

Pekan Retail Assets Bhd

Registration No. 200901027341 (871264-T)
(Incorporated in Malaysia)

SENIOR UNSECURED MEDIUM TERM NOTES

RM6,000,000 in nominal value

Rated A3 (stable) by RAM Rating Services Berhad

Conventional instrument — not Shariah compliant

Main Market issuer — RM6.0 million issue

65% taken by a professional credit fund as Anchor Investor

Retail tranche RM2.1 million — fractional from RM100

Instrument	Senior Unsecured Medium Term Notes
Programme size	RM30,000,000 in nominal value
Nominal value of this issue	RM6,000,000
Anchor Investor allocation	RM3,900,000 (65.0%)
Retail tranche	RM2,100,000 (35.0%)
Minimum investment	RM100 (fractional)
Maximum single-issuer holding	RM20,000 per investor
Tenure	4 years from the issue date
Coupon rate	6.50 per cent. per annum, fixed
Coupon payment frequency	Semi-annually in arrears
Credit rating	A3 / stable outlook
Issue date	5 November 2026
Maturity date	5 November 2030
Exit before maturity	Anchor Investor standing bid only — see Section 9.5

THIS OFFERING IS MADE TO RETAIL INVESTORS THROUGH THE TOKENKAN PLATFORM IN FRACTIONAL DENOMINATIONS FROM RM100. IT IS NOT A DEPOSIT. IT IS NOT PROTECTED BY PERBADANAN INSURANS DEPOSIT MALAYSIA. THE CAPITAL INVESTED IS AT RISK AND MAY NOT BE RETURNED IN FULL. RETURNS ARE NOT GUARANTEED AND DEPEND ON THE ISSUER CONTINUING TO MEET ITS OBLIGATIONS. THE ISSUER IS A SMALL COMPANY AND THIS IS A SMALL ISSUE; INVESTORS SHOULD EXPECT GREATER CREDIT RISK AND LESS LIQUIDITY THAN ON A LARGE INSTITUTIONAL ISSUANCE. EXIT BEFORE MATURITY IS AVAILABLE ONLY THROUGH THE ANCHOR INVESTOR STANDING BID DESCRIBED IN SECTION 9.5, WHICH IS SUBJECT TO LIMITS AND MAY BE SUSPENDED. THE TOKENKAN PLATFORM IS NOT AN EXCHANGE. NOTHING IN THIS DOCUMENT IS INVESTMENT ADVICE OR A RECOMMENDATION. PROSPECTIVE INVESTORS SHOULD READ THIS DOCUMENT IN FULL, AND IN PARTICULAR THE RISK FACTORS IN SECTION 7, AND SHOULD INVEST ONLY WHAT THEY CAN AFFORD TO LOSE. THE NOTES ARE A CONVENTIONAL INTEREST-BEARING INSTRUMENT AND ARE NOT SHARIAH COMPLIANT. THE ISSUER OWNS TWO SHOPPING CENTRES AND DOES NOT REPAY PRINCIPAL OUT OF EARNINGS; REPAYMENT IN 2030 DEPENDS ON REFINANCING AGAINST PROPERTY VALUES AT THAT TIME. INVESTORS SHOULD READ SECTION 7.2.

1. EXECUTIVE SUMMARY

1.1 Overview of the Issuer

Pekan Retail Assets Bhd owns and operates two neighbourhood shopping centres in Selangor: Pekan Bandar Baru Mall at Bandar Baru Bangi and Pekan Semenyih Mall at Semenyih. Aggregate net lettable area is 386,000 square feet.

Both centres are anchored by supermarket operators and weighted toward groceries, food and beverage, pharmacy, clinics, tuition centres and services rather than toward fashion or destination retail. Portfolio occupancy was 92.8 per cent. as at 31 December 2025.

The Issuer has been listed on the Main Market of Bursa Malaysia since August 2015 and had a market capitalisation of RM108.4 million as at 30 June 2026. It employed 64 persons as at 31 December 2025; centre operations staff are engaged through service contractors.

For the financial year ended 31 December 2025 the Issuer recorded revenue of RM34.2 million, EBITDA of RM17.26 million and profit for the financial year of RM4.48 million, excluding fair value movements. Total assets stood at RM249.8 million and shareholders' funds at RM92.6 million.

1.2 Purpose of the offering

The Issuer is offering RM6,000,000 in nominal value of Senior Unsecured Medium Term Notes, the inaugural issue under its RM30.0 million programme. Of that, RM3,900,000 is allocated to the Anchor Investor and RM2,100,000 to retail investors through the Tokenkan platform in fractional denominations from RM100, subject to a maximum holding of RM20,000 per investor.

Proceeds will fund asset enhancement works at both centres, solar photovoltaic installation and chiller replacement, refinancing and working capital. Section 5 has the detail.

1.3 How a property investment company repays debt, and why it matters

This is the point investors most often misunderstand about property bonds, so it is stated plainly here.

The Issuer does not repay principal out of earnings. Rental income services interest and funds distributions; principal is refinanced at maturity against the value of the properties. There is no scenario in which RM6.0 million of accumulated profit retires this issue in 2030, and none is contemplated.

Repayment therefore depends on two things that cannot be assessed today: what the centres are worth in 2030, and whether credit is available then. Both were favourable in 2015 when the Issuer listed and in 2021 when it last refinanced. Neither is guaranteed for 2030.

What investors have instead of amortisation is asset cover, tested by covenant. Investment properties are carried at RM229.8 million against total borrowings of RM125.8 million, the unencumbered asset covenant requires 130 per cent. cover of unsecured debt and currently stands at 162 per cent., and an independent valuation must be obtained at least every two years and reported to the Trustee. Section 4.6 sets out how those work.

1.4 Why this issuance exists

A conventional RM6.0 million bond issuance is not economic. Fixed costs of RM1.4 million to RM1.9 million, largely irrespective of size, would consume 23 to 32 per cent. of the proceeds. The total cost of this issuance is RM170,000, being 2.83 per cent. of nominal value.

1.5 Key investment highlights

Defensive tenant mix

Both centres are anchored by supermarkets and weighted toward daily needs, food, healthcare and services, which have proved considerably more resilient to online competition than fashion or electronics.

Substantial asset backing

Investment properties carried at RM229.8 million against total borrowings of RM125.8 million, with an unencumbered asset covenant at 130 per cent. currently standing at 162 per cent.

Improving operating metrics

Revenue grew 9.8 per cent. and 8.9 per cent. over the last two years, occupancy improved to 92.8 per cent., and borrowings to EBITDA improved from 8.5 to 7.3 times.

Meaningful disposal protection

Because the Issuer owns only two assets, the mandatory redemption on disposal of a centre in Section 4.5 is a substantive protection rather than boilerplate.

Rated and independently valued

A3 stable from RAM, with a covenanted biennial independent valuation reported to the Trustee.

1.6 Key risks

A summary only. Section 7 must be read in full.

- **Repayment depends on refinancing** against 2030 property values and credit conditions, not on earnings.
- **Two assets only** – Bandar Baru contributed 61.4 per cent. of FY2025 revenue and Semenyih 32.2 per cent.
- **Thinnest interest cover on the Platform**, at 2.8 times against a 2.00 times covenant.

- **Valuation sensitivity is the binding constraint.** A 50 basis point rise in capitalisation rates would cut carrying value by approximately RM19.4 million and take pro forma gearing to approximately 1.72 times against a 1.75 times covenant.
- **Unsecured, behind RM104.0 million** of secured borrowings charged over both centres.
- **Anchor lease expiry.** The Bandar Baru anchor lease expires in 2029, within the tenure.
- **Rising tenant arrears.** Receivable impairment rose from RM640,000 to RM810,000 over three years.
- **Interest rate exposure.** RM42.0 million of borrowings is floating rate.
- **Non-discretionary reinvestment.** Capital expenditure absorbed the majority of operating cash flow in every year.
- **Competing supply** under construction in the Bangi and Semenyih corridor.
- **Conventional instrument**, not Shariah compliant.
- **Exit is limited.** Only the Anchor Investor standing bid, at a 1.25 per cent. discount to formula, capped at RM105,000 monthly and suspended while a default continues.

1.7 Summary financial information

RM'000	FY2023	FY2024	FY2025
Revenue	28,600	31,400	34,200
EBITDA	13,780	15,520	17,260
Profit for the financial year	2,700	3,500	4,480
Total assets	231,000	239,620	249,840
Total liabilities	146,400	151,520	157,260
Total equity	84,600	88,100	92,580
Total borrowings	116,600	121,200	125,800
Net cash from operating activities	8,200	9,600	11,200
Gross gearing (times)	1.38	1.38	1.36
EBITDA / interest expense (times)	2.6	2.7	2.8

1.8 Operating statistics

	FY2023	FY2024	FY2025
Net lettable area ('000 sq ft)	386	386	386
Portfolio occupancy (%)	89.4	91.2	92.8
Weighted average lease expiry (years)	2.4	2.6	2.5
Rental reversion on renewal (%)	1.8	3.1	3.4
Tenant sales growth (%)	3.6	5.4	4.8
Footfall (million visits)	8.4	9.2	9.8
Impairment of trade receivables (RM'000)	640	720	810

2. ISSUER BACKGROUND

2.1 History and development

The Issuer was incorporated in August 2009 by Yap Beng Hoe, who had previously managed shopping centres for a regional operator, to acquire an underperforming centre at Bandar Baru Bangi. That centre, refurbished and re-tenanted between 2010 and 2013, remains the larger of the two assets.

