investor standing bid described in Section 9.5.

4.6 Security and collateral

The Sukuk are unsecured obligations of the Issuer. The rooftop assets already built are charged to the project financiers who funded them, at RM22.0 million as at 31 December 2025, so no first-ranking security over assets of substance was available.

The protections are contractual:

- a negative pledge preventing security over the present and future assets of the Issuer, save for permitted security, which includes project financing security over new rooftop installations. Investors should understand that this allows the Issuer to continue charging new solar assets ahead of Sukukholders, which is how the sector funds itself;
- an assignment to the Trustee of the receivables due under the corporate power purchase agreements on the unencumbered part of the rooftop portfolio, which generated RM6.4 million in FY2025, into a designated account under the control of the Trustee following an event of default;
- a debt service reserve requiring the Issuer to maintain at all times, in an account under the control of the Trustee, an amount not less than the next semi-annual profit payment, being RM272,000;

- a restriction preventing the disposal of the rooftop portfolio or of any project company without the consent of Sukukholders by extraordinary resolution; and
- a distribution restriction preventing dividends where an event of default is continuing or a covenant would be breached following payment.

4.7 Ranking of investors

The Sukuk constitute direct, unconditional, unsecured and unsubordinated obligations of the Issuer, ranking pari passu among themselves and with its other unsecured and unsubordinated obligations, save for obligations mandatorily preferred by law.

The Sukuk rank behind secured financing of RM34.4 million to the extent of the assets securing it, being the rooftop installations and the factory and equipment of the Issuer.

In the engineering contracting business, subcontractors and suppliers hold contractual and in some cases statutory rights in respect of works and materials, and performance bond providers hold counter-indemnities, all of which affect the practical recovery available to an unsecured creditor.

Fractional interests rank equally with whole units and with the Anchor Investor allocation.

4.8 Covenants

The Trust Deed contains positive, negative and financial covenants customary for an issuance of this nature. The principal financial covenants, to be tested semi-annually by reference to the audited consolidated financial statements of the Issuer and, where applicable, its unaudited semi-annual management accounts, are as follows:

Financial covenant	Required level	Position as at 31 December 2025
Gross gearing ratio (total financing to total equity)	Not more than 1.75 times	1.21 times
Total financing to EBITDA	Not more than 4.50 times	2.9 times
EBITDA to finance costs	Not less than 2.50 times	4.03 times
Debt service reserve	Not less than one semi-annual profit payment	Funded at issue
Consolidated shareholders' funds	Not less than RM30.0 million	RM36.8 million

The principal negative covenants restrict the Issuer from, among other things: (a) creating or permitting to subsist any security interest over its assets other than permitted security; (b) disposing of a material part of its assets otherwise than on arm's length terms in the ordinary course of business; (c) undertaking any substantial change to the general nature of its business; (d) entering into any amalgamation, demerger, merger or corporate reconstruction which would have a material adverse effect; and (e) declaring or paying any dividend or making any distribution where an event of default is continuing or would result from such payment.

4.9 Events of default

The occurrence of any of the following shall constitute an event of default, subject to the grace periods specified in the Trust Deed: non-payment of any amount due under the Sukuk within seven business days of the due date; breach of any financial covenant; breach of any other obligation which is not remedied within thirty days of notice; cross-default in respect of any other financial indebtedness of the Issuer or any material subsidiary exceeding RM25.0 million in aggregate; the commencement of insolvency, winding-up or receivership proceedings; the cessation or material change of business; the invalidity or unenforceability of any Transaction Document; and the occurrence of any event having a material adverse effect on the ability of the Issuer to perform its payment obligations.

Upon the occurrence of an event of default which is continuing, the Trustee may, and shall if so directed by an extraordinary resolution of the Sukukholders, declare the Sukuk to be immediately due and payable at their nominal value together with accrued and unpaid profit.

4.10 Roles and parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Shariah Adviser	Ibnu Hakim Shariah Advisory Sdn Bhd
Rating Agency	Malaysian Rating Corporation Berhad
Auditor	Cheong Rahmat & Co. PLT
Solicitors	Zulkarnain Hew & Co.
Independent Green Assessor	Verdant Assurance Partners Sdn Bhd
Anchor Investor	Nusantara Sustainable Credit Fund, a professional credit fund managed by Nusantara Asset Management Sdn Bhd

5. USE OF PROCEEDS

5.1 Summary of application

The gross proceeds of RM8,000,000 are to be applied as set out below. The Issuer confirms that the proceeds will not be applied to any activity which is not Shariah compliant, and that each application falls within an eligible green project category under its SRI framework as assessed by the Independent Green Assessor.

Application	Amount (RM'000)	Proportion	Expected timing
Construction of the 12 MWac owned rooftop portfolio	4,600	57.5%	Q1 2027 to Q4 2029
Working capital for the engineering order book	2,100	26.3%	As required
Refinancing of existing financing	1,000	12.5%	Within 30 days of issue
General working capital	60	0.7%	As required
Expenses of the offering (see 5.2)	240	3.0%	On issue
Total gross proceeds	8,000	100.0%	

5.2 Expenses of the offering, including Platform fees

This offering is originated on the Tokenkan platform rather than arranged by an investment bank, and the fee structure differs from that of a conventional issuance. It is set out in full below, because the economic case for this offering rests on that difference and investors are entitled to test it.

The Platform charges the Issuer a tiered origination and listing fee, at 2.5 per cent. of nominal value for issues of RM1 million to RM5 million, 1.5 per cent. from RM5 million to RM10 million and 1.0 per cent. above RM10 million, subject in each case to a minimum of RM25,000. This issue falls in the 1.5 per cent. tier, giving a fee of RM120,000.

Payee	Amount (RM'000)	Basis
Tokenkan Capital Sdn Bhd - origination and listing fee	120	1.5% of nominal value (RM5m–RM10m tier)
Malaysian Rating Corporation Berhad - rating and surveillance	52	Fixed
Trustee - acceptance and annual fees (5 years)	38	Fixed
Shariah Adviser	14	Fixed
Solicitors	12	Fixed
Independent Green Assessor - framework and baseline	4	Fixed
Total charged against proceeds	240	

The total cost of this issuance is RM240,000, being 3.00 per cent. of nominal value. Investors should compare this against the fixed cost of a conventional issuance, which the Issuer estimates at RM1.4 million to RM1.9 million irrespective of size once rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are aggregated. On an issue of RM8,000,000 a conventional cost base of that order would consume between 18 per cent. and 24 per cent. of the proceeds, which is the reason this issuance would not otherwise have taken place.

Fees charged to investors

Investors pay no fee on subscription. The Platform charges a transaction fee of 1.0 per cent. on every purchase and on every sale executed through it, including a sale into the standing bid described in Section 9.5. On a subscription of RM200 the fee is RM2.