Pekan Semenyih Mall was acquired in 2017 from a developer following completion. The Issuer has followed a consistent approach of acquiring existing neighbourhood centres in established residential catchments at a discount to replacement cost and improving them, rather than developing new centres, which management regards as carrying development risk disproportionate to the returns available in Malaysian retail.

The Issuer listed on the Main Market of Bursa Malaysia in August 2015, raising RM32.6 million. This is its inaugural debt capital markets issuance; it has funded itself to date through equity and bank term loans.

2.2 Business model

The Issuer earns rental income from tenants under leases of typically three years, supplemented by turnover rent linked to tenant sales, car park income and advertising income. Property operating costs are substantially recovered from tenants through service charges.

The economics turn on occupancy and rent per square foot, both of which depend on footfall, which depends in turn on the tenant mix and on the anchor tenants who draw visitors. This creates the dependency described in Section 7.2: anchors occupy large areas at below-average rents, and their value lies in the specialty rents their footfall supports rather than in the rent they themselves pay.

A neighbourhood centre differs from a regional mall in a way that matters to a creditor. Its catchment is the surrounding residential population rather than a wide travel-to-shop area, its tenant mix is weighted to necessity rather than discretionary spending, and its performance is therefore less volatile but also less capable of growth. Both characteristics are visible in the figures: revenue growth of around nine per cent. annually, and occupancy that has not fallen below 89 per cent.

2.3 Revenue segments

Segment (RM'000)	FY2023	FY2024	FY2025
Base rental income from anchor and specialty tenants	22,400	24,400	26,400
Turnover rent linked to tenant sales	1,800	2,200	2,700
Car park and advertising income	3,200	3,500	3,800
Service charge surplus and other income	1,200	1,300	1,300
Total revenue	28,600	31,400	34,200

Turnover rent grew fastest, from RM1.8 million to RM2.7 million, reflecting recovery in tenant sales. Investors should note that turnover rent is the most volatile component and falls first in a downturn.

2.4 The portfolio

Centre	Location	NLA ('000 sq ft)	Occupancy	FY2025 revenue
Pekan Bandar Baru Mall	Bandar Baru Bangi, Selangor	238	94.2%	21,000
Pekan Semenyih Mall	Semenyih, Selangor	148	90.6%	11,000
Car park and advertising (both centres)		n/a	n/a	2,200
Total		386	92.8%	34,200

Both centres are within the same corridor in southern Selangor, approximately eighteen kilometres apart, which limits geographic diversification but allows shared management and marketing resources.

All assets are in Malaysia and all revenue is in ringgit.

2.5 Management and employees

The Issuer employed 64 persons directly as at 31 December 2025, comprising centre management, leasing, marketing, finance and administration. Security, cleaning, landscaping and technical maintenance are provided by service contractors rather than by direct employees, which is why the headcount is low relative to the size of the asset base.

2.6 Strategy

The strategy has three elements: to raise occupancy at Semenyih toward the level achieved at Bandar Baru through re-tenanting; to complete the asset enhancement programme at both centres, which this issue part-funds; and to reduce borrowings to EBITDA below 6.5 times over the medium term. The Issuer does not intend to develop new centres or to acquire further assets until leverage has been reduced.

3. CORPORATE STRUCTURE, SHAREHOLDING AND GOVERNANCE

3.1 Group structure

The Issuer holds Pekan Bandar Baru Mall directly and Pekan Semenyih Mall through a wholly owned subsidiary which is the borrower under the term loan secured on that centre.

Subsidiary / associate	Effective interest	Principal activity
Pekan Semenyih Sdn Bhd	100%	Ownership of Pekan Semenyih Mall
Pekan Centre Management Sdn Bhd	100%	Centre management, leasing and marketing services
Pekan Parking Sdn Bhd	100%	Operation of car parks at both centres

3.2 Shareholding of the Issuer

The issued share capital of the Issuer is RM74,000,000 comprising 296,000,000 ordinary shares of RM0.25 each. The shares are listed on the Main Market of Bursa Malaysia, with a market capitalisation of RM108.4 million as at 30 June 2026.

Shareholder	Ordinary shares held	%
Pekan Holdings Sdn Bhd	97,680,000	33.0
Meridian Life Assurance Berhad	44,400,000	15.0
Koperasi Pelaburan Bersatu Berhad	29,600,000	10.0
Public shareholders	112,480,000	38.0
Directors and key management	11,840,000	4.0
Total	296,000,000	100.0

3.3 Board of Directors

The Board comprises six members, of whom three are independent non-executive directors.

Name	Age	Designation	Appointed
Dato' Sim Kok Choon	64	Independent Non-Executive Chairman	April 2015
Yap Beng Hoe	56	Group Managing Director	August 2009
Rashidah binti Salleh	47	Executive Director and Chief Financial Officer	June 2018
Anthony Loh Wei Ming	51	Executive Director and Head of Asset Management	February 2016
Datin Chong Lai Wan	58	Independent Non-Executive Director	April 2015
Zulhilmi bin Osman	49	Independent Non-Executive Director	November 2022

3.4 Key management

The senior management team combines retail property investment, centre management and leasing experience.

Name	Position	Relevant experience
Yap Beng Hoe	Group Managing Director	Founder; 27 years in retail property, previously in centre management for a regional operator.
Rashidah binti Salleh	Chief Financial Officer	Chartered accountant with 18 years' experience, including seven in real estate investment finance.
Anthony Loh Wei Ming	Head of Asset Management	21 years in shopping centre management, leasing and asset enhancement.
Sarala Devi Menon	Head of Leasing	15 years in retail leasing and tenant mix planning.

3.5 Corporate governance

The Board of Directors of the Issuer is responsible for the overall stewardship of the Group, including the approval of strategy and annual budgets, the oversight of risk management and internal control, the approval of material capital commitments and financing arrangements, and the integrity of financial reporting. The Board meets at least quarterly and on such other occasions as the business of the Group requires.

The Board is supported by three standing committees. The Audit and Risk Committee, comprising a majority of independent directors and chaired by an independent director, reviews the financial statements before submission to the Board, oversees the internal audit function and the relationship with the external auditors, and monitors the principal risks of the Group and the adequacy of mitigating controls. The Nomination and Remuneration Committee reviews the composition and effectiveness of the Board and the remuneration framework for directors and senior management. The Board Investment Committee reviews material capital expenditure, acquisitions and financing proposals before they are submitted to the Board.

The Group maintains an internal audit function which reports functionally to the Audit and Risk Committee and administratively to the

chief executive. The internal audit plan is approved annually by the Audit and Risk Committee and is prepared on a risk-based methodology covering the principal operating and financial processes of the Group. The Group also maintains a whistleblowing policy under which employees and third parties may report suspected improprieties directly to the chairman of the Audit and Risk Committee.

For so long as the Bonds remain outstanding, the Issuer has undertaken to maintain a Board comprising not fewer than five directors, of whom at least two shall be independent, and to procure that the Audit and Risk Committee continues to be chaired by an independent director.

Pekan Holdings Sdn Bhd holds 33 per cent. of the voting shares. The Issuer leases management office space from a company connected to the Managing Director; the lease was independently valued and approved in accordance with the Main Market Listing Requirements, and the terms are disclosed in the annual report.

4. TERMS OF THE NOTES

This section summarises the principal terms and conditions of the Bonds. It is a summary only and is qualified in its entirety by the detailed provisions of the Trust Deed, the Programme Agreement and the other Transaction Documents, copies of which are available for inspection at the registered office of the Issuer during normal business hours.

4.1 Summary of principal terms

Issuer	Pekan Retail Assets Bhd
Instrument	Senior Unsecured Medium Term Notes issued under the Medium Term Note Programme of the Issuer and distributed through the Tokenkan platform
Programme size	RM30,000,000 in nominal value
Principal amount of this issuance	RM6,000,000
Issue price	100.00 per cent. of nominal value
Denomination	RM1,000 nominal value per unit, tradable in minimum blocks of RM250,000 nominal value
Tenure	4 years from the issue date
Issue date	5 November 2026
Maturity date	5 November 2030
Coupon rate	6.50 per cent. per annum, fixed for the full tenure
Coupon payment frequency	Semi-annually in arrears
Coupon payment dates	5 May and 5 November
Day count fraction	Actual/365 (Fixed)
Maturity structure	Bullet repayment of the full nominal value on the maturity date
Redemption at maturity	At 100 per cent. of the nominal value, together with accrued and unpaid coupon up to but excluding the maturity date
Security	Unsecured, supported by a negative pledge, an unencumbered asset covenant and a biennial valuation requirement
Ranking	Senior unsecured; ranking pari passu with all other present and future unsecured and unsubordinated obligations of the Issuer
Credit rating	A3 by RAM Rating Services Berhad, with a stable outlook
Form	Scripless, prescribed under the Real Time Electronic Transfer of Funds and Securities System (RENTAS)
Listing status	Not listed on any stock exchange; reported on the Electronic Trading Platform
Governing law	Laws of Malaysia

4.2 Principal amount and denomination

The Issuer proposes to issue RM6,000,000 in nominal value of Notes under the Medium Term Note Programme. The Bonds will be issued in denominations of RM1,000 nominal value per unit. Trading in the secondary market shall be in minimum blocks of RM250,000 nominal value or such other amount as may be prescribed by the operator of RENTAS from time to time.

The Bonds constitute direct obligations of the Issuer. They are offered through the Tokenkan platform in fractional interests, and are accordingly available to investors who have completed the suitability assessment operated by the platform, including individual investors. Prospective investors should note that eligibility to subscribe is determined by the platform operator in accordance with the requirements applicable to it, and that this document is a disclosure document rather than an invitation extended generally to the public.

4.3 Coupon rate and payment

The Notes carry a coupon of 6.50 per cent. per annum on the nominal value, fixed for the full tenure of four years. The semi-annual coupon amount is RM195,000 on the full issue, equivalent to RM3.25 per RM100 of nominal value held. Coupon is computed on an actual over 365 day basis. The rate reflects the A3 rating, the concentration of the Issuer in two assets, and coverage of interest at 2.8 times, which is the thinnest of the offerings on the Platform.

Coupon payments shall be made in arrears on the coupon payment dates specified above. Where a coupon payment date falls on a day which is not a business day, payment shall be made on the immediately succeeding business day without any adjustment to the amount payable, in accordance with the Following Business Day Convention (unadjusted).

The following table sets out the indicative coupon payment schedule for the issuance, assuming the full nominal amount remains outstanding throughout the tenure and no early redemption occurs.

Period	Coupon payment date	Indicative payment (RM'000)
Period 1	5 May 2027	195
Period 2	5 November 2027	195
Period 3	5 May 2028	195
Period 4	5 November 2028	195
Period 5	5 May 2029	195
Period 6	5 November 2029	195
Period 7	5 May 2030	195
Period 8 (final)	5 November 2030	6,195 (including nominal value of 6,000)

The schedule above is indicative only. Actual amounts payable will be computed on an Actual/365 (Fixed) basis by reference to the number of days in each coupon period.

4.4 Maturity structure

The Notes are structured as a single bullet maturity. The full nominal value of RM6,000,000 falls due on 5 November 2030 together with the final coupon. Investors should understand plainly that a property investment company does not repay debt out of earnings. Rental income services interest and funds distributions; principal is refinanced at maturity against the value of the properties. Repayment therefore depends on property values and credit availability in 2030, neither of which can be assessed today. This is the central risk in these Notes and is discussed in Section 7.2.

4.5 Early redemption

The Bonds incorporate the following early redemption provisions:

Optional early redemption (call)

The Issuer may, on any coupon payment date falling on or after the second anniversary of the issue date, redeem all but not part only of the Notes on not less than thirty days' notice, at 100.75 per cent. of nominal value before the third anniversary and 100.35 per cent. thereafter, together with accrued and unpaid coupon.

Mandatory redemption on disposal of a centre

If the Issuer disposes of either Pekan Bandar Baru Mall or Pekan Semenyih Mall, the net proceeds shall be applied within ninety days to the redemption of Notes at nominal value together with accrued coupon, unless the Trustee is satisfied that the proceeds will be applied within twelve months to the acquisition of a replacement investment property of comparable value. Given that the Issuer owns only two material assets, investors should treat this as a substantive protection.

Redemption following a change of control

Upon a change of control, being an event whereby Pekan Holdings Sdn Bhd ceases to hold, directly or indirectly, more than thirty per cent. of the voting shares of the Issuer, each Bondholder may require redemption at nominal value together with accrued coupon within sixty days.

Redemption for taxation reasons

The Issuer may redeem all but not part only of the Notes at nominal value together with accrued coupon if a change in Malaysian tax law obliges it to pay additional amounts.

No investor put

Save on a change of control, investors have no right to require redemption before maturity. Exit before maturity is available only through the Anchor Investor standing bid described in Section 9.5.

4.6 Security and collateral

The Notes are unsecured obligations of the Issuer. Both shopping centres are already charged to existing term lenders, at RM104.0 million out of total borrowings of RM125.8 million, or 82.7 per cent., so no first-ranking security of substance was available.

The protections are contractual:

- a negative pledge preventing further security over the present and future assets of the Issuer, save for permitted security comprising security existing at the issue date and disclosed in Section 6.6, security arising by operation of law, and refinancing security replacing existing security on no more onerous terms. Unlike the developer offerings on the Platform, this covenant does substantially freeze the position, because the Issuer does not acquire new assets in the ordinary course;
- an unencumbered asset covenant requiring consolidated assets not subject to security to represent at all times not less than one hundred and thirty per cent. of aggregate unsecured financial indebtedness, tested semi-annually by reference to the most recent valuation of the Independent Valuer;
- a valuation covenant requiring an independent valuation of each investment property not less than once every two years, reported to the Trustee, which is the mechanism by which investors learn of any deterioration in asset value;
- the mandatory redemption on disposal of a centre described in Section 4.5; and
- a distribution restriction preventing dividends where an event of default is continuing, where a covenant would be breached following payment, or where dividends in any financial year would exceed sixty per cent. of consolidated profit.

4.7 Ranking of investors

The Notes constitute direct, unconditional, unsecured and unsubordinated obligations of the Issuer, ranking pari passu among themselves and with its other unsecured and unsubordinated obligations, save for obligations mandatorily preferred by law.

The Notes rank behind secured borrowings of RM104.0 million to the extent of the securing assets, being both shopping centres. Investors should understand that this means the entire productive asset base of the Issuer is pledged to other lenders.

Tenant security deposits held by the Issuer, amounting to RM11.8 million as at 31 December 2025, are repayable to tenants and are not available to Bondholders.

Fractional interests rank equally with whole units and with the Anchor Investor allocation.

4.8 Covenants

The Trust Deed contains positive, negative and financial covenants customary for an issuance of this nature. The principal financial covenants, to be tested semi-annually by reference to the audited consolidated financial statements of the Issuer and, where applicable, its unaudited semi-annual management accounts, are as follows:

Financial covenant	Required level	Position as at 31 December 2025
Gross gearing ratio (total borrowings to total equity)	Not more than 1.75 times	1.36 times
Total borrowings to EBITDA	Not more than 9.00 times	7.3 times
EBITDA to interest expense	Not less than 2.00 times	2.83 times
Unencumbered assets to unsecured financial indebtedness	Not less than 130 per cent.	162 per cent.
Consolidated shareholders' funds	Not less than RM80.0 million	RM92.6 million

The principal negative covenants restrict the Issuer from, among other things: (a) creating or permitting to subsist any security interest over its assets other than permitted security; (b) disposing of a material part of its assets otherwise than on arm's length terms in the ordinary course of business; (c) undertaking any substantial change to the general nature of its business; (d) entering into any amalgamation, demerger, merger or corporate reconstruction which would have a material adverse effect; and (e) declaring or paying any dividend or making any distribution where an event of default is continuing or would result from such payment.

4.9 Events of default

The occurrence of any of the following shall constitute an event of default, subject to the grace periods specified in the Trust Deed: non-payment of any amount due under the Bonds within seven business days of the due date; breach of any financial covenant; breach of any other obligation which is not remedied within thirty days of notice; cross-default in respect of any other financial indebtedness of the Issuer or any material subsidiary exceeding RM25.0 million in aggregate; the commencement of insolvency, winding-up or receivership proceedings; the cessation or material change of business; the invalidity or unenforceability of any Transaction Document; and the occurrence of any event having a material adverse effect on the ability of the Issuer to perform its payment obligations.

Upon the occurrence of an event of default which is continuing, the Trustee may, and shall if so directed by an extraordinary resolution of the Bondholders, declare the Bonds to be immediately due and payable at their nominal value together with accrued and unpaid coupon.

4.10 Roles and parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Rating Agency	RAM Rating Services Berhad
Auditor	Lau Devanathan & Co. PLT
Solicitors	Mahmud Chin & Partners
Independent Valuer	Chandra Nakamura Valuers Sdn Bhd
Anchor Investor	Meridian Credit Opportunities Fund I, a professional credit fund managed by Meridian Capital Partners Sdn Bhd

5. USE OF PROCEEDS

5.1 Summary of application

The gross proceeds of RM6,000,000 are to be applied as set out below.

Application	Amount (RM'000)	Proportion	Expected timing
Asset enhancement at both centres	3,200	53.3%	Q1 2027 to Q4 2028
Solar photovoltaic installation and chiller replacement	1,300	21.7%	Q2 2027 to Q2 2028
Refinancing of existing borrowings	1,200	20.0%	Within 30 days of issue
Working capital	130	2.2%	As required
Expenses of the offering (see 5.2)	170	2.8%	On issue
Total gross proceeds	6,000	100.0%	

5.2 Expenses of the offering, including Platform fees

This offering is originated on the Tokenkan platform rather than arranged by an investment bank, and the fee structure differs from that of a conventional issuance. It is set out in full below, because the economic case for this offering rests on that difference and investors are entitled to test it.

The Platform charges the Issuer a tiered origination and listing fee, at 2.5 per cent. of nominal value for issues of RM1 million to RM5 million, 1.5 per cent. from RM5 million to RM10 million and 1.0 per cent. above RM10 million, subject in each case to a minimum of RM25,000. This issue falls in the 1.5 per cent. tier, giving a fee of RM90,000.

Payee	Amount (RM'000)	Basis
Tokenkan Capital Sdn Bhd - origination and listing fee	90	1.5% of nominal value (RM5m-RM10m tier)
RAM Rating Services Berhad - rating and surveillance	44	Fixed
Trustee - acceptance and annual fees (4 years)	20	Fixed
Independent Valuer	10	Fixed
Solicitors and reporting accountants	6	Fixed
Total charged against proceeds	170	

The total cost of this issuance is RM170,000, being 2.83 per cent. of nominal value. Investors should compare this against the fixed cost of a conventional issuance, which the Issuer estimates at RM1.4 million to RM1.9 million irrespective of size once rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are aggregated. On an issue of RM6,000,000 a conventional cost base of that order would consume between 23 per cent. and 32 per cent. of the proceeds, which is the reason this issuance would not otherwise have taken place.

Fees charged to investors

Investors pay no fee on subscription. The Platform charges a transaction fee of 1.0 per cent. on every purchase and on every sale executed through it, including a sale into the standing bid described in Section 9.5. On a subscription of RM200 the fee is RM2.