Investors should note the effect of this on a short holding period. An investor who subscribes and later sells into the standing bid pays 1.0 per cent. on the way in and 1.0 per cent. on the way out, and bears the standing bid discount described in Section 9.5 in addition. Round-trip cost is therefore material relative to a single periodic distribution, and this instrument is not suited to short-term trading.

5.3 Description of each application

The 12 MWac owned rooftop portfolio

RM4.6 million represents the equity contribution of the Issuer toward a portfolio of approximately twenty installations totalling 12 MWac. Total project cost is estimated at RM19.8 million, with RM15.2 million to be funded by project financing which has been credit-approved in principle but not documented.

Investors should note that the project financing is not committed. If it is not obtained on the terms assumed, the portfolio would be reduced in size or delayed, and the proceeds of this issue would remain in the Disbursement Account until an alternative arrangement was in place.

Offtake agreements have been signed for 7 MWac of the 12 MWac, with terms of eighteen to twenty years; the balance is in negotiation. Construction is expected to run from the first quarter of 2027 to the fourth quarter of 2029, commissioning progressively. Once complete, the portfolio is expected to add approximately RM9.8 million of annual contracted energy revenue.

Working capital for the engineering order book

RM2.1 million will fund the working capital cycle of the contracting business, principally module and inverter purchases and subcontractor payments made in advance of milestone certification. As Section 6.3 explains, growth in contracting absorbs cash rather than releasing it,

and the order book of RM48.4 million requires funding to execute.

Refinancing

RM1.0 million will prepay revolving and equipment financing carrying floating rates. This extends the weighted average maturity of financing at the level of the Issuer from 3.4 years to 4.1 years and increases the fixed rate proportion from 54 to 66 per cent.

5.4 Management of proceeds and green reporting

Proceeds will be credited on the issue date to a Disbursement Account operated by the Issuer under the supervision of the Trustee. Withdrawals for the portfolio require a certificate of two authorised officers confirming the amount is required for an application in Section 5.1, supported by an executed offtake agreement for the installation concerned and by supplier invoices or contractor certificates.

Pending application, balances may be invested only in Shariah-compliant liquid instruments issued or guaranteed by the Government of Malaysia or licensed Malaysian financial institutions, of a tenure not exceeding three months.

The Issuer will publish through the Platform an annual allocation and impact report setting out the application of proceeds, capacity commissioned, energy generated and estimated avoided emissions, with annual assurance by the Independent Green Assessor. It will also report quarterly on the order book, the owned portfolio and covenant compliance.

The Issuer may reallocate up to ten per cent. of gross proceeds between applications on notice to the Trustee. Any greater reallocation, or any application outside the eligible green project categories, requires approval by extraordinary resolution.

5.5 If the offering is not fully subscribed

This offering is not underwritten. The Anchor Investor has committed to its allocation of RM5,200,000 but will not absorb any part of the retail tranche which is not taken up.

The minimum level of subscription for the retail tranche is RM1,400,000, being half of it. If retail subscriptions fall below that level, the offering is withdrawn in its entirety, including the Anchor Investor allocation, and all subscription monies are returned in full within five business days without profit. Subscription monies are held in a segregated client account with a licensed Malaysian bank and form no part of the assets of the Issuer or of the Platform.

If retail subscriptions reach RM1,400,000 but fall short of RM2,800,000, the offering proceeds at the amount raised, applied in the order: expenses; refinancing; order book working capital; then the portfolio equity contribution, with the portfolio reduced in size accordingly. The profit rate does not change.

5.6 Expected effect

- an increase in owned rooftop capacity from 28 MWac to approximately 40 MWac on completion in 2029;
- approximately RM9.8 million of additional annual contracted energy revenue once complete;
- an increase in owned energy sales toward forty per cent. of revenue, from 26.1 per cent.;
- extension of the weighted average maturity of financing from 3.4 to 4.1 years and an increase in the fixed rate proportion from 54 to 66 per cent.;
- gross gearing rising from 1.21 to 1.41 times and financing to EBITDA from 2.9 to 3.3 times, as set out in Section 6.5.

6. FINANCIAL INFORMATION

The financial information set out in this section has been extracted from the audited consolidated financial statements of the Issuer for the three financial years ended 31 December 2023, 2024 and 2025, which were prepared in accordance with Malaysian Financial Reporting Standards and the requirements of the Companies Act. The auditors of the Issuer, Cheong Rahmat & Co. PLT (AF 1264), issued unqualified audit opinions in respect of each of the three financial years presented.

Investors should read the financial information below together with the accompanying commentary and the risk factors set out in Section 7. Historical results are not necessarily indicative of results that may be expected for any future period.

6.1 Consolidated statements of comprehensive income

All amounts are stated in RM'000 unless otherwise indicated. Figures in parentheses denote negative amounts.

	FY2023	FY2024	FY2025
Revenue	62,400	78,600	94,200
Cost of sales	46,800	58,200	68,600
Gross profit	15,600	20,400	25,600
Other operating income	680	840	980
Administrative and other operating expenses	8,200	9,600	11,200
EBITDA	8,080	11,640	15,380
Depreciation and amortisation	2,400	2,900	3,400
Operating profit (EBIT)	5,680	8,740	11,980
Finance costs	2,680	3,240	3,820
Profit before taxation	3,000	5,500	8,160
Taxation	720	1,320	1,960
Profit for the financial year	2,280	4,180	6,200
EBITDA margin (%)	12.9	14.8	16.3
Net profit margin (%)	3.7	5.3	6.6

Revenue increased from RM62.4 million in FY2023 to RM78.6 million in FY2024 and RM94.2 million in FY2025, growth of 26.0 per cent. and 19.8 per cent. Growth came from a larger contracting order book as commercial and industrial demand for rooftop solar expanded, and from the commissioning of additional owned installations.

EBITDA increased from RM8.08 million to RM15.38 million and the EBITDA margin from 12.9 per cent. to 16.3 per cent. The margin improvement reflects the growing weight of owned energy sales, which carry a much higher margin than contracting, rather than any improvement in contracting profitability. Contracting gross margin in fact declined from 19.4 per cent. to 17.8 per cent. under competitive pressure.

Investors should read the margin trend as the intended effect of the strategy described in Section 2.6 rather than as operational improvement, and should note that it depends on the owned portfolio continuing to grow.

Finance costs increased from RM2.68 million to RM3.82 million with project financing drawn on new installations. Profit for the financial year increased from RM2.28 million to RM6.20 million and the net margin from 3.7 per cent. to 6.6 per cent.