Investors should note the effect of this on a short holding period. An investor who subscribes and later sells into the standing bid pays 1.0 per cent. on the way in and 1.0 per cent. on the way out, and bears the standing bid discount described in Section 9.5 in addition. Round-trip cost is therefore material relative to a single periodic distribution, and this instrument is not suited to short-term trading.

5.3 Description of each application

Asset enhancement

RM3.2 million will fund the reconfiguration of the first-floor food court at Bandar Baru into a larger food and beverage precinct with additional seating, the subdivision of vacant upper-floor space at Semenyih into smaller units suited to service and clinic tenants, common area upgrading at both centres, and works required to bring affected areas within current accessibility and fire safety standards.

The Semenyih subdivision is the element management expects to contribute most directly, because the vacant upper-floor space is the principal cause of the occupancy gap between the two centres. Smaller units let more readily to the service and healthcare tenants the catchment supports, and at higher rent per square foot than a single large tenancy would command.

Investors should note three things. The works will be carried out in operating centres, with disruption to trading and rental abatement for affected tenants. The projected uplift depends on re-letting enhanced space at higher rents, which is not assured. And no contribution is expected before FY2029, while coupon is payable from May 2027.

Solar photovoltaic installation and chiller replacement

RM1.3 million will fund a 1.8 MWac rooftop solar installation across both centres under net energy metering arrangements, and the replacement of end-of-life chiller plant at Bandar Baru.

Electricity is the largest single operating cost of a shopping centre and is only partly recoverable from tenants through service charges. Management estimates the two measures together will reduce electricity cost by approximately RM840,000 annually, of which

approximately RM520,000 accrues to the Issuer rather than being passed through. Unlike the enhancement works, this benefit does not depend on re-letting anything and begins as soon as the installation is commissioned, which makes it the most reliable element of the programme.

Refinancing

RM1.2 million will prepay revolving credit and the current portion of term borrowings, all floating rate. This increases the fixed rate proportion of total borrowings from 67 to 71 per cent., which is material given the interest cover sensitivity described in Section 6.4.

Working capital

RM130,000 will fund leasing incentives and fit-out contributions on new tenancies at Semenyih.

5.4 Management of proceeds

Proceeds will be credited on the issue date to a Disbursement Account operated by the Issuer under the supervision of the Trustee. Withdrawals require a certificate of two authorised officers confirming the amount is required for an application in Section 5.1, supported by the certificate of the project quantity surveyor for enhancement works, supplier invoices for plant, and the redemption statement of the relevant lender for the refinancing.

Pending application, balances may be invested only in liquid instruments issued or guaranteed by the Government of Malaysia or licensed Malaysian financial institutions, of a tenure not exceeding three months.

The Issuer may reallocate up to ten per cent. of gross proceeds between applications on notice to the Trustee. Any greater reallocation requires approval by extraordinary resolution.

The Issuer will report quarterly through the Platform on the application of proceeds, on occupancy and rental reversion at both centres, and on covenant compliance, and will provide the Trustee with the biennial independent valuation required under Section 4.6.

5.5 If the offering is not fully subscribed

This offering is not underwritten. The Anchor Investor has committed to its allocation of RM3,900,000 but will not absorb any part of the retail tranche which is not taken up.

The minimum level of subscription for the retail tranche is RM1,050,000, being half of it. If retail subscriptions fall below that level, the offering is withdrawn in its entirety, including the Anchor Investor allocation, and all subscription monies are returned in full within five business days without interest. Subscription monies are held in a segregated client account with a licensed Malaysian bank and form no part of the assets of the Issuer or of the Platform.

If retail subscriptions reach RM1,050,000 but fall short of RM2,100,000, the offering proceeds at the amount raised, applied in the order: expenses; refinancing; solar and chiller works; then asset enhancement, with the Bandar Baru food court reconfiguration deferred before the Semenyih subdivision. The coupon does not change.

5.6 Expected effect

- reconfiguration of approximately 22,000 square feet at Bandar Baru and subdivision of approximately 18,000 square feet at Semenyih;
- a 1.8 MWac rooftop solar installation and chiller replacement, reducing electricity cost by approximately RM840,000 annually of which approximately RM520,000 accrues to the Issuer;
- an increase in the fixed rate proportion of total borrowings from 67 to 71 per cent.;
- gross gearing rising from 1.36 to 1.41 times and borrowings to EBITDA from 7.3 to 7.6 times, as set out in Section 6.5.

6. FINANCIAL INFORMATION

The financial information set out in this section has been extracted from the audited consolidated financial statements of the Issuer for the three financial years ended 31 December 2023, 2024 and 2025, which were prepared in accordance with Malaysian Financial Reporting Standards and the requirements of the Companies Act. The auditors of the Issuer, Lau Devanathan & Co. PLT (AF 0928), issued unqualified audit opinions in respect of each of the three financial years presented.

Investors should read the financial information below together with the accompanying commentary and the risk factors set out in Section 7. Historical results are not necessarily indicative of results that may be expected for any future period.

6.1 Consolidated statements of comprehensive income

All amounts are stated in RM'000 unless otherwise indicated. Figures in parentheses denote negative amounts.

	FY2023	FY2024	FY2025
Revenue	28,600	31,400	34,200
Cost of sales	11,400	12,200	13,000
Gross profit	17,200	19,200	21,200
Other operating income	380	420	460
Administrative and other operating expenses	3,800	4,100	4,400
EBITDA	13,780	15,520	17,260
Depreciation and amortisation	5,200	5,600	5,900
Operating profit (EBIT)	8,580	9,920	11,360
Finance costs	5,400	5,800	6,100
Profit before taxation	3,180	4,120	5,260
Taxation	480	620	780
Profit for the financial year	2,700	3,500	4,480
EBITDA margin (%)	48.2	49.4	50.5
Net profit margin (%)	9.4	11.1	13.1

Revenue increased from RM28.6 million in FY2023 to RM31.4 million in FY2024 and RM34.2 million in FY2025, growth of 9.8 per cent. and 8.9 per cent. Growth came from occupancy improvement, positive rental reversions on renewal, and growth in turnover rent as tenant sales recovered.

EBITDA increased from RM13.78 million to RM17.26 million and the EBITDA margin from 48.2 per cent. to 50.5 per cent. Margins are high because property operating expenses, though substantial, are largely recovered from tenants through service charges.

Interest expense increased from RM5.40 million to RM6.10 million. Investors should note how much of EBITDA this consumes: cover was 2.6, 2.7 and 2.8 times, the thinnest of the offerings on the Platform, and the reason the coupon is 6.50 per cent.

Profit for the financial year increased from RM2.70 million to RM4.48 million. These figures exclude fair value movements on investment properties, which the Issuer reports separately and which do not affect cash.

6.2 Consolidated statements of financial position

	FY2023	FY2024	FY2025
<i>NON-CURRENT ASSETS</i>			
Investment properties, property and equipment	216,400	222,600	229,800
Deferred tax assets and other non-current assets	2,800	3,100	3,400
<i>Total non-current assets</i>	<i>219,200</i>	<i>225,700</i>	<i>233,200</i>
<i>CURRENT ASSETS</i>			
Trade receivables from tenants and other receivables	3,400	3,700	4,000
Consumables and spare parts	200	220	240
Prepayments, deposits and other current assets	1,400	1,600	1,800
Cash, bank balances and short-term deposits	6,800	8,400	10,600
<i>Total current assets</i>	<i>11,800</i>	<i>13,920</i>	<i>16,640</i>
TOTAL ASSETS	231,000	239,620	249,840
<i>EQUITY</i>			
Share capital	74,000	74,000	74,000
Reserves and retained earnings	10,600	14,100	18,580
<i>Total equity</i>	<i>84,600</i>	<i>88,100</i>	<i>92,580</i>
<i>NON-CURRENT LIABILITIES</i>			
Borrowings – non-current	108,000	112,000	116,000
Deferred tax, tenant security deposits and long-term provisions	14,200	14,800	15,400
<i>Total non-current liabilities</i>	<i>122,200</i>	<i>126,800</i>	<i>131,400</i>
<i>CURRENT LIABILITIES</i>			
Borrowings – current	8,600	9,200	9,800
Trade payables and accruals	9,800	10,400	11,200
Rent received in advance, other payables and taxation	5,800	5,120	4,860
<i>Total current liabilities</i>	<i>24,200</i>	<i>24,720</i>	<i>25,860</i>
<i>Total liabilities</i>	<i>146,400</i>	<i>151,520</i>	<i>157,260</i>
TOTAL EQUITY AND LIABILITIES	231,000	239,620	249,840

Total assets increased from RM231.0 million to RM249.8 million over the review period. Investment properties stood at RM229.8 million as at 31 December 2025, being 92.0 per cent. of total assets. The Issuer is, in substance, two shopping centres and the debt used to acquire them.

Investment properties are carried at fair value on the basis of independent valuations. Investors should read the capitalisation rate sensitivity in Section 7.2: the carrying value is an estimate, and equity would fall directly with any downward revaluation.

Total equity increased from RM84.6 million to RM92.6 million. Share capital was unchanged at RM74.0 million. Total borrowings increased from RM116.6 million to RM125.8 million, of which RM104.0 million was secured.

Gross gearing was 1.38, 1.38 and 1.36 times. Borrowings to EBITDA improved from 8.5 to 7.3 times against a covenanted maximum of 9.00 times.

The current ratio was 0.49, 0.56 and 0.64 times. A ratio well below one is normal for a property investment company, since current liabilities include rent received in advance and the current portion of long-dated borrowings expected to be refinanced rather than repaid from current assets. Investors should nonetheless note that this depends on refinancing remaining available.