6.2 Consolidated statements of financial position

	FY2023	FY2024	FY2025
<i>NON-CURRENT ASSETS</i>			
Rooftop solar assets, plant, factory and equipment	34,600	42,800	52,400
Deferred tax assets and other non-current assets	2,400	2,800	3,200
<i>Total non-current assets</i>	<i>37,000</i>	<i>45,600</i>	<i>55,600</i>
<i>CURRENT ASSETS</i>			
Contract receivables, retention sums and energy sale receivables	18,600	23,400	28,200
Modules, inverters, mounting systems and cable inventories	6,800	8,200	9,600
Prepayments, deposits and other current assets	2,200	2,600	3,100
Cash, bank balances and Islamic deposits	8,400	9,800	12,600
<i>Total current assets</i>	<i>36,000</i>	<i>44,000</i>	<i>53,500</i>
TOTAL ASSETS	73,000	89,600	109,100
<i>EQUITY</i>			
Share capital	24,000	24,000	24,000
Reserves and retained earnings	2,400	6,580	12,780
<i>Total equity</i>	<i>26,400</i>	<i>30,580</i>	<i>36,780</i>
<i>NON-CURRENT LIABILITIES</i>			
Islamic financing – non-current	22,000	28,000	34,000
Deferred tax, decommissioning provisions and lease liabilities	4,600	5,400	6,200
<i>Total non-current liabilities</i>	<i>26,600</i>	<i>33,400</i>	<i>40,200</i>
<i>CURRENT LIABILITIES</i>			
Islamic financing – current	6,800	8,600	10,400
Trade payables, subcontractor liabilities and accruals	10,400	13,200	17,600
Advances on contracts, other payables and taxation	2,800	3,820	4,120
<i>Total current liabilities</i>	<i>20,000</i>	<i>25,620</i>	<i>32,120</i>
<i>Total liabilities</i>	<i>46,600</i>	<i>59,020</i>	<i>72,320</i>
TOTAL EQUITY AND LIABILITIES	73,000	89,600	109,100

Total assets increased from RM73.0 million to RM109.1 million over the review period. Rooftop solar assets, plant, factory and equipment stood at RM52.4 million as at 31 December 2025, and contract receivables and retention sums at RM28.2 million; together 73.9 per cent. of total assets.

Investors should note the working capital intensity implied by RM28.2 million of contract receivables against RM94.2 million of revenue, corresponding to approximately 109 days. Public and large corporate clients certify and pay slowly, and retention sums are released only after defects liability periods expire.

Total equity increased from RM26.4 million to RM36.8 million through retained earnings. Share capital was unchanged at RM24.0 million. Total financing increased from RM28.8 million to RM44.4 million as project financing was drawn on new installations.

Gross gearing was 1.09, 1.20 and 1.21 times against a covenanted maximum of 1.75 times. Financing to EBITDA improved from 3.6 to 2.9 times against a maximum of 4.50 times.

The current ratio declined from 1.80 to 1.67 times, reflecting growth in payables and advances on contracts alongside receivables.

6.3 Consolidated statements of cash flows (summary)

	FY2023	FY2024	FY2025
Net cash generated from operating activities	5,400	6,800	9,200
Net cash used in investing activities	(8,200)	(10,400)	(12,800)
Net cash from/(used in) financing activities	200	5,000	6,400
<i>Net increase/(decrease) in cash and cash equivalents</i>	<i>(2,600)</i>	<i>1,400</i>	<i>2,800</i>
Cash and cash equivalents at beginning of year	11,000	8,400	9,800
Cash and cash equivalents at end of year	8,400	9,800	12,600

Net cash generated from operating activities increased from RM5.4 million in FY2023 to RM9.2 million in FY2025, with conversion against EBITDA of 66.8, 58.4 and 59.8 per cent. Conversion is materially lower than for the asset-owning issuers on the Platform, because the

contracting business absorbs cash into receivables and inventory as it grows.

Investors should note the implication: growth in the contracting business consumes cash rather than releasing it, so a period of rapid order book expansion would tighten liquidity rather than ease it.

Net cash used in investing activities of RM8.2 million, RM10.4 million and RM12.8 million comprises rooftop installation construction and factory equipment. Investing outflows exceeded operating inflows in every year, funded by project financing drawdowns reflected in financing inflows of RM200,000, RM5.0 million and RM6.4 million.

Cash moved from RM8.4 million to RM12.6 million over the period.

6.4 Selected financial ratios

Ratio	FY2023	FY2024	FY2025
EBITDA margin (times revenue, %)	12.9	14.8	16.3
Return on equity (%)	8.6	13.7	16.9
Total borrowings (RM'000)	28,800	36,600	44,400
Net debt (RM'000)	20,400	26,800	31,800
Gross gearing (times)	1.09	1.20	1.21
Net gearing (times)	0.77	0.88	0.86
Total borrowings / EBITDA (times)	3.6	3.1	2.9
EBITDA / finance costs (times)	3.0	3.6	4.0
Current ratio (times)	1.80	1.72	1.67

Gross gearing was 1.09, 1.20 and 1.21 times against a covenanted maximum of 1.75 times, and would be 1.41 times on a pro forma basis following this issue, leaving 0.34 times of headroom.

Financing to EBITDA improved from 3.6 to 2.9 times against a covenanted maximum of 4.50 times, and would be 3.3 times pro forma. EBITDA cover of finance costs improved from 3.0 to 4.0 times against a covenanted minimum of 2.50 times.

The sensitivity investors should test is the contracting order book rather than the energy assets. If contracting revenue fell by a third, which nine months of order book visibility makes entirely possible, EBITDA would fall to approximately RM11.6 million on FY2025 cost structure. On the pro forma financing of RM51.4 million that gives financing to EBITDA of approximately 4.4 times, just inside the 4.50 times covenant, and coverage of approximately 3.0 times.

Return on equity improved from 8.6 to 16.9 per cent., which reflects the small equity base as much as profitability.

6.5 Pro forma effect of the issuance

The table below illustrates the effect of the issuance on the consolidated statement of financial position of the Issuer as at 31 December 2025, on the assumption that the issuance had been completed on that date and that the proceeds were applied in the manner described in Section 5. The pro forma information is presented for illustrative purposes only and does not purport to represent the actual financial position of the Issuer following the issuance.

	Audited as at 31 December 2025	Pro forma after issuance
Cash, bank balances and deposits	12,600	19,360
Total assets	109,100	115,860
Total financing	44,400	51,400
Total liabilities	72,320	79,320
Total equity	36,780	36,540
Gross gearing (times)	1.21	1.41
Total financing / EBITDA (times)	2.9	3.3

The pro forma assumes gross proceeds of RM8.0 million, application of RM1.0 million to prepayment of existing financing within thirty days of issue, and RM240,000 of offering expenses charged against equity.

Gross gearing would rise from 1.21 to 1.41 times and financing to EBITDA from 2.9 to 3.3 times, both within covenant.

The pro forma reflects no contribution from the 12 MWac portfolio funded by this issue, which is expected to commission progressively from 2028 and to be complete in 2029. Profit payments are due from February 2027.

6.6 Existing borrowings

As at 31 December 2025, the total borrowings of the Group amounted to RM44.4 million, comprising the facilities summarised below. The Issuer confirms that it has not defaulted on any payment of principal or profit in respect of any of its borrowings during the three financial years under review.