6.3 Consolidated statements of cash flows (summary)

	FY2023	FY2024	FY2025
Net cash generated from operating activities	8,200	9,600	11,200
Net cash used in investing activities	(6,400)	(6,800)	(7,400)
Net cash from/(used in) financing activities	(400)	(1,200)	(1,600)
<i>Net increase/(decrease) in cash and cash equivalents</i>	<i>1,400</i>	<i>1,600</i>	<i>2,200</i>
Cash and cash equivalents at beginning of year	5,400	6,800	8,400
Cash and cash equivalents at end of year	6,800	8,400	10,600

Net cash generated from operating activities increased from RM8.20 million in FY2023 to RM11.20 million in FY2025, with conversion

against EBITDA of 59.5, 61.9 and 64.9 per cent. The gap reflects interest paid and working capital in service charge recovery.

Net cash used in investing activities of RM6.40 million, RM6.80 million and RM7.40 million comprises capital expenditure on the two centres, including the first phase of the Bandar Baru common area upgrade and mechanical and electrical plant renewal.

Investors should note that investing outflows absorbed the majority of operating inflows in each year, leaving free cash flow of RM1.80 million, RM2.80 million and RM3.80 million against total borrowings of RM125.8 million. A shopping centre requires continuous reinvestment simply to remain competitive, and that reinvestment is not discretionary in the way it appears.

Cash increased from RM6.80 million to RM10.60 million.

6.4 Selected financial ratios

Ratio	FY2023	FY2024	FY2025
EBITDA margin (times revenue, %)	48.2	49.4	50.5
Return on equity (%)	3.2	4.0	4.8
Total borrowings (RM'000)	116,600	121,200	125,800
Net debt (RM'000)	109,800	112,800	115,200
Gross gearing (times)	1.38	1.38	1.36
Net gearing (times)	1.30	1.28	1.24
Total borrowings / EBITDA (times)	8.5	7.8	7.3
EBITDA / finance costs (times)	2.6	2.7	2.8
Current ratio (times)	0.49	0.56	0.64

Gross gearing was 1.38, 1.38 and 1.36 times against a covenanted maximum of 1.75 times, and would be 1.41 times on a pro forma basis.

Borrowings to EBITDA improved from 8.5 to 7.3 times against a covenanted maximum of 9.00 times, and would be 7.6 times pro forma, leaving 1.4 times of coverage.

EBITDA cover of interest improved from 2.6 to 2.8 times against a covenanted minimum of 2.00 times. This is the metric to watch. A decline in occupancy from 92.8 per cent. to approximately 83 per cent., which a competing centre opening in either catchment could produce, would reduce EBITDA to approximately RM14.2 million and take cover to approximately 2.2 times on the pro forma interest cost. The Issuer also carries RM42.0 million of floating rate borrowings; a 100 basis point increase in rates would reduce cover by a further 0.2 times.

Investors should also weigh the valuation sensitivity in Section 7.2, which is not captured in these earnings-based ratios: a 50 basis point rise in capitalisation rates would take pro forma gearing to approximately 1.72 times against the 1.75 times covenant.

Return on equity was 3.2, 4.0 and 4.8 per cent., which is characteristic of an asset-heavy property company carrying its assets at fair value.

6.5 Pro forma effect of the issuance

The table below illustrates the effect of the issuance on the consolidated statement of financial position of the Issuer as at 31 December 2025, on the assumption that the issuance had been completed on that date and that the proceeds were applied in the manner described in Section 5. The pro forma information is presented for illustrative purposes only and does not purport to represent the actual financial position of the Issuer following the issuance.

	Audited as at 31 December 2025	Pro forma after issuance
Cash, bank balances and deposits	10,600	15,230
Total assets	249,840	254,470
Total borrowings	125,800	130,600
Total liabilities	157,260	162,060
Total equity	92,580	92,410
Gross gearing (times)	1.36	1.41
Total borrowings / EBITDA (times)	7.3	7.6

The pro forma assumes gross proceeds of RM6.0 million, application of RM1.2 million to prepayment of existing borrowings within thirty days of issue, and RM170,000 of offering expenses charged against equity.

Gross gearing would rise from 1.36 to 1.41 times and borrowings to EBITDA from 7.3 to 7.6 times, both within covenant.

The pro forma does not capture the effect of a valuation decline. A 50 basis point rise in the portfolio capitalisation rate would reduce investment property carrying value by approximately RM19.4 million and equity correspondingly, taking pro forma gross gearing to approximately 1.72 times against the 1.75 times covenant. Investors should regard that as the binding constraint rather than the earnings ratios.

The pro forma reflects no income uplift from the asset enhancement works, which are not expected to contribute before FY2024

6.6 Existing borrowings

As at 31 December 2025, the total borrowings of the Group amounted to RM125.8 million, comprising the facilities summarised below. The Issuer confirms that it has not defaulted on any payment of principal or coupon in respect of any of its borrowings during the three financial years under review.

Facility	Outstanding (RM'000)	Maturity profile
Term loan – Pekan Bandar Baru Mall (secured)	68,000	Amortising to 2032
Term loan – Pekan Semenyih Mall (secured, at subsidiary level)	36,000	Bullet, 2031
Revolving credit and working capital lines (unsecured)	12,000	Annual review
Current portion of borrowings	9,800	Within 12 months
Total borrowings	125,800	

7. RISK FACTORS

Before making an investment decision, prospective investors should carefully consider all the information contained in this document, including in particular the risk factors set out below. The risks described are those which the Issuer currently considers material. They are not exhaustive, and additional risks not presently known to the Issuer, or which the Issuer currently considers immaterial, may also impair its business, financial condition and ability to meet its obligations under the Bonds.

If any of the following risks materialises, the business, financial condition, results of operations and prospects of the Issuer could be materially and adversely affected. In such circumstances, the Issuer may be unable to pay coupon on, or repay the nominal value of, the Bonds, and investors may lose part or all of their investment.

7.1 Risks relating to the Issuer and the Bonds

Credit risk

The Bonds represent unsecured or, where applicable, secured obligations of the Issuer alone. Payment of coupon and the repayment of the nominal value depend entirely upon the ability of the Issuer to generate sufficient cash flow from its operations, or to obtain sufficient funds from other sources, at the relevant times. Neither the Trustee, the Platform through which this offering was originated and distributed, nor any other party has guaranteed or assumed any obligation in respect of the payment obligations of the Issuer. In particular, investors should note that this offering was not underwritten and that no arranger stands behind it.

A deterioration in the operating performance of the Issuer, an adverse change in its capital structure, the loss of one or more significant customers or contracts, or an unexpected increase in its cost base could impair its ability to service the Bonds. As at 31 December 2025, the Group had total borrowings of RM125.8 million against total equity of RM92.6 million, representing a gross gearing ratio of 1.36 times and total borrowings to EBITDA of 7.3 times.

Refinancing risk

The Bonds are repayable in a single bullet payment at maturity, and the Issuer does not expect to accumulate a sinking fund sufficient to retire the full nominal amount from operating cash flow alone. The Issuer therefore expects to refinance all or a substantial part of the Bonds at or before maturity. The ability of the Issuer to refinance will depend on conditions in the Malaysian debt capital and bank loan markets at the relevant time, on its credit standing and rating at that time, and on investor appetite for the sector in which it operates. There is no assurance that refinancing will be available on acceptable terms, or at all.

Interest rate risk

The Bonds carry a fixed coupon rate. The market value of fixed-rate debt securities generally moves inversely with prevailing market yields: if benchmark yields, including the yields on Malaysian Government Securities, rise after the issue date, the market value of the Bonds is likely to fall. Investors who sell the Bonds before maturity may therefore realise less than the nominal value, and in adverse conditions materially less. Investors who hold the Bonds to maturity are not exposed to this price risk, but bear the opportunity cost of being locked into a fixed coupon rate for the tenure of the instrument.

The Issuer is separately exposed to coupon rate risk on its floating-rate bank borrowings, which are typically priced against the relevant cost of funds of the lending institutions. An increase in the Overnight Policy Rate set by the central bank would increase the finance costs of the Group and reduce the headroom available under its coupon cover covenant.

Liquidity risk of the Bonds

The Bonds will not be listed or quoted on any stock exchange, and the Platform does not operate an order book. Operating a venue that matches buyers and sellers of capital market products would require registration as a Recognized Market Operator, which the Platform has not yet obtained. Exit before maturity is therefore available only through the standing bid maintained by the Anchor Investor at the published formula price described in Section 9.5. That bid is a contractual undertaking of a single counterparty, not a market. It is capped at RM105,000 of nominal value in aggregate in any calendar month, may be suspended in the circumstances set out in Section 9.5, and terminates if the Anchor Investor ceases to hold at least half of its original allocation. Peer-to-peer transfer between investors is intended to follow in phase two once Recognized Market Operator registration is obtained, but no date is committed and investors should not subscribe in reliance on it. An investor who may need the money before 5 November 2030 should treat this offering as unsuitable.

Liquidity and working capital risk of the Issuer

The Issuer requires liquidity to fund its operations, service its debt and meet its capital commitments. As at 31 December 2025, the Group held cash and bank balances of RM10.6 million and recorded a current ratio of 0.64 times. An unexpected lengthening of the collection cycle, the withdrawal of uncommitted banking lines, or a requirement to post additional performance security could strain the liquidity position of the Group.

Rating risk

The Bonds have been assigned a rating of A3 with a stable outlook by RAM Rating Services Berhad. A credit rating is an opinion on relative creditworthiness at a point in time and is not a recommendation to buy, sell or hold any security. The rating may be reviewed, placed on negative watch, downgraded or withdrawn at any time. A downgrade would be likely to reduce the price obtainable on a sale before maturity.

Subordination and structural risk

The Issuer holds Pekan Bandar Baru Mall directly and Pekan Semenyih Mall through a wholly owned subsidiary which is the borrower under the term loan secured on that centre. The Issuer depends on rental distributions and intercompany repayments from that subsidiary to service the Notes, and the loan agreement contains a distribution lock-up preventing release of cash where the project interest cover ratio falls below 1.40 times. A period of weak trading at Semenyih can therefore interrupt cash reaching the Issuer even where the

subsidiary remains solvent. The Issuer has guaranteed RM36.0 million of subsidiary borrowings, which would rank as an unsecured claim alongside the Notes if called.

Enforcement risk

In the event of a default, the ability of the Trustee to enforce on behalf of Bondholders may be constrained by the time and cost of legal proceedings in Malaysia, by the availability and realisable value of any security, by the rights of preferential and secured creditors ranking ahead of the Bonds, and by the terms of any court-sanctioned scheme of arrangement or judicial management order to which the Issuer may become subject. Recoveries following enforcement may be substantially less than the nominal value of the Bonds and may be received only after considerable delay.

Modification and bondholders decisions

The Trust Deed provides for meetings of Bondholders to consider matters affecting their interests generally. Resolutions passed by the requisite majority at a duly convened meeting bind all Bondholders, including those who did not attend or vote and those who voted against the resolution. The Trustee is also empowered, without the consent of Bondholders, to agree to modifications of a formal, minor or technical nature or which are made to correct a manifest error.

7.2 Risks relating to the industry and operations of the Issuer

Concentration in two assets

The Issuer owns two material shopping centres. Pekan Bandar Baru contributed 61.4 per cent. of FY2025 revenue and Pekan Semenyih 32.2 per cent. There is no diversification of consequence, and no third asset to absorb an adverse event at either.

A fire, flood, prolonged infrastructure failure, loss of an anchor tenant, or the opening of a competing centre in the same catchment would affect a large proportion of the income of the Issuer. An owner of ten centres would absorb the same event with far less difficulty.

Anchor tenant dependence

Each centre is anchored by a supermarket operator. Anchors occupy substantial space at rentals below the specialty average, and their value lies in the footfall they generate for the specialty tenants paying higher rents.

The departure of an anchor is more damaging than the rent it represents, because footfall falls across the centre and specialty tenants seek reductions or exercise break rights. The Bandar Baru anchor lease expires in 2029, within the tenure of these Notes.

Small tenant credit and arrears

Beyond the anchors, the tenant base comprises small businesses: food operators, service providers, clinics and tuition centres. Many are individual proprietorships with limited capital.

Impairment of trade receivables was RM640,000, RM720,000 and RM810,000 over the review period, rising in each year against revenue growth. Investors should read this as a normal cost of neighbourhood retail rather than an exceptional item, but should note the direction.

Property valuation and capitalisation rate sensitivity

The centres are carried at fair value, determined principally by capitalising net property income at a rate derived from market evidence, so value is sensitive to both income and the capitalisation rate.

A rise of fifty basis points in the capitalisation rate applied to the portfolio, with income unchanged, would reduce the carrying value of the investment properties by approximately RM19.4 million on FY2025 figures, reducing equity correspondingly and taking gross gearing from 1.36 times to approximately 1.72 times, close to the 1.75 times covenant. Capitalisation rates typically rise when interest rates rise and when retail sentiment weakens, and the same conditions usually depress income.

Refinancing dependence

The Issuer does not repay principal out of earnings. Rental income services interest; principal is refinanced at maturity against property value. Repayment of these Notes in 2030 depends on a lender or investor being willing to refinance at that time, on the valuation then prevailing, and on the credit environment.

The Bandar Baru term loan of RM68.0 million matures in 2032 and the Semenyih facility of RM36.0 million in 2031, so the Issuer faces a sequence of refinancings shortly after the maturity of this issue. A refinancing difficulty on either facility would be visible well before it affected these Notes, but it would affect them.

Online retail and competing supply

Physical retail competes with online channels, most acutely in fashion, electronics and books. Both centres are weighted toward groceries, food and beverage and services, which have proved more resilient, but tenant mix must be actively managed and re-let space is not always taken by a tenant of comparable covenant.

Substantial retail floorspace has been added in the Bangi and Semenyih corridor over the past decade with further centres under construction. A new centre opening in either catchment would be expected to reduce footfall, occupancy and achievable rents, and the Issuer has no ability to prevent it.

Asset enhancement execution

The works funded by this issue will be carried out in operating centres. Enhancement works disrupt trading, may require tenants to be relocated or given rental abatement, and carry cost overrun and delay risk. The projected uplift in rental income depends on re-letting the enhanced space at higher rents, which is not assured.

7.3 Regulatory and compliance risks

Changes in law, regulation and government policy

The centres require certificates of completion and compliance, fire safety certification, lift and escalator certification and local authority licensing for the operation of the premises and for individual tenant activities. Failure of a safety certification would restrict trading at the affected centre.

Assessment rates, quit rent and utility tariffs are set by local authorities and the utilities. Increases are passed to tenants through service charges only to the extent lease terms permit and the market will bear, so a material increase compresses net property income directly.

Building regulations on accessibility, fire safety and energy efficiency have been progressively tightened and apply on major refurbishment. The asset enhancement works described in Section 5 will bring the affected areas within current standards, which forms part of their cost.

The solar installation funded in part by this issue requires Energy Commission approval and grid operator consent under net energy metering arrangements. Changes to those arrangements would affect the returns on that element.

Changes to the tax treatment of investment property, including real property gains tax and the deductibility of financing costs, would affect returns and the attractiveness of the assets to a future purchaser, which bears directly on refinancing.

As a Main Market listed issuer the Issuer is subject to the Main Market Listing Requirements, including continuing disclosure and related party transaction approval.

Taxation

Statements in this document concerning taxation are based on the laws and practice in force at the date of this document. Changes in tax legislation, in the interpretation or administration of tax legislation by the Inland Revenue Board, or in the availability of incentives currently enjoyed by the Group could increase the effective tax rate of the Group and reduce the cash flow available for debt service. Prospective investors should consult their own tax advisers as to the tax consequences of acquiring, holding and disposing of the Bonds.

Anti-money laundering and sanctions

The Group is subject to anti-money laundering, counter-terrorism financing and sanctions regimes applicable in Malaysia and in the jurisdictions in which it operates or into which it sells. A failure by the Group or its counterparties to comply with these regimes could result in fines, restrictions on banking relationships and reputational damage.

7.4 Operational risks

Dependence on key personnel

The performance of the Group depends to a significant extent on the continued service of its senior management team and of technical and operational personnel with specialised experience. Competition for such personnel in Malaysia is intense. The loss of one or more members of senior management, or an inability to attract and retain suitably qualified staff, could disrupt operations and impair the ability of the Group to execute its strategy.

Information technology and cyber security

The Group relies on information technology systems for its operational, financial and customer-facing processes. A material failure of these systems, a successful cyber intrusion, a ransomware incident or a breach of personal data protected under applicable data protection legislation could interrupt operations, expose the Group to regulatory penalties and civil claims, and damage its reputation.

Insurance

The Group maintains insurance cover which it considers appropriate for its operations, including property damage, business interruption, public liability and, where relevant, contractors' all risks cover. However, such cover is subject to policy limits, deductibles and exclusions, and certain risks are not commercially insurable. A loss which is uninsured, underinsured or excluded could have a material adverse effect on the financial condition of the Group.

Litigation and disputes

The Group is, from time to time, party to claims and disputes arising in the ordinary course of business. As at the date of this document, the Directors are not aware of any pending or threatened litigation which, if determined adversely, would have a material adverse effect on the financial condition of the Group. There is no assurance that material claims will not arise in future.

Related party transactions

The Group enters into transactions with related parties in the ordinary course of business. Although the Directors are of the view that such transactions are conducted on arm's length terms and on a basis not more favourable to the related party than to an unrelated third party, there is a risk that the terms of such transactions may differ from those which could be obtained from independent parties.

7.5 Forward-looking statements

This document contains forward-looking statements, including statements regarding the intentions, beliefs and current expectations of the Issuer concerning its results of operations, financial condition, liquidity, prospects, growth and strategy. Words such as anticipates, believes, estimates, expects, intends, may, plans, projects and targets, and similar expressions, are intended to identify such statements. Forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and assumptions. Actual results may differ materially from those expressed or implied. The Issuer does not undertake any obligation to update or revise any forward-looking statement, save as required by law or by the terms of the Transaction Documents.

8. INVESTOR FREQUENTLY ASKED QUESTIONS

The questions and answers below are provided for the convenience of prospective investors and are intended as a plain-language guide only. They do not form part of the terms and conditions of the Bonds and are qualified in their entirety by the detailed provisions of this document and of the Transaction Documents. In the event of any inconsistency, the Transaction Documents shall prevail.

What is the coupon rate, and how is it determined?

The coupon is 6.50 per cent. per annum on nominal value, fixed for four years. That is RM3.25 per RM100 held every six months, or RM6.50 a year. The rate reflects three things: an A3 rating toward the lower end of investment grade, the concentration of the Issuer in two shopping centres, and interest cover of 2.8 times, which is the thinnest on the Platform.

How often are payments made, and when will I receive them?

Coupon is paid semi-annually in arrears on 5 May and 5 November of each year, with the first payment falling due on 5 May 2027 and the final payment falling due on the maturity date, 5 November 2030. Payments are made to the persons shown in the records of the depository at the close of business on the relevant record date, which falls two business days before the payment date. Payments are credited directly through RENTAS; no physical certificates are issued and no coupons need to be presented.