Facility	Outstanding (RM'000)	Maturity profile
Project financing – owned rooftop installations (secured, at project company level)	22,000	Amortising to 2036 and 2038
Term financing – factory premises and plant (secured)	8,000	Semi-annual instalments to 2033
Revolving and working capital financing (unsecured)	4,000	Annual review
Current portion of financing and contract advances facility	10,400	Within 12 months
Total financing	44,400	

7. RISK FACTORS

Before making an investment decision, prospective investors should carefully consider all the information contained in this document, including in particular the risk factors set out below. The risks described are those which the Issuer currently considers material. They are not exhaustive, and additional risks not presently known to the Issuer, or which the Issuer currently considers immaterial, may also impair its business, financial condition and ability to meet its obligations under the Sukuk.

If any of the following risks materialises, the business, financial condition, results of operations and prospects of the Issuer could be materially and adversely affected. In such circumstances, the Issuer may be unable to pay profit on, or repay the nominal value of, the Sukuk, and investors may lose part or all of their investment.

7.1 Risks relating to the Issuer and the Sukuk

Credit risk

The Sukuk represent unsecured or, where applicable, secured obligations of the Issuer alone. Payment of profit and the repayment of the nominal value depend entirely upon the ability of the Issuer to generate sufficient cash flow from its operations, or to obtain sufficient funds from other sources, at the relevant times. Neither the Trustee, the Platform through which this offering was originated and distributed, nor any other party has guaranteed or assumed any obligation in respect of the payment obligations of the Issuer. In particular, investors should note that this offering was not underwritten and that no arranger stands behind it.

A deterioration in the operating performance of the Issuer, an adverse change in its capital structure, the loss of one or more significant customers or contracts, or an unexpected increase in its cost base could impair its ability to service the Sukuk. As at 31 December 2025, the Group had total borrowings of RM44.4 million against total equity of RM36.8 million, representing a gross gearing ratio of 1.21 times and total borrowings to EBITDA of 2.9 times.

Refinancing risk

The Sukuk are repayable in a single bullet payment at maturity, and the Issuer does not expect to accumulate a sinking fund sufficient to retire the full nominal amount from operating cash flow alone. The Issuer therefore expects to refinance all or a substantial part of the Sukuk at or before maturity. The ability of the Issuer to refinance will depend on conditions in the Malaysian debt capital and bank loan markets at the relevant time, on its credit standing and rating at that time, and on investor appetite for the sector in which it operates. There is no assurance that refinancing will be available on acceptable terms, or at all.

Profit rate risk

The Sukuk carry a fixed profit rate. The market value of fixed-rate debt securities generally moves inversely with prevailing market yields: if benchmark yields, including the yields on Malaysian Government Securities and Government Investment Issues, rise after the issue date, the market value of the Sukuk is likely to fall. Investors who sell the Sukuk before maturity may therefore realise less than the nominal value, and in adverse conditions materially less. Investors who hold the Sukuk to maturity are not exposed to this price risk, but bear the opportunity cost of being locked into a fixed profit rate for the tenure of the instrument.

The Issuer is separately exposed to profit rate risk on its floating-rate bank borrowings, which are typically priced against the relevant cost of funds of the lending institutions. An increase in the Overnight Policy Rate set by the central bank would increase the finance costs of the Group and reduce the headroom available under its profit cover covenant.

Liquidity risk of the Sukuk

The Sukuk will not be listed or quoted on any stock exchange, and the Platform does not operate an order book. Operating a venue that matches buyers and sellers of capital market products would require registration as a Recognized Market Operator, which the Platform has not yet obtained. Exit before maturity is therefore available only through the standing bid maintained by the Anchor Investor at the published formula price described in Section 9.5. That bid is a contractual undertaking of a single counterparty, not a market. It is capped at RM140,000 of nominal value in aggregate in any calendar month, may be suspended in the circumstances set out in Section 9.5, and terminates if the Anchor Investor ceases to hold at least half of its original allocation. Peer-to-peer transfer between investors is intended to follow in phase two once Recognized Market Operator registration is obtained, but no date is committed and investors should not subscribe in reliance on it. An investor who may need the money before 12 August 2031 should treat this offering as unsuitable.

Liquidity and working capital risk of the Issuer

The Issuer requires liquidity to fund its operations, service its debt and meet its capital commitments. As at 31 December 2025, the Group held cash and bank balances of RM12.6 million and recorded a current ratio of 1.67 times. An unexpected lengthening of the collection cycle, the withdrawal of uncommitted banking lines, or a requirement to post additional performance security could strain the liquidity position of the Group.

Rating risk

The Sukuk have been assigned a rating of BBB+ with a stable outlook by Malaysian Rating Corporation Berhad. A credit rating is an opinion on relative creditworthiness at a point in time and is not a recommendation to buy, sell or hold any security. The rating may be reviewed, placed on negative watch, downgraded or withdrawn at any time. A downgrade would be likely to reduce the price obtainable on a sale before maturity.

Subordination and structural risk

The Issuer conducts its engineering contracting business directly and holds the owned rooftop portfolio through two project companies which are the borrowers under the project financing secured on those installations. Cash reaches the Issuer from those companies only as distributions permitted after project debt service and reserve requirements, and the project financing agreements restrict distributions where a project cover ratio falls below 1.15 times. A period of weak generation or an offtaker default at a project can therefore interrupt

the cash reaching the Issuer even where the project company remains solvent. The Issuer has guaranteed RM11.2 million of project financing, which would rank as an unsecured claim alongside the Sukuk if called.

Enforcement risk

In the event of a default, the ability of the Trustee to enforce on behalf of Sukukholders may be constrained by the time and cost of legal proceedings in Malaysia, by the availability and realisable value of any security, by the rights of preferential and secured creditors ranking ahead of the Sukuk, and by the terms of any court-sanctioned scheme of arrangement or judicial management order to which the Issuer may become subject. Recoveries following enforcement may be substantially less than the nominal value of the Sukuk and may be received only after considerable delay.

Modification and sukukholders decisions

The Trust Deed provides for meetings of Sukukholders to consider matters affecting their interests generally. Resolutions passed by the requisite majority at a duly convened meeting bind all Sukukholders, including those who did not attend or vote and those who voted against the resolution. The Trustee is also empowered, without the consent of Sukukholders, to agree to modifications of a formal, minor or technical nature or which are made to correct a manifest error.

7.2 Risks relating to the industry and operations of the Issuer

Order book dependence in the contracting business

Engineering, procurement and construction work contributed RM62.8 million, or 66.7 per cent., of FY2025 revenue. That revenue exists only for as long as the Issuer keeps winning contracts, and the order book stood at RM48.4 million as at 31 December 2025, representing approximately nine months of contracting revenue.