When will I get my principal back?

The full RM100 per RM100 of nominal value is repaid on 5 November 2030 together with the final coupon. There is no amortisation. Investors should understand that the Issuer expects to repay by refinancing rather than out of earnings, which is normal for property investment but means repayment depends on property values and credit availability in 2030.

What happens if the Issuer defaults?

A default arises if the Issuer fails to pay any amount due within the applicable grace period, breaches a financial covenant, breaches another material obligation and fails to remedy it within the cure period, becomes subject to insolvency proceedings, or triggers one of the other events of default described in Section 4.9. Upon a continuing event of default, the Trustee may, and must if directed by an extraordinary resolution of Bondholders, accelerate the Bonds so that the full nominal value and accrued coupon become immediately due and payable.

The Notes are unsecured, and the difficulty is that RM104.0 million of secured borrowings is already charged over both centres, which constitute substantially the whole value of the Issuer. Unsecured creditors would look to whatever value exceeds those charges and to the unencumbered assets maintained under the covenant described in Section 4.6. Shopping centre values are sensitive to occupancy and to capitalisation rates, both of which typically deteriorate in the circumstances that would produce a default, so a valuation prepared today is a poor guide to recovery in a distressed sale. The biennial valuation covenant is the mechanism by which investors would learn of deterioration before it became critical.

Individual investors do not enforce directly. The Trustee acts on behalf of all Bondholders collectively, which prevents a disorderly race to enforce and ensures that any recoveries are distributed rateably in accordance with the priority of payments set out in the Trust Deed.

Is this issuance Shariah compliant?

No. The Notes are a conventional interest-bearing instrument and are not Shariah compliant. No Shariah adviser has been appointed and no Shariah pronouncement has been obtained. Investors for whom Shariah compliance is a requirement should choose one of the sukuk offerings on the Platform instead.

What are the main risks I should focus on?

The Issuer would direct attention to five risks in particular. First, credit risk: repayment depends entirely on the Issuer, and the Bonds benefit from no third-party guarantee. Second, refinancing risk: the Bonds repay in a single bullet payment at maturity and the Issuer expects to refinance rather than fully amortise from operating cash flow. Third, coupon rate risk: the rate is fixed, so the market value of the Bonds will fall if benchmark yields rise. Fourth, liquidity risk: the Bonds are unlisted, secondary market trading may be thin, and investors should be prepared to hold to maturity. Fifth, the sector-specific risks described in Section 7.2, which for the Issuer principally concern concentration in two shopping centres, exposure to anchor tenant retention and small tenant credit, sensitivity of property values to capitalisation rates and occupancy, competition from online retail and newly built centres, dependence on refinancing rather than amortisation to repay principal, and the illiquidity of investment property in a distressed sale. Section 7 should be read in full.

How will the proceeds be used?

The gross proceeds of RM6.0 million will be applied as set out in Section 5: RM3.2 million to asset enhancement works at both centres, RM1.3 million to solar photovoltaic installation and chiller replacement, RM1.2 million to refinancing existing borrowings, RM130,000 to working capital, and RM170,000 to the expenses of the offering including the Platform origination fee.

What is the credit rating, and what does it mean?

RAM Rating Services Berhad has assigned a rating of A3 with a stable outlook to the Bonds. On the rating scale of the agency, an A rating denotes adequate capacity to meet financial obligations, with greater susceptibility to adverse changes in circumstances and economic conditions than obligations rated in the AA and AAA categories. The numerical modifier 3 indicates the lower end of that band. A rating is an opinion on relative creditworthiness at a given point in time. It is not a recommendation to buy, sell or hold, it does not comment on the market price or suitability of the instrument for any particular investor, and it may be reviewed, downgraded or withdrawn at any time.

Who can invest, and in what amounts?

The Bonds are issued in denominations of RM1,000 nominal value. Fractional interests in the Bonds are made available through the Tokenkan platform, under which an investor may subscribe for an interest of not less than RM100 and in increments of RM1 thereafter.

The platform operator holds the underlying Bonds and records the fractional entitlement of each investor. An investor holding a fractional interest is entitled to the corresponding share of each coupon payment and of the redemption proceeds, but is not the registered holder of the Bonds and exercises rights under the Trust Deed through the platform operator.

Are the Bonds secured?

No. This is unsecured, and both centres are already charged to existing term lenders. The protections are the negative pledge, which here does substantially freeze the position because the Issuer does not acquire assets in the ordinary course, the unencumbered asset covenant at 130 per cent., the biennial independent valuation requirement, the mandatory redemption on disposal of a centre, and the dividend restriction.

Where do I rank against other creditors?

Bondholders rank as senior unsecured creditors, equally with each other and with the Anchor Investor. They rank behind RM104.0 million of secured borrowings in respect of both centres, and behind preferential claims. Tenant security deposits of RM11.8 million belong to tenants and sit outside the reach of creditors.

Can the Issuer redeem early, and what would I receive?

The Issuer may call the whole issue from the second anniversary at 100.75 per cent. of nominal value, falling to 100.35 per cent. from the third. Investors have a put right on a change of control, and a mandatory redemption applies on the disposal of a centre which is not replaced. Otherwise the only exit is a sale into the Anchor Investor standing bid described in Section 9.5, which is discounted, capped at RM105,000 a month and may be suspended.

How is my investment taxed?

The tax treatment of coupon depends on the residence, legal form and tax status of the investor. Withholding tax may apply to payments made to certain non-resident investors, subject to any relief available under an applicable double taxation agreement. Certain classes of Malaysian institutional investors enjoy exemptions in respect of coupon income from ringgit-denominated private debt securities. The Issuer does not provide tax advice, and prospective investors should consult their own advisers.

How will I be kept informed after issuance?

The Issuer is required under the Trust Deed to deliver to the Trustee its audited consolidated financial statements within 120 days of each financial year end and its unaudited semi-annual accounts within 90 days of each half year end, together with a compliance certificate confirming observance of the financial covenants. The Issuer must also notify the Trustee promptly of any event of default or potential event of default, and of any development which would have a material adverse effect. The rating agency conducts a formal review of the rating at least annually.

Can I sell before maturity?

Fractional interests may be offered for sale through the matching facility operated by the Tokenkan platform, and the platform may also quote an indicative price at which it is prepared to take the position. Investors should understand clearly that this is not a listed market and that no party is obliged to buy. Whether a sale can be effected, and at what price, depends on the presence of a willing counterparty, on prevailing market yields and on the credit standing of the Issuer at the time; the price may be above or below the nominal value. An investor who is unable to sell should expect to hold to maturity, at which point the full nominal value becomes payable.

Two shopping centres. Is that too concentrated?

It is highly concentrated, and investors should size their holding on that basis. Pekan Bandar Baru contributed 61.4 per cent. of FY2025 revenue and Pekan Semenyih 32.2 per cent. A fire, flood, prolonged infrastructure failure, the loss of an anchor tenant or a competing centre opening in the same catchment would affect a large proportion of the income of the Issuer, and there is no third asset to absorb it.

What partially offsets this is what kind of centres these are. Both are neighbourhood centres anchored by supermarkets and weighted toward groceries, food and beverage, pharmacy, clinics, tuition centres and services. That tenant mix has proved considerably more resilient to online competition than fashion or electronics, because people do not order a haircut or a doctor's appointment online. Occupancy was 92.8 per cent. at year end and rental reversions were positive in each year under review.

The mandatory redemption on disposal of a centre, in Section 4.5, exists precisely because there are only two, and investors should regard it as a meaningful protection rather than boilerplate.

Why does the Issuer have such thin interest cover?

Because property investment is a leveraged business by design. The Issuer borrows against long-lived assets producing stable rental income, and the amount it can borrow is determined by the value of the assets rather than by the earnings they produce. EBITDA of RM17.26 million against interest of RM6.10 million gives 2.8 times cover, which is thin against the offerings on the Platform but ordinary for a property investment vehicle.

The consequence for investors is that there is less room for error than in a trading business with the same leverage. A fall in occupancy from 92.8 per cent. to the low eighties, which a competing centre opening could produce, would take cover close to the 2.00 times covenant. Section 6.4 sets out that sensitivity.

Where can I obtain further information?

Copies of the Trust Deed, the other Transaction Documents, the audited financial statements of the Issuer for the three financial years covered by this document, the rating letter and the constitution of the Issuer are available for inspection at the registered office of the Issuer during normal business hours for the period during which the Bonds remain outstanding. Enquiries may be directed to the Registrar and Paying Agent, Tokenkan Capital Sdn Bhd.

9. ORIGATION, ALLOCATION AND THE PLATFORM

9.1 How this offering was originated

This offering was originated directly by the Issuer through Tokenkan Capital Sdn Bhd, which operates the Tokenkan platform. No investment bank has acted as lead arranger, lead manager or underwriter.

The Issuer is a company listed on the Main Market of Bursa Malaysia with a market capitalisation of RM108.4 million. An issue of this size could not have carried the fixed cost of a conventional bond issuance, in which rating, trustee, legal, Shariah advisory, registry, settlement and underwriting fees are incurred at broadly the same magnitude whether a company raises RM5 million or RM50 million. The Platform exists to compress that cost base, and this document should be read as the product of that compression.

What the Platform does

The Platform structured this offering, prepared this document with the Issuer, conducted the credit review summarised in Section 6, set the indicative pricing range in consultation with the Anchor Investor, and distributes the bonds to retail investors. It maintains the register of holders and pays the periodic distributions.

What the Platform does not do

The Platform does not issue or hold the bonds. Token issuance and custody are performed by Sentinel Digital Custody Sdn Bhd, a Digital Asset Custodian registered with the Securities Commission Malaysia. The Platform has no ability to move, encumber or apply an investor's holding, and an investor's entitlement does not form part of the assets of the Platform.

The Platform does not underwrite this offering. It has given no commitment to subscribe for any portion not taken up, and holds none of the bonds on its own account. Section 5.5 sets out what happens if the offering does not reach its minimum.

The Platform does not operate an exchange or an order book, and does not match buyers with sellers. Section 9.5 describes the only exit mechanism available at launch.

The Platform is not an adviser to investors. It is remunerated by the Issuer as set out in Section 5.2, and it charges investors a transaction fee on purchases and sales. Its remuneration therefore rises with both the size of the offering and the volume of investor activity. Investors should weigh this when reading any material prepared by the Platform, including the automated explanatory tools available on it, which are provided for convenience, are grounded in this document, and do not constitute advice or a recommendation.

The Platform does not guarantee the obligations of the Issuer. On a default, the recourse of investors is to the Issuer through the Trustee, as set out in Section 4.9, and not to the Platform.

9.2 Parties independent of the Issuer and the Platform

The following functions are performed by parties independent of both the Issuer and the Platform, and their independence is the substance of the protection they provide:

- the Digital Asset Custodian, which issues and safekeeps the holdings and maintains records independently of the Platform;
- the Trustee, which holds the benefit of the covenants for investors, monitors compliance, convenes meetings of holders and enforces on their instruction. It is remunerated by the Issuer but owes its duties to holders;
- the Auditor, which audited the financial statements from which Section 6 is drawn;
- the Solicitors, who advised on the Transaction Documents; and
- where applicable, the Rating Agency, the Shariah Adviser and the Independent Valuer.

Neither the Issuer nor the Platform may remove or replace the Trustee or the Digital Asset Custodian without the consent of holders by extraordinary resolution.

9.3 Fractional holding

Investors hold fractional interests recorded by the Digital Asset Custodian and reflected in the register maintained by the Platform. A fractional interest carries the same economic entitlement, proportionate to its size, as a whole unit of nominal value, and the same right to vote at meetings of holders. It is not a separate class and is not subordinated.

9.4 The Anchor Investor and allocation of this issue

This issue is not distributed wholly to retail investors. It is allocated as follows:

Allocation	Nominal value	Proportion
Anchor Investor	RM3,900,000	65.0%
Retail investors through the Platform	RM2,100,000	35.0%
Total	RM6,000,000	100.0%

The Anchor Investor for this issue is Meridian Credit Opportunities Fund I, a professional credit fund. Investors should understand why this structure exists and what it does and does not do for them.

What the Anchor Investor provides

It provides credit validation that an approved platform cannot supply about itself. The Anchor Investor conducted its own credit assessment of the Issuer, independently of the Platform, and committed to its allocation on the basis of that assessment. A professional

credit investor taking 65.0% of the issue at the same price and on the same terms as retail investors is a meaningful signal, and it is the principal comfort available to a retail subscriber to a small unlisted issue of this kind.

It also provides the standing bid described in Section 9.5, which is the only route by which a retail investor can exit before maturity.

What it does not provide

The Anchor Investor does not guarantee the obligations of the Issuer and has no liability to retail investors if the Issuer defaults. It ranks equally with retail holders, not behind them, so it bears loss alongside them rather than ahead of them.

It is not an underwriter. It has committed to its own allocation only, and will not absorb any part of the retail tranche which is not taken up.

Investors should also note that the Anchor Investor participated in setting the pricing of this issue. Its interest in obtaining a higher return is not aligned with the interest of a retail subscriber, although both pay the same price for the same instrument.

9.5 The standing bid, and its limits

The Anchor Investor has undertaken to the Trustee to maintain a standing bid for bonds held by retail investors, at a price determined by the formula published on the Platform and set out in the Standing Bid Agreement, which is available for inspection under Section 10.3.

The formula prices the bonds by discounting the remaining scheduled payments at a reference yield, being the yield on Malaysian Government Securities of comparable remaining tenure plus the credit spread at which this issue was priced, and then applying a discount of 1.25 per cent. to reflect the cost of the Anchor Investor providing the facility. The formula is mechanical and is not a negotiation.

Investors should be clear about four limitations:

- **The price is not the nominal value.** Because the formula responds to prevailing yields, an investor selling into the standing bid when yields have risen will receive less than RM100 per RM100 of nominal value, and in adverse conditions materially less. The discount of 1.25 per cent. applies in every case, including when yields have not moved.
- **The bid is capped.** The Anchor Investor is obliged to purchase not more than RM105,000 of nominal value in aggregate in any calendar month. If retail investors seek to sell more than that in a month, requests are met in the order received and the balance carries to the following month.
- **The bid may be suspended.** The undertaking is suspended while an event of default is continuing, during the fifteen business days before and after a periodic payment date, and where the Anchor Investor is prevented from dealing by applicable law. Investors should note that the first of these means the standing bid is least likely to be available at precisely the moment they most want to sell.
- **The bid terminates.** The undertaking ends if the Anchor Investor ceases to hold at least half of its original allocation, on its insolvency, or at the maturity date. If it terminates before maturity, investors have no exit mechanism at all until Recognized Market Operator registration is obtained, and there is no assurance as to when that will occur.

The Trustee monitors compliance with the Standing Bid Agreement and reports on it in the periodic reporting published through the Platform.

9.6 Position limits

The Platform applies limits on the exposure a retail investor may take to any single issuer, in order to prevent a concentrated loss on a single small credit. An investor may not hold more than RM20,000 in nominal value of the bonds of any one issuer, nor more than twenty-five per cent. of the aggregate value of their holdings across the Platform in any one issuer.

Investors should treat these limits as a floor on prudence rather than a substitute for it. The limits are set by the Platform and may be varied. They do not imply that an investment at the limit is suitable.

9.7 What happens if the Platform ceases to operate

The entitlements of investors do not depend on the continued operation of the Platform. Holdings are issued and safekept by the Digital Asset Custodian, which is registered with the Securities Commission Malaysia and subject to its own regulatory obligations, and the register is replicated daily to the Trustee.

If the Platform ceases to operate, the Trustee is empowered under the Trust Deed to appoint a replacement registrar and paying agent, and the obligations of the Issuer to holders are unaffected. Investors should nonetheless expect the practical consequences to include the suspension of the standing bid facility, since it is administered through the Platform, and a period during which distributions may be delayed while arrangements are transferred.

10. CORPORATE DIRECTORY AND STATUTORY INFORMATION

10.1 The Issuer

Registered name	Pekan Retail Assets Bhd
Registration number	Registration No. 200901027341 (871264-T)
Registered office	Level 6, Wisma Pekan, Jalan Kelang Lama, 58200 Kuala Lumpur, Malaysia
Business address	Pekan Bandar Baru Mall, Jalan Bandar Baru Utama, 43650 Bandar Baru Bangi, Selangor, Malaysia
Date and place of incorporation	Incorporated in Malaysia on 11 August 2009 as a private limited company, converted to a public company on 26 April 2015 and listed on the Main Market of Bursa Malaysia on 3 August 2015
Financial year end	31 December
Company secretary	Ooi Bee Hoon (MAICSA 7043918)

10.2 Advisers and transaction parties

Originating Platform	Tokenkan Capital Sdn Bhd (Registration No. 202301009284 (1502773-D))
Registrar and Paying Agent	Tokenkan Capital Sdn Bhd
Digital Asset Custodian	Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia
Trustee	Amanah Wilayah Trustee Berhad
Rating Agency	RAM Rating Services Berhad
Auditor	Lau Devanathan & Co. PLT
Solicitors	Mahmud Chin & Partners
Independent Valuer	Chandra Nakamura Valuers Sdn Bhd
Anchor Investor	Meridian Credit Opportunities Fund I, a professional credit fund managed by Meridian Capital Partners Sdn Bhd
Auditors	Lau Devanathan & Co. PLT (AF 0928)
Solicitors	Mahmud Chin & Partners
Rating agency	RAM Rating Services Berhad

10.3 Documents available for inspection

For so long as any Bonds remain outstanding, copies of the following documents may be inspected at the registered office of the Issuer during normal business hours on any business day:

- the constitution of the Issuer;
- the audited consolidated financial statements of the Issuer for the three financial years covered by Section 6, together with the reports of the auditors thereon;
- the Trust Deed and the other Transaction Documents;
- the rating letter issued by RAM Rating Services Berhad in respect of the Bonds;
- the material contracts referred to in this document.

10.4 Responsibility statement

The Directors of the Issuer have seen and approved this document. They collectively and individually accept full responsibility for the accuracy of the information contained in it, and confirm that, having made all reasonable enquiries, and to the best of their knowledge and belief, there are no other facts the omission of which would make any statement in this document misleading.

10.5 Consents

The Trustee, Amanah Wilayah Trustee Berhad, the auditors, Lau Devanathan & Co. PLT (AF 0928), and the solicitors, Mahmud Chin & Partners, the rating agency, RAM Rating Services Berhad, have each given and have not withdrawn their written consent to the inclusion in this document of their names and, where applicable, of their reports and opinions in the form and context in which they appear. Tokenkan Capital Sdn Bhd has given and has not withdrawn its written consent to the inclusion of its name as Originating Platform, Registrar and Paying Agent, and Sentinel Digital Custody Sdn Bhd, registered with the Securities Commission Malaysia has given and has not withdrawn its written consent to the inclusion of its name as Digital Asset Custodian.