Investors should register that figure. A contracting business with nine months of visibility can deteriorate very quickly if tendering conditions change, and the Issuer competes against both larger integrators and low-cost entrants. Contract margins have been compressed by competition, with the gross margin on contracting work declining from 19.4 per cent. to 17.8 per cent. over the review period.

Execution, warranty and performance guarantee risk

The Issuer typically warrants system output for two years and workmanship for five, and in some contracts provides a performance guarantee under which it compensates the client if generation falls below a modelled level. Underperformance arising from design error, installation defect or module degradation exceeding warranty limits falls on the Issuer.

Warranty claims on modules and inverters are passed to manufacturers, but this depends on those manufacturers remaining solvent, and several global module makers have entered distress in recent years. The Issuer carried a warranty provision of RM1.8 million as at 31 December 2025.

Module and inverter price and supply volatility

Module prices have moved by more than thirty per cent. in a single year on multiple occasions over the past decade, driven by global manufacturing capacity, trade measures and shipping costs. On fixed-price contracts already signed, a price increase falls on the Issuer.

Conversely, a sharp price decline can render inventory and signed contracts uncompetitive against later bidders. Inventories stood at RM9.6 million as at 31 December 2025, and the Issuer bears price risk on that stock.

Offtaker credit risk on corporate power purchase agreements

The owned portfolio sells energy to commercial and industrial hosts under agreements of eight to eighteen years remaining term. Those counterparties are private companies, not a national utility, and their credit is materially weaker.

An offtaker insolvency ends the revenue from that installation and leaves the Issuer with solar equipment on a roof it does not own, which has limited value and may be costly to remove. The portfolio comprised 46 installations across 38 offtakers as at 31 December 2025, so no single loss is critical, but the exposure is to a class of counterparty that fails more often than a utility does.

Solar resource variability and construction risk on the funded portfolio

Energy revenue depends on irradiance actually received, which varies with cloud cover, monsoon and haze episodes, and the Issuer is paid only for energy delivered with no compensating mechanism.

The 12 MWac portfolio funded by this issue carries construction, roof condition, grid connection and commissioning risk, and is not expected to be fully commissioned before 2029, while profit payments begin in February 2027.

Working capital intensity and contract receivables

Contracting consumes working capital: the Issuer buys modules, pays subcontractors and completes milestones before it is certified and paid. Contract receivables and retention sums stood at RM28.2 million as at 31 December 2025, being 82 per cent. of the level of contracting cost of sales for a quarter.

Retention sums are typically released only after the defects liability period expires. A dispute or a client insolvency can leave the Issuer unpaid on work already executed and materials already purchased.

Small company and transition risk

The Issuer has a market capitalisation of RM94.8 million and shareholders' funds of RM36.8 million. It is attempting to shift from a contracting model to an asset-owning model, which requires capital it does not generate internally and which this issue partially provides.

That transition is the strategic rationale for the issue and also a risk: the Issuer will carry the cost of the new assets and the debt funding them before the revenue arrives, while continuing to bear the volatility of the contracting business.

7.3 Regulatory and compliance risks

Changes in law, regulation and government policy

The owned rooftop portfolio operates under net energy metering and self-consumption arrangements approved by the Energy Commission of Malaysia and the grid operator, subject to conditions on capacity, metering and grid compliance. Changes to the quota available under those programmes, or to the terms on which exported energy is credited, would affect the returns on both the existing and the planned portfolio.

Electrical contracting requires registration with the Energy Commission and the employment of registered competent persons. Suspension of registration would prevent the Issuer from executing installation work, which is two thirds of its revenue.

As an ACE Market listed issuer the Issuer is subject to the ACE Market Listing Requirements, including continuing disclosure, Sponsor retention and the financial condition provisions applicable to listed issuers.

Installation work on commercial and industrial roofs is subject to occupational safety and health requirements, including working at height regulations. A serious accident would attract regulatory investigation, potential work stoppage and reputational damage with corporate clients.

Import duties and approved permits apply to solar modules and inverters, and Malaysian policy on the treatment of imported modules has changed periodically. Changes would affect input costs on both contracting margins and owned portfolio construction.

Green investment tax allowances and capital allowance treatment for renewable assets affect the returns on owned installations and on the projects the Issuer builds for clients, and the availability of those incentives is subject to periodic budget review.

Taxation

Statements in this document concerning taxation are based on the laws and practice in force at the date of this document. Changes in tax legislation, in the interpretation or administration of tax legislation by the Inland Revenue Board, or in the availability of incentives currently enjoyed by the Group could increase the effective tax rate of the Group and reduce the cash flow available for debt service. Prospective investors should consult their own tax advisers as to the tax consequences of acquiring, holding and disposing of the Sukuk.

Anti-money laundering and sanctions

The Group is subject to anti-money laundering, counter-terrorism financing and sanctions regimes applicable in Malaysia and in the jurisdictions in which it operates or into which it sells. A failure by the Group or its counterparties to comply with these regimes could result in fines, restrictions on banking relationships and reputational damage.

7.4 Operational risks

Dependence on key personnel

The performance of the Group depends to a significant extent on the continued service of its senior management team and of technical and operational personnel with specialised experience. Competition for such personnel in Malaysia is intense. The loss of one or more members of senior management, or an inability to attract and retain suitably qualified staff, could disrupt operations and impair the ability of the Group to execute its strategy.

Information technology and cyber security

The Group relies on information technology systems for its operational, financial and customer-facing processes. A material failure of these systems, a successful cyber intrusion, a ransomware incident or a breach of personal data protected under applicable data protection legislation could interrupt operations, expose the Group to regulatory penalties and civil claims, and damage its reputation.

Insurance

The Group maintains insurance cover which it considers appropriate for its operations, including property damage, business interruption, public liability and, where relevant, contractors' all risks cover. However, such cover is subject to policy limits, deductibles and exclusions, and certain risks are not commercially insurable. A loss which is uninsured, underinsured or excluded could have a material adverse effect on the financial condition of the Group.

Litigation and disputes

The Group is, from time to time, party to claims and disputes arising in the ordinary course of business. As at the date of this document, the Directors are not aware of any pending or threatened litigation which, if determined adversely, would have a material adverse effect on the financial condition of the Group. There is no assurance that material claims will not arise in future.

Related party transactions

The Group enters into transactions with related parties in the ordinary course of business. Although the Directors are of the view that such transactions are conducted on arm's length terms and on a basis not more favourable to the related party than to an unrelated third party, there is a risk that the terms of such transactions may differ from those which could be obtained from independent parties.

7.5 Forward-looking statements

This document contains forward-looking statements, including statements regarding the intentions, beliefs and current expectations of the Issuer concerning its results of operations, financial condition, liquidity, prospects, growth and strategy. Words such as anticipates, believes, estimates, expects, intends, may, plans, projects and targets, and similar expressions, are intended to identify such statements. Forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and assumptions. Actual results may differ materially from those expressed or implied. The Issuer does not undertake any obligation to update or revise any forward-looking statement, save as required by law or by the terms of the Transaction Documents.

8. INVESTOR FREQUENTLY ASKED QUESTIONS

The questions and answers below are provided for the convenience of prospective investors and are intended as a plain-language guide only. They do not form part of the terms and conditions of the Sukuk and are qualified in their entirety by the detailed provisions of this document and of the Transaction Documents. In the event of any inconsistency, the Transaction Documents shall prevail.

What is the profit rate, and how is it determined?

The profit rate is 6.80 per cent. per annum on nominal value, fixed for five years. That is RM3.40 per RM100 held every six months, or RM6.80 a year. The rate reflects two things: a BBB+ rating, which is the lowest investment grade band and one notch above sub-investment grade, and the fact that the Issuer is principally an engineering contractor rather than an owner of contracted energy assets. Contracting revenue depends on winning new work; energy sales under long-term agreements do not.

How often are payments made, and when will I receive them?

Profit is paid semi-annually in arrears in arrears on 12 February and 12 August of each year, with the first payment falling due on 12 February 2027 and the final payment falling due on the maturity date, 12 August 2031. Payments are made to the persons shown in the records of the depository at the close of business on the relevant record date, which falls two business days before the payment date. Payments are credited directly through RENTAS; no physical certificates are issued and no coupons need to be presented.

When will I get my principal back?

The full RM100 per RM100 of nominal value is repaid on 12 August 2031 together with the final profit payment. There is no amortisation. The Issuer may call the whole issue from the third anniversary at a small premium.

What happens if the Issuer defaults?

A default arises if the Issuer fails to pay any amount due within the applicable grace period, breaches a financial covenant, breaches another material obligation and fails to remedy it within the cure period, becomes subject to insolvency proceedings, or triggers one of the other events of default described in Section 4.9. Upon a continuing event of default, the Trustee may, and must if directed by an extraordinary resolution of Sukukholders, accelerate the Sukuk so that the full nominal value and accrued profit become immediately due and payable.

The Sukuk are unsecured and rank behind RM34.4 million of secured financing charged over the rooftop installations and the factory. What Sukukholders would look to is the assignment of corporate power purchase agreement receivables on the unencumbered part of the portfolio, RM6.4 million annually, the debt service reserve of RM272,000 held by the Trustee, and any residual value in the charged assets above the secured claims. Investors should note that a solar installation on a third party's roof is difficult to realise independently of the offtaker relationship, so its recovery value is materially below its book value. The contracting business would have little realisable value in a default, since its value lies in an order book that would not survive the insolvency of the contractor.

Individual investors do not enforce directly. The Trustee acts on behalf of all Sukukholders collectively, which prevents a disorderly race to enforce and ensures that any recoveries are distributed rateably in accordance with the priority of payments set out in the Trust Deed.

Is this issuance Shariah compliant?

Yes. The structure is Murabahah effected through a Tawarruq arrangement, and renewable generation is regarded as an inherently permissible activity. The structure has been reviewed and approved by Ibnu Hakim Shariah Advisory Sdn Bhd, and the green credentials are separately assessed against the SRI framework of the Issuer by Verdant Assurance Partners Sdn Bhd. Investors should consult their own Shariah advisers.

What are the main risks I should focus on?

The Issuer would direct attention to five risks in particular. First, credit risk: repayment depends entirely on the Issuer, and the Sukuk benefit from no third-party guarantee. Second, refinancing risk: the Sukuk repay in a single bullet payment at maturity and the Issuer expects to refinance rather than fully amortise from operating cash flow. Third, profit rate risk: the rate is fixed, so the market value of the Sukuk will fall if benchmark yields rise. Fourth, liquidity risk: the Sukuk are unlisted, secondary market trading may be thin, and investors should be prepared to hold to maturity. Fifth, the sector-specific risks described in Section 7.2, which for the Issuer principally concern dependence on an engineering order book that must be continually replenished, execution and warranty risk on installed systems, module and inverter supply chain and price volatility, counterparty credit risk on corporate power purchase agreement offtakers, solar resource variability, and dependence on renewable energy policy and net energy metering quota allocation. Section 7 should be read in full.

How will the proceeds be used?

The gross proceeds of RM8.0 million will be applied as set out in Section 5: RM4.6 million to the construction of a 12 MWac owned commercial and industrial rooftop portfolio, RM2.1 million to working capital for the engineering order book, RM1.0 million to refinancing existing financing, RM60,000 to general working capital, and RM240,000 to the expenses of the offering including the Platform origination fee.

What is the credit rating, and what does it mean?

Malaysian Rating Corporation Berhad has assigned a rating of BBB+ with a stable outlook to the Sukuk. On the rating scale of the agency, BBB+ denotes adequate capacity to meet financial obligations but with greater vulnerability to adverse business and economic conditions than obligations in the A and AA categories. It is the highest of the BBB bands and the lowest investment grade band; the next notch down is below investment grade. A rating is an opinion on relative creditworthiness at a given point in time. It is not a recommendation to buy, sell or hold, it does not comment on the market price or suitability of the instrument for any particular investor, and it may be reviewed, downgraded or withdrawn at any time.

Who can invest, and in what amounts?

The Sukuk are issued in denominations of RM1,000 nominal value. Fractional interests in the Sukuk are made available through the Tokenkan platform, under which an investor may subscribe for an interest of not less than RM100 and in increments of RM1 thereafter. The platform operator holds the underlying Sukuk and records the fractional entitlement of each investor. An investor holding a fractional interest is entitled to the corresponding share of each profit payment and of the redemption proceeds, but is not the registered holder of the Sukuk and exercises rights under the Trust Deed through the platform operator.

Are the Sukuk secured?

No. This is unsecured at the level of the Issuer, and the negative pledge expressly permits further security over new rooftop installations. The substantive protections are the assignment of corporate power purchase agreement receivables, the debt service reserve under Trustee control, the bar on disposing of the portfolio, and the dividend restriction. Section 4.6 has the detail.

Where do I rank against other creditors?

Sukukholders rank as senior unsecured creditors, equally with each other and with the Anchor Investor. They rank behind RM34.4 million of secured financing to the extent of its security, and behind preferential claims. Subcontractor and performance bond arrangements in the contracting business also affect practical recovery.

Can the Issuer redeem early, and what would I receive?

The Issuer may call the whole issue from the third anniversary at 101.00 per cent. of nominal value, falling to 100.50 per cent. from the fourth. Investors have a put right on a change of control, and a redemption right by extraordinary resolution if green status is lost and not remedied. Otherwise the only exit is a sale into the Anchor Investor standing bid described in Section 9.5, which is discounted, capped at RM140,000 a month and may be suspended.

How is my investment taxed?

The tax treatment of profit depends on the residence, legal form and tax status of the investor. Withholding tax may apply to payments made to certain non-resident investors, subject to any relief available under an applicable double taxation agreement. Certain classes of Malaysian institutional investors enjoy exemptions in respect of profit income from ringgit-denominated sukuk. The Issuer does not provide tax advice, and prospective investors should consult their own advisers.

How will I be kept informed after issuance?

The Issuer is required under the Trust Deed to deliver to the Trustee its audited consolidated financial statements within 120 days of each financial year end and its unaudited semi-annual accounts within 90 days of each half year end, together with a compliance certificate confirming observance of the financial covenants. The Issuer must also notify the Trustee promptly of any event of default or potential event of default, and of any development which would have a material adverse effect. The rating agency conducts a formal review of the rating at least annually.

Can I sell before maturity?

Fractional interests may be offered for sale through the matching facility operated by the Tokenkan platform, and the platform may also quote an indicative price at which it is prepared to take the position. Investors should understand clearly that this is not a listed market and that no party is obliged to buy. Whether a sale can be effected, and at what price, depends on the presence of a willing counterparty, on prevailing market yields and on the credit standing of the Issuer at the time; the price may be above or below the nominal value. An investor who is unable to sell should expect to hold to maturity, at which point the full nominal value becomes payable.

Is this a solar company or a construction company?

Both, and the distinction matters more than the marketing suggests. In FY2025 the Issuer earned RM62.8 million, or 66.7 per cent. of revenue, from engineering, procurement and construction work installing solar systems for third parties. It earned RM24.6 million, or 26.1 per cent., from selling energy from rooftop systems it owns, under corporate power purchase agreements with remaining terms of eight to eighteen years.

Those two businesses have opposite credit characteristics. Contracting is low-capital and cash-generative but depends entirely on winning new work, carries execution and warranty risk, and can go from a full order book to an empty one within a year. Owned energy assets are capital-hungry but produce contracted revenue for a decade or more.

The Issuer is currently weighted toward the contracting side, which is why the rating is BBB+ rather than higher. This issue funds a shift toward owned assets: RM4.6 million of the proceeds builds a 12 MWac owned portfolio. Investors should understand that they are funding that transition, and bearing the contracting risk while it happens.

What does BBB+ actually mean for the risk I am taking?

BBB+ is the lowest of the investment grade bands on the MARC scale. It denotes adequate capacity to meet obligations, but with materially greater vulnerability to adverse business or economic conditions than the A and AA categories. A single-notch downgrade would take the issue below investment grade.

Practically, this affects investors in two ways. The probability of default over a five-year horizon is meaningfully higher than for a higher-rated issue, which is what the 6.80 per cent. rate compensates for. And if the rating is downgraded, the standing bid formula in Section 9.5 prices off the credit spread at which this issue was priced, not the spread prevailing after a downgrade, so the effect on the achievable exit price is limited but the underlying credit will have deteriorated.

Where can I obtain further information?

Copies of the Trust Deed, the SFC Sukuk Memorandum, the audited financial statements of the Issuer for the three financial years covered by this document, the rating letter and the Shariah pronouncement and the constitution of the Issuer are available for inspection

at the registered office of the Issuer during normal business hours for the period during which the Sukuk remain outstanding. Enquiries may be directed to the Registrar and Paying Agent, Tokenkan Capital Sdn Bhd.

9. ORIGATION, ALLOCATION AND THE PLATFORM

9.1 How this offering was originated

This offering was originated directly by the Issuer through Tokenkan Capital Sdn Bhd, which operates the Tokenkan platform. No investment bank has acted as lead arranger, lead manager or underwriter.

The Issuer is a company listed on the ACE Market of Bursa Malaysia with a market capitalisation of RM94.8 million. An issue of this size could not have carried the fixed cost of a conventional bond issuance, in which rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are incurred at broadly the same magnitude whether a company raises RM5 million or RM50 million. The Platform exists to compress that cost base, and this document should be read as the product of that compression.

What the Platform does

The Platform structured this offering, prepared this document with the Issuer, conducted the credit review summarised in Section 6, set the indicative pricing range in consultation with the Anchor Investor, and distributes the sukuk to retail investors. It maintains the register of holders and pays the periodic distributions.

What the Platform does not do

The Platform does not issue or hold the sukuk. Token issuance and custody are performed by Sentinel Digital Custody Sdn Bhd, a Digital Asset Custodian registered with the Securities Commission Malaysia. The Platform has no ability to move, encumber or apply an investor's holding, and an investor's entitlement does not form part of the assets of the Platform.

The Platform does not underwrite this offering. It has given no commitment to subscribe for any portion not taken up, and holds none of the sukuk on its own account. Section 5.5 sets out what happens if the offering does not reach its minimum.

The Platform does not operate an exchange or an order book, and does not match buyers with sellers. Section 9.5 describes the only exit mechanism available at launch.

The Platform is not an adviser to investors. It is remunerated by the Issuer as set out in Section 5.2, and it charges investors a transaction fee on purchases and sales. Its remuneration therefore rises with both the size of the offering and the volume of investor activity. Investors should weigh this when reading any material prepared by the Platform, including the automated explanatory tools available on it, which are provided for convenience, are grounded in this document, and do not constitute advice or a recommendation.

The Platform does not guarantee the obligations of the Issuer. On a default, the recourse of investors is to the Issuer through the Trustee, as set out in Section 4.9, and not to the Platform.

9.2 Parties independent of the Issuer and the Platform

The following functions are performed by parties independent of both the Issuer and the Platform, and their independence is the substance of the protection they provide:

- the Digital Asset Custodian, which issues and safekeeps the holdings and maintains records independently of the Platform;
- the Trustee, which holds the benefit of the covenants for investors, monitors compliance, convenes meetings of holders and enforces on their instruction. It is remunerated by the Issuer but owes its duties to holders;
- the Auditor, which audited the financial statements from which Section 6 is drawn;
- the Solicitors, who advised on the Transaction Documents; and
- where applicable, the Rating Agency, the Shariah Adviser and the Independent Valuer.

Neither the Issuer nor the Platform may remove or replace the Trustee or the Digital Asset Custodian without the consent of holders by extraordinary resolution.

9.3 Fractional holding

Investors hold fractional interests recorded by the Digital Asset Custodian and reflected in the register maintained by the Platform. A fractional interest carries the same economic entitlement, proportionate to its size, as a whole unit of nominal value, and the same right to vote at meetings of holders. It is not a separate class and is not subordinated.

9.4 The Anchor Investor and allocation of this issue

This issue is not distributed wholly to retail investors. It is allocated as follows:

Allocation	Nominal value	Proportion
Anchor Investor	RM5,200,000	65.0%
Retail investors through the Platform	RM2,800,000	35.0%
Total	RM8,000,000	100.0%

The Anchor Investor for this issue is Nusantara Sustainable Credit Fund, a professional credit fund. Investors should understand why this structure exists and what it does and does not do for them.

What the Anchor Investor provides

It provides credit validation that an unproven platform cannot supply about itself. The Anchor Investor conducted its own credit assessment of the Issuer, independently of the Platform, and committed to its allocation on the basis of that assessment. A professional

credit investor taking 65.0% of the issue at the same price and on the same terms as retail investors is a meaningful signal, and it is the principal comfort available to a retail subscriber to a small unlisted issue of this kind.

It also provides the standing bid described in Section 9.5, which is the only route by which a retail investor can exit before maturity.

What it does not provide

The Anchor Investor does not guarantee the obligations of the Issuer and has no liability to retail investors if the Issuer defaults. It ranks equally with retail holders, not behind them, so it bears loss alongside them rather than ahead of them.

It is not an underwriter. It has committed to its own allocation only, and will not absorb any part of the retail tranche which is not taken up.

Investors should also note that the Anchor Investor participated in setting the pricing of this issue. Its interest in obtaining a higher return is not aligned with the interest of a retail subscriber, although both pay the same price for the same instrument.

9.5 The standing bid, and its limits

The Anchor Investor has undertaken to the Trustee to maintain a standing bid for sukuk held by retail investors, at a price determined by the formula published on the Platform and set out in the Standing Bid Agreement, which is available for inspection under Section 10.3.

The formula prices the sukuk by discounting the remaining scheduled payments at a reference yield, being the yield on Malaysian Government Securities of comparable remaining tenure plus the credit spread at which this issue was priced, and then applying a discount of 1.50 per cent. to reflect the cost of the Anchor Investor providing the facility. The formula is mechanical and is not a negotiation.

Investors should be clear about four limitations:

- **The price is not the nominal value.** Because the formula responds to prevailing yields, an investor selling into the standing bid when yields have risen will receive less than RM100 per RM100 of nominal value, and in adverse conditions materially less. The discount of 1.50 per cent. applies in every case, including when yields have not moved.
- **The bid is capped.** The Anchor Investor is obliged to purchase not more than RM140,000 of nominal value in aggregate in any calendar month. If retail investors seek to sell more than that in a month, requests are met in the order received and the balance carries to the following month.
- **The bid may be suspended.** The undertaking is suspended while an event of default is continuing, during the fifteen business days before and after a periodic payment date, and where the Anchor Investor is prevented from dealing by applicable law. Investors should note that the first of these means the standing bid is least likely to be available at precisely the moment they most want to sell.
- **The bid terminates.** The undertaking ends if the Anchor Investor ceases to hold at least half of its original allocation, on its insolvency, or at the maturity date. If it terminates before maturity, investors have no exit mechanism at all until Recognized Market Operator registration is obtained, and there is no assurance as to when that will occur.

The Trustee monitors compliance with the Standing Bid Agreement and reports on it in the periodic reporting published through the Platform.

9.6 Position limits

The Platform applies limits on the exposure a retail investor may take to any single issuer, in order to prevent a concentrated loss on a single small credit. An investor may not hold more than RM15,000 in nominal value of the sukuk of any one issuer, nor more than twenty-five per cent. of the aggregate value of their holdings across the Platform in any one issuer.

Investors should treat these limits as a floor on prudence rather than a substitute for it. The limits are set by the Platform and may be varied. They do not imply that an investment at the limit is suitable.

9.7 What happens if the Platform ceases to operate

The entitlements of investors do not depend on the continued operation of the Platform. Holdings are issued and safekept by the Digital Asset Custodian, which is registered with the Securities Commission Malaysia and subject to its own regulatory obligations, and the register is replicated daily to the Trustee.

If the Platform ceases to operate, the Trustee is empowered under the Trust Deed to appoint a replacement registrar and paying agent, and the obligations of the Issuer to holders are unaffected. Investors should nonetheless expect the practical consequences to include the suspension of the standing bid facility, since it is administered through the Platform, and a period during which distributions may be delayed while arrangements are transferred.

10. CORPORATE DIRECTORY AND STATUTORY INFORMATION

10.1 The Issuer

Registered name	Suria Teknik Bhd
Registration number	Registration No. 201701034692 (1249873-M)
Registered office	Unit 7-2, Menara Teknik, Jalan SS7/26, 47301 Petaling Jaya, Selangor, Malaysia
Business address	Kilang dan Gudang Suria Teknik, Jalan Perusahaan 4, 68100 Batu Caves, Selangor, Malaysia
Date and place of incorporation	Incorporated in Malaysia on 2 October 2017 as a private limited company, converted to a public company on 15 June 2022 and listed on the ACE Market of Bursa Malaysia on 14 March 2023
Financial year end	31 December
Company secretary	Chong Pui Yee (MAICSA 7048117)

10.2 Advisers and transaction parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Shariah Adviser	Ibnu Hakim Shariah Advisory Sdn Bhd
Rating Agency	Malaysian Rating Corporation Berhad
Auditor	Cheong Rahmat & Co. PLT
Solicitors	Zulkarnain Hew & Co.
Independent Green Assessor	Verdant Assurance Partners Sdn Bhd
Anchor Investor	Nusantara Sustainable Credit Fund, a professional credit fund managed by Nusantara Asset Management Sdn Bhd
Auditors	Cheong Rahmat & Co. PLT (AF 1264)
Solicitors	Zulkarnain Hew & Co.
Rating agency	Malaysian Rating Corporation Berhad

10.3 Documents available for inspection

For so long as any Sukuk remain outstanding, copies of the following documents may be inspected at the registered office of the Issuer during normal business hours on any business day:

- the constitution of the Issuer;
- the audited consolidated financial statements of the Issuer for the three financial years covered by Section 6, together with the reports of the auditors thereon;
- the Trust Deed and the other Transaction Documents;
- the rating letter issued by Malaysian Rating Corporation Berhad in respect of the Sukuk;
- the pronouncement of the Shariah Adviser in respect of the structure of the Sukuk; and
- the material contracts referred to in this document.

10.4 Responsibility statement

The Directors of the Issuer have seen and approved this document. They collectively and individually accept full responsibility for the accuracy of the information contained in it, and confirm that, having made all reasonable enquiries, and to the best of their knowledge and belief, there are no other facts the omission of which would make any statement in this document misleading.

10.5 Consents

The Trustee, Amanah Wilayah Trustee Berhad, the auditors, Cheong Rahmat & Co. PLT (AF 1264), and the solicitors, Zulkarnain Hew & Co., the rating agency, Malaysian Rating Corporation Berhad, Ibnu Hakim Shariah Advisory Sdn Bhd, as Shariah Adviser, have each given and have not withdrawn their written consent to the inclusion in this document of their names and, where applicable, of their reports and opinions in the form and context in which they appear. Tokenkan Capital Sdn Bhd has given and has not withdrawn its written consent to the inclusion of its name as Originating Platform, Registrar and Paying Agent, and Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia has given and has not withdrawn its written consent to the inclusion of its name as Digital Asset Custodian.
